CITY OF DETROIT, MICHIGAN

Debtor.

Chapter 9

Case No.: 13-53846

Hon. Steven W. Rhodes

CITY OF DETROIT'S OPPOSITION TO SYNCORA'S MOTION TO EXCLUDE CERTAIN OF THE EXPERT OPINIONS OF MARTHA KOPACZ UNDER FEDERAL RULE OF EVIDENCE 702

The City of Detroit (the "City") opposes the Motion to Exclude Certain Of The Expert Opinions Of Martha Kopacz (the "Motion") (Docket # 6999) filed by Syncora Capital Assurance Inc. and Syncora Guarantee Inc. ("Syncora"). In support of its Opposition, the City states as follows:

INTRODUCTION

1. Syncora recognizes that the Court-appointed expert, Martha Kopacz, "is a well-respected and deeply-experienced restructuring professional." Mot. ¶ 1. Syncora lauds Ms. Kopacz's "extensive" expertise and experience spanning "participation in over 100 consulting and restructuring engagements representing companies, debtors, investors, creditor committees, banks, and Chapter 11 Trustees, many of which are very prominent." *Id*.

2. Syncora further acknowledges that Ms. Kopacz "approached her assignment as the Court's feasibility expert in an industrious manner." $Id. \P 2$. Syncora even expresses "full agreement" with "many" of Ms. Kopacz's "observations and insights." Id.

Syncora's praise of Ms. Kopacz is well-founded. The Court sought an 3. expert with "outstanding qualifications" in municipal finance, budgeting, and planning who "[i]s able to give an opinion that is based on sufficient facts or data and that is the product of reliable principles and methods and the application of those principles and methods to the case." Order Regarding the Solicitation of Applications (Docket #3610). And Ms. Kopacz fit the bill: she has extensive practical experience with "financially or operationally troubled entities," including her long-running engagement with the Nassau County Interim Finance Authority (whose annual budget approached \$3 billion) to assess the accuracy of the County's financial forecasts and to conduct an in-depth review of the County's business operations. Kopacz Dep. at 37, 39, 149 (Ex. A); Report at Ex. 1 (Ex. B). She also has been involved in major restructuring and financial forecasting efforts across the country. Id.; Kopacz Dep. at 150-53 (Ex. A).

4. The Court appointed Ms. Kopacz from among a pool of many wellqualified applicants, and directed her to "investigate and reach a conclusion on: (a) Whether the City's plan is feasible as required by 11 U.S.C. § 943(b)(7); and (b) Whether the assumptions that underlie the City's cash flow projections and forecasts regarding its revenues, expenses and plan payments are reasonable." Order Appointing Expert Witness (Docket #4215).

Ms. Kopacz and her team diligently pursued and accomplished this 5. task. Ms. Kopacz and her team "conducted more than two hundred interviews and fact gathering meetings" with stakeholders and other individuals with pertinent knowledge, including elected and appointed officials, the City's Emergency Manager, City employees, retained advisors, and counsel for creditors, among others. Report at 4, 10 (Ex. B); Kopacz Dep. at 24-25 (Ex. A). The team analyzed documents relevant to the City's plan and financial projections, as well as City data and third-party information, to obtain additional background and perspective on the City's finances. Report at 4 (Ex. B). The team "thoroughly reviewed" each of the City's financial forecasts and "worked with the City and its professionals to understand how each of these documents bridge to one another." Id. at 31, 37. The team followed review of this information with additional questions and requests for information from the City, its advisors, and other stakeholders. Id. at 5. By the end of this iterative process, Ms. Kopacz's team obtained and reviewed tens of thousands-possibly "hundreds of thousands"-of documents relevant to the City's plan. See id. at Ex. 2; Kopacz Dep. at 20 (Ex. A).

In addition to information gathering, Ms. Kopacz and her team 6. conducted an extensive analytical review of the methodology and assumptions underlying the City's financial projections. Report at 4-5 (Ex. B). The team developed an "intimate understanding" of the City's forecasting models (Kopacz Dep. at 42, 112-13 (Ex. A)), which enabled them to assess the reasonableness of the City's assumptions, calculations, and results (id. at 188-90, 253-54). The team "independently verif[ied]" revenue projections through "third-party sources of data" (id. at 177), and "reviewed and looked at every line item" and "every cell of every model" underlying the City's Plan (id. at 51). Rather than "simply accept the credibility of" the City's assumptions (*id.* at 48), Ms. Kopacz explained that her team expended "an enormous amount of time ... checking the [the City's] model." Id. at 111. Ms. Kopacz rounded out her quantitative evaluation with a qualitative assessment of the City's ability to meet its obligations under the Plan. See, e.g., Report at 201-03 (Ex. B).

7. Based on this "multifaceted" assessment, Ms. Kopacz concluded that the Plan is feasible and that its underlying financial projections are reasonable. *See id.* at 10. Her 226-page expert report sets forth in careful and thorough detail the bases for these conclusions.

8. In its Motion, Syncora purports not to seek to exclude Ms. Kopacz's opinion that the City's Plan of Adjustment is feasible. *See* Mot. ¶ 26 n.45. Instead,

Syncora moves to exclude her opinions "regarding the City's forecasts and underlying assumptions." Mot. ¶ 12. But Syncora cannot seriously suggest that the Court could accept Ms. Kopacz's bottom-line conclusion on feasibility without accepting any of her reasoning. Because the Plan's feasibility depends upon the reasonableness of the City's underlying financial forecasts, Syncora cannot artificially separate Ms. Kopacz's feasibility opinion from her opinions on reasonableness. In all events, Syncora's attacks on Ms. Kopacz's reasonableness opinions are baseless—and fundamentally confuse admissibility with the weight afforded to an expert opinion.

ARGUMENT

9. Federal Rule of Evidence 702 governs the admission of expert testimony. Under Rule 702, courts enjoy broad discretion over whether to admit expert testimony. *See Gross v. Commissioner*, 272 F.3d 333, 339 (6th Cir. 2001). This discretion "is at its zenith during a bench trial." *United States v. Kalymon*, 541 F.3d 624, 636 (6th Cir. 2008); *United States v. Demjanjuk*, 367 F.3d 623, 633 (6th Cir. 2004) (the court's discretion "is particularly broad in a bench trial") (citation omitted). In fact, the Sixth Circuit has explained that the Court's traditional "gatekeeping" role "is *largely irrelevant* in the context of a bench trial." *Deal ex rel. Deal v. Hamilton Cnty. Bd. of Educ.*, 392 F.3d 840, 852 (6th Cir. 2004) (emphasis added).

10. The court's "substantial flexibility" under these circumstances allows it, for example, to admit "proffered expert testimony at the front end" and only decide later "during the course of trial whether the evidence meets the requirements of *Kumho Tire Co.* and *Daubert* and deserves to be credited." *Gonzales v. Nat'l Bd. of Med. Exam'rs*, 225 F.3d 620, 635 (6th Cir. 2000); *see also Fierro v. Gomez*, 865 F. Supp. 1387, 1395 n.7 (N.D. Cal. 1994), *vacated on other grounds sub nom. Fierro v. Terhune*, 147 F.3d 1158 (9th Cir. 1998) ("Under *Daubert*, the court concludes that the better approach in this bench trial is to admit the testimony of all of the recognized experts that it permitted to testify and ... allow [v]igorous cross-examination, presentation of contrary evidence and careful weighing of the burden of proof to test shaky but admissible evidence." (internal citation and quotation marks omitted)).

11. Syncora ignores these principles entirely, but they confirm the absence of any reason to exclude Ms. Kopacz's opinions before trial has even begun. Because the exclusion of expert testimony is in all cases "the exception rather than the rule," Fed. R. Evid. 702 advisory committee's notes, 2000 amend., the Court should allow Ms. Kopacz to testify and reserve its decision whether to credit her opinions until they have been offered and vetted in open court.

12. But even if the Court were inclined to resolve the issue now, Syncora's arguments furnish no basis for excluding Ms. Kopacz's testimony. *First*, Ms. Kopacz's extensive experience amply qualifies her to offer her opinions on the reasonableness of the City's financial assumptions. *Second*, Ms. Kopacz diligently completed the task the Court assigned her. *Third*, Ms. Kopacz applied a reliable methodology to support her conclusion that the City's assumptions are reasonable. The Court should thus deny Syncora's Motion and admit Ms. Kopacz's reliable and helpful testimony.

I. Ms. Kopacz Is Well-Qualified To Offer Her Opinions On The Reasonableness Of the City's Financial Assumptions

13. Syncora concedes that Mr. Kopacz is qualified generally in the area of "restructuring," but claims that she lacks the necessary qualifications to offer opinions on the reasonableness of the City's assumptions. The gravamen of Syncora's argument is that Ms. Kopacz does not have sufficiently specialized experience in (1) forecasting revenues and expenses for a municipality in a Chapter 9 bankruptcy or (2) opining on the feasibility or reasonableness of the City's forecasts in this case.

14. This argument is a non-starter. Courts regularly reject efforts to exclude an expert by narrowly defining the relevant area of expertise. *See, e.g., Ulico Cas. Co. v. Clover Capital Mgmt., Inc.*, 217 F. Supp. 2d 311, 317 (N.D.N.Y. 2002) ("The law does not insist on such narrow qualifications."); *TC Sys. Inc. v. Town of Colonie*, 213 F. Supp. 2d 171, 174 (N.D.N.Y. 2002) (noting that even the lack of extensive experience "directly on point does not necessarily preclude [an]

expert from testifying" (internal citation and quotation marks omitted)). A witness could thus testify, for example, as an expert in "threat assessment" in a case involving a bus accident, even though the witness had no experience analyzing threats in the bus industry. *See Surles v. Greyhound Lines, Inc.*, 474 F.3d 288, 293-94 (6th Cir. 2007).

15. Indeed, the standard for expert qualification is not onerous. Expert testimony is appropriate whenever its subject "is unlikely to be within the knowledge of the average layman," *United States v. Carson*, 702 F.2d 351, 369 (2d Cir. 1983). Moreover, "[t]he text of Rule 702 expressly contemplates that an expert may be qualified on the basis of experience." *United States v. Cunningham*, 679 F.3d 355, 378–79 (6th Cir. 2012) (citation omitted). "Whether a proposed expert's experience is sufficient to qualify the expert to offer an opinion on a particular subject depends on the nature and extent of that experience." *Id.* at 379.

16. Here, the "nature and extent" of Ms. Kopacz's qualifications far exceed the demands of Rule 702. Not only does she possess highly relevant education in business and certifications in the area of insolvency and restructuring, she has tremendously useful practical experience with financial forecasting and municipal budgeting. While Ms. Kopacz has not personally constructed *municipal*

forecasts (Kopacz Dep. at 149 (Ex. A)),¹ she does have experience assessing their accuracy—which is, after all, the precise nature of her Court-ordered task here. *See* Report at 1 (Ex. B); Kopacz Dep. at 151-53 (Ex. A).

Ms. Kopacz's other relevant background experience includes (1) 17. reviewing municipal budgets, (2) performing departmental audits for municipalities, (3) participating in over 100 consulting and restructuring engagements, including on behalf of debtors, (4) lecturing and publishing on municipal bankruptcy and restructuring, and (5) testifying as an expert witness about (i) a variety of insolvency and restructuring issues, and (ii) the appropriateness of a forecasting methodology and its underlying assumptions. See Notice Regarding Interviews of Expert Witness Applicants, at 226-54 (Docket #4068); Kopacz Dep. at 37-40, 129-30 (Ex. A). This and other experience with distressed organizations more than qualifies her to offer the opinions in her report. See, e.g., Mannino v. Int'l Mfg. Co., 650 F.2d 846, 850 (6th Cir. 1981) (noting that an expert need not have complete knowledge about the field in question); In re Texans CUSO Ins. Grp., LLC, 426 B.R. 194, 214 (Bankr. N.D. Tex. 2010) ("[T]estimony is admissible even when the expert possesses only general rather than specific experience with the subject matter."); Wechsler v. Hunt Health Sys., Ltd., 381 F. Supp. 2d 135, 143 (S.D.N.Y. 2003) (qualifying as an insolvency expert

¹ Ms. Kopacz has, however, prepared projections for *non-municipal* entities. *See, e.g.*, Kopacz Dep. at 37 (Ex. A).

a certified public accountant with seventeen years experience despite lack of prior experience in the health care industry or experience analyzing healthcare receivables).

18. To the extent Syncora believes otherwise, it can pursue the issue on cross-examination. *See McCullock v. H.B. Fuller Co.*, 61 F.3d 1038, 1044 (2d Cir. 1995) ("Disputes as to the strength of [an expert's] credentials . . . go to the weight, not the admissibility, of his testimony."); *First Tenn. Bank Nat'l Ass'n v. Barreto*, 268 F.3d 319, 333 (6th Cir. 2001) (holding that a lending expert's unfamiliarity with "some aspects" of lender-borrower relationships "merely affected the weight and credibility of his testimony, not its admissibility"); *VSI Holdings, Inc. v. SPX Corp.*, No. 03-cv-70225-DT, 2005 WL 5980804, at *10 (E.D. Mich. Apr. 12, 2005) ("If the expert lacked familiarity with some aspects of banking relationships, such unfamiliarity merely affect[s] the weight and credibility of the expert's testimony, not its admissibility.").

II. The Scope and Depth Of Ms. Kopacz's Investigation And Analysis More Than Adequately Demonstrate The Reliability Of Her Opinions

19. Having no credible grounds to challenge Ms. Kopacz's expertise, Syncora falls back to challenging Ms. Kopacz's method for determining the reasonableness of the City's assumptions. But each of Syncora's four arguments wholly fails: Syncora misstates the record and the law, and it overlooks the hallmarks of reliability in Ms. Kopacz's method and opinions.

A. Syncora's Argument That Ms. Kopacz Failed To Individually Evaulate the City's Assumptions Is Factually And Legally Flawed

20. Syncora first criticizes Ms. Kopacz's report on the ground that she did "not attempt to evaluate the reasonableness of the vast majority of the City's assumptions." Mot. ¶ 31. But this argument rests on a highly distorted characterization of the extensive and careful work Ms. Kopacz performed.

In conducting her assignment, Ms. Kopacz "followed the outline 21. contained in [her] proposal." Report at 3 (Ex. B). There, Ms. Kopacz explained that she would "identify and analyze ... critical assumptions," which she defined as "those assumptions, which if not achieved in amount or timing, could cause the Ten-Year Plan to fail to meet the payments required in the Plan of Adjustment." Notice Regarding Interviews of Expert Witness Applicants, at 230, 256 (Docket #4068) (emphasis added). Since this is what the Court appointed her to do, it was entirely appropriate for Ms. Kopacz to focus her efforts on *critical* assumptions (Report at 3 (Ex. B)), rather than every conceivable assumption underlying the (Indeed, there is a nearly infinite regress of assumptions City's forecasts. underlying each "critical" one). Syncora, however, makes no effort to distinguish between critical assumptions and others, but instead cherry-picks a handful of assumptions that Ms. Kopacz did not "independently" evaluate and sweepingly concludes that Ms. Kopacz's opinions are inadmissible. Syncora's broad-brush argument not only rests upon the false assumption that Ms. Kopacz needed to

assess *every* conceivable assumption, but also depends upon a mischaracterization of Ms. Kopacz's work.

22. To conclude that Ms. Kopacz did not evaluate "the vast majority of the City's assumptions" (Mot. ¶ 31), Syncora depends upon a blinkered reading of Ms. Kopacz's deposition. Syncora offers isolated snippets of deposition testimony to argue that Ms. Kopacz failed to complete her court-ordered task. Read in their totality, however, Ms. Kopacz's report and deposition testimony belie this claim.

23. In her deposition, Ms. Kopacz specifically indicated that she "investigate[d] and reach[ed] a conclusion" on the reasonableness of the City's assumptions. Kopacz Dep. at 15 (Ex. A). Ms. Kopacz looked at the "quantitative factors" in the City's plan, including "the mathematical accuracy of the projections," and evaluated the "reasonableness of the City's assumptions, both individually and as a group." Id. at 31-32. As Ms. Kopacz's explained, she and her team "reviewed and looked at every line item, every cell of every model." Id. at 51 (emphasis added). Ms. Kopacz repeated this point throughout her deposition. See, e.g., id. at 48 ("I reached a conclusion on the reasonableness of [Ernst & Young's] assumptions."); id. at 111 (noting that her team spent "an enormous amount of time in understanding and checking the model"); id. at 160 (noting that she performed "trend analysis with respect to the City's forecasts"); id. at 174 ("I looked at -- I used all the information that was available to me and all the people

that were available to me and -- got satisfied with the projections in the plan as being reasonable revenue projections."); *id.* at 188 ("So, looking at the assumptions, looking at the input, looking at how those were mathematically manipulated and what the output was and assessing whether or not that was reasonable, is the approach that I used to fulfill my responsibilities as part of this -this appointment.").

24. Syncora fails to bring this testimony to the Court's attention, instead inviting the Court to assume that the absence of a specific reference to "reasonableness" for each assumption means Ms. Kopacz did not consider the issue at all. Mot. ¶ 33. While the testimony Syncora relies upon to make this claim related only to cost assumptions, Syncora sweeps in *revenue* assumptions as well. See id. ¶ 34 & n.61. But, again, the record says otherwise. See Report at 200 (Ex. B) ("It is my opinion that, except where otherwise noted in my Report, the individual assumptions used to build the projections fall into a reasonable range and, that when taken as a group, these assumptions are also reasonable."). Moreover, in her deposition, Ms. Kopacz expressly indicated that she reviewed every revenue source within the City and assessed whether "each" was reasonable. Kopacz Dep. at 184-85 (Ex. A) ("We looked at all the revenues that were presented in the plan of adjustment projections.... I looked at each revenue stream and assessed whether I thought the City's forecast or projection of that revenue

was reasonable."); *id.* at 116 ("I don't think that there was any revenue stream of a recurring nature that we didn't study."). And Ms. Kopacz never intended her report to exhaustively reflect all of the work she performed. *See* Report at 11 (Ex. B) ("My intent is not to rehash every issue or pleading ... but rather, to highlight a few aspects of the facts and circumstances of this case which have had an important impact on the formulation of my opinion."); *id.* ("By no means does this Report include every factor I reviewed or considered."). Ms. Kopacz necessarily condensed into a couple hundred pages the process and results of months of work, hundreds of interviews, review of tens of thousands of documents, and exacting analysis of the City's forecasts. Syncora's assertions about what assumptions Ms. Kopacz failed to test are inaccurate and misleading.

25. Syncora also omits key language in Ms. Kopacz's deposition that further undermines its characterization of her work. Ms. Kopacz explained, for example, that she evaluated the reasonableness of the City's assumptions for "each" Restructuring and Reinvestment Initiative (RRI). Kopacz Dep. at 61 (Ex. A). More generally, Ms. Kopacz explained that she did not "simply accept the credibility of the Ernst & Young assumptions," but "did [her] own checking of them." *Id.* at 48. For income tax, Ms. Kopacz "looked at historical information" and "statewide information from various parties," in addition to "interview[ing] the team at Ernst & Young who did the analysis and the development of these

- 14 -

projections." *Id.*; *see also id.* at 235-39 (discussing "historical data of taxable income"). According to Ms. Kopacz, this embodied her "general approach" with "other types ... of revenue items" and "items of expense." *Id.* at 49. With regard to wagering tax revenues, Ms. Kopacz had conversations with Ernst & Young and evaluated the "long-term trends" relating to those revenues. *Id.* at 76. And with wage growth, Ms. Kopacz assessed "all of the individual assumptions" (*id.* at 254), and reviewed both historical data and "comparable metrics from the Michigan Department of Treasury, the Michigan Senate Fiscal Agency and the [Congressional Budget Office]." *Id.* at 257-58; Report at 47-48 (Ex. B).

26. But the foregoing are just a few examples mentioned in Ms. Kopacz's deposition. In the report itself, the true extent of her work comes into sharper focus. In a list too lengthy to recount here, Ms. Kopacz detailed the meetings she conducted concerning the City's financial assumptions. She regularly met with individuals from Ernst & Young—who assisted with the City's forecasting models—and a broad swath of City officials and departmental heads. Report at Ex. 3 (Ex. B). The entire point of these meetings was to test the assumptions underlying the City's forecasts. Indeed, by the end of this process, Ms. Kopacz and her team had reviewed "every line item" and "every cell of every model" underlying the City's Plan. Kopacz Dep. at 51 (Ex. A).

27. Exhibit 2 of Ms. Kopacz's report tells a similar story. It identifies the tens of thousands of documents that Ms. Kopacz and her team reviewed in assessing the City's financial assumptions. Contrary to Syncora's suggestion, Ms. Kopacz did not simply accept the City's assumptions as gospel, but undertook the herculean efforts necessary to vet them.

28. In fact, even in some instances where Syncora's counsel elicited an admission that Ms. Kopacz did not individually assess a particular assumption, context suggests that Ms. Kopacz did in fact evaluate the finding, or determined that such an evaluation was unnecessary. Ms. Kopacz stated, for instance, that she did not make a "specific finding" that two particular assumptions regarding employment growth were reasonable. Kopacz Dep. at 265-66 (Ex. A). Immediately after this, however, Ms. Kopacz stated:

A. I did not make a specific finding about 2.16 or any of that sort of thing. What I did is, as I said before, I looked at all the information that was available to us, historical, projections, talked with people who did this, looked at other people who make projections about these things. I did the sensitivity analysis that said what if they're off by a percentage point one way or another, what does that do? Okay? And in totality of looking at all of that stuff, I concluded that this is a reasonable assumption for, in this case, municipal income tax.

Id. at 266-67.

29. Elsewhere, Ms. Kopacz offered a similar explanation about her work:

A. I looked at all of the information that was available, okay, about all of these topics, all of these assumptions, both the revenue side and the expense side. I looked at the recent tax history. I talked to the people who made the

assumptions, asked them questions about how they came up with this assumption or that assumption or what they did and, you know, how much if you changed this, how much would that change. Okay? And concluded that, in totality, the estimates contained in the projections provide a reasonable basis for forecasting what the City is going to do from an economic perspective during the life of this -- these projections.

Id. at 253-54.

30. As the foregoing illustrates, Ms. Kopacz's work was thorough, and she acted well-within her prerogative as an expert in the field of municipal finance to determine how far she needed to drill down in individually assessing assumptions underlying the City's forecasts. Given Ms. Kopacz's extensive experience, qualifications, and searching review of the City's finances, it was hardly unreasonable for her to credit certain discrete assumptions without an independent investigation. Cf. In re "Agent Orange" Product Liab. Litig., 611 F. Supp. 1223, 1245 (E.D.N.Y. 1985), aff'd, 818 F.2d 187 (2d Cir. N.Y. 1987) ("The expert is assumed, if he meets the test of Rule 702, to have the skill to properly evaluate the hearsay, giving it probative force appropriate to the circumstances."). Ms. Kopacz could legitimately accept, for instance, population forecasts from the Southeast Michigan Council of Governments (Kopacz Dep. at 273 (Ex. A)) or unemployment levels in the City (id. at 145) without personally conducting a doorto-door survey among the City residents.

31. By the end of her investigation and despite the inherent constraints,Ms. Kopacz reported that she had "a great deal of confidence in [her] opinions"

and that there were no conclusions or analysis she would change. Id. at 28-29; see also id. at 114 ("But for the most part, I am satisfied with our ability to evaluate what all the information that was available and meet with the people that were available and do what we needed to do."). Ms. Kopacz reaffirmed this conviction even after Syncora's cross-examination of her at her deposition: "I'm still really comfortable with what we did, given the scope of our assignment, given the best information available. And I really haven't changed any of my thoughts in the last day and a half." Id. at 515. While Syncora is free to challenge Ms. Kopacz's decisions made in the course of her investigation on cross-examination at trial, they furnish no basis for excluding Ms. Kopacz's opinions here. See, e.g., United States v. L.E. Cooke Co., 991 F.2d 336, 342 (6th Cir. 1993) ("any weaknesses in the factual basis of an expert witness' opinion, including unfamiliarity with standards, bear on the weight of the evidence rather than on its admissibility") (citing *Davis v*. Combustion Engineering, Inc., 742 F.2d 916, 919 (6th Cir.1984) and Upjohn Co. v. *Rachelle Laboratories, Inc.*, 661 F.2d 1105, 1112 (6th Cir. 1981)).²

² In its background section, Syncora repeatedly asserts that Ms. Kopacz did not receive cooperation from the City or Jones Day, thus hindering her efforts. *See* Mot. ¶ 5, 16. This is simply incorrect. *First*, while Ms. Kopacz indicated that her team's relationship with Ernst & Young and Conway became "frayed" (Kopacz Dep. at 379 (Ex. A)), she did not attribute this to the City or Jones Day. Moreover, Syncora omits Ms. Kopacz's testimony that the "frayed" relationships resolved themselves. *See, e.g., id.* at 380 (noting that they "had largely worked out" their "issues" and "differences"). *Second*, Exhibits 2 and 3 of Ms. Kopacz's report belie Syncora's assertion that the City withheld information. Exhibit 2 shows, for

B. Independent Verification of Data Relates to Weight, Not Admissibility, of Expert Testimony

32. Syncora's next argument—that Ms. Kopacz's opinions are inadmissible because "she failed to test the data underlying the City's projections and forecasts" (Mot. \P 36)—fares no better. In addition to being factually inaccurate, this argument has no bearing on the admissibility of Ms. Kopacz's opinions.

33. Contrary to Syncora's sweeping assertions, Ms. Kopacz *did* independently verify a considerable amount of the City's data. *See, e.g., supra*, ¶¶

6, 7 & 23. For example:

A. I -- I wouldn't go so far as to say we didn't independently verify because we did, specifically on the revenue projections and things surrounding those, we did seek other third-party sources of data. So --

Q. There were instances where you sought some form of corroboration?

A. Separate and apart from the City.

example, that Ms. Kopacz had access to the City's entire document production. Similarly, Exhibit 3 reveals a vast number of meetings with City officials, the very purpose of which was the provision of information. Although a handful of requests for materials remained outstanding when Ms. Kopacz filed her report, they are dwarfed by the hundreds of documents the City and its advisors provided Ms. Kopacz and her team. Exhibit 3 to Kopacz Dep. (Ex. C). *Finally*, Ms. Kopacz explicitly testified that even though some information requests remained outstanding, she was "able to work around the absence of these materials" and was "still able to reach an opinion" that she had "a great deal of confidence" in. Kopacz Dep. at 22, 28 (Ex. A); *see also id.* at 515 ("I'm still really comfortable with what we did, given the scope of our assignment, given the best information available."). Kopacz Dep. at 177 (Ex. A); *see also id.* at 51 (Ms. Kopacz "reviewed and looked at every line item, every cell of every model" underlying the City's Plan); *id.* at 104-05 (testifying that the data in the City's comprehensive annual financial reports were "reliable"); *id.* at 256 (Ms. Kopacz and her team looked at "forecasts made by other forecasting entities … to analyze and assess the forecasts for wage growth and for employment growth that the City used").

Syncora's argument is legally flawed as well. Syncora assumes that, 34. to satisfy Rule 702, Ms. Kopacz had a duty to independently verify all of the data underlying the City's forecasts. As an initial matter, the Court never requested Ms. Kopacz to independently verify all of the City's data. See id. at 572-73; Order Appointing Expert Witness (Docket #4215). Nor does Syncora offer any reason to conclude that independent verification is a predicate to the admissibility of her testimony under Rule 702. Nor could it: Rule 703 expressly contemplates that experts will rely "on facts or data ... that the expert has been made aware of" but not "personally observed." FED. R. EVID. 703. As long as an expert's opinions are not based on "mere guess or speculation" but find "some support ... in the record," the Sixth Circuit maintains that they should not be excluded because of alleged problems in the underlying data. In re Scrap Metal Antitrust Litig., 527 F.3d 517 (6th Cir. 2008); see also United States v. Martinez, 588 F.3d 301, 324 (6th Cir. 2009) (testimony need only be more than "unsupported speculation").

35. In this case, Syncora never contends that Ms. Kopacz "merely pulled [her] numbers ... out of thin air" or that her assumptions find no support in the record. In re Scrap Metal Antitrust Litig., 527 F.3d at 531; see also Kopacz Dep. at 176-77 (Ex. A) (Ms. Kopacz relied on "the assimilation of data that the other professionals had acquired" to "help get us to the best data that was out there"). Syncora instead asserts that *some* of the City's data are "unreliable" and that *some* are "inconsistent with other information available to the City." Mot. ¶ 39. But these contentions regarding the City's data have no bearing on the admissibility of Ms. Kopacz's opinions. See, e.g., In re Scrap Metal Antitrust Litig., 527 F.3d at 529 (contention that expert used "erroneous data" went to "credibility and accuracy," not "reliability"); Quiet Tech. DC-8, Inc. v. Hurel-Dubois UK Ltd., 326 F.3d 1333, 1345 (11th Cir. 2003) (argument that "the specific numbers [the expert] used were wrong" impugned "the accuracy of his results, not the general scientific validity of his methods"). Indeed, courts afford experts broad latitude in deciding what data they will rely upon in forming their opinions. See, e.g., United States v. Seale, 600 F.3d 473, 491 (5th Cir. 2010) (Daubert affords experts "wide latitude in choosing what data they rely on in forming their opinions"); JMJ Enters., Inc. v. Via Veneto Italian Ice, Inc., No. Civ. A. 97-CV-0562, 1998 WL 175888, at *6 (E.D. Pa. Apr. 15, 1998) ("[Experts] are granted wide latitude in determining what data is needed to reach a conclusion."); Sudbeck v. Sunstone Hotel Props., Inc.,

No. 2:04-CV-1535, 2006 WL 2728624, at *4 (D. Ariz. July 26, 2006) (similar). Syncora's arguments thus furnish, at most, fodder for cross-examination. *See United States v. L.E. Cooke Co.*, 991 F.2d 336, 342 (6th Cir. 1993) (the duty falls upon "opposing counsel to inquire into the expert's factual basis" in cross-examination."); *Quiet Tech. DC-8, Inc.*, 326 F.3d at 1345 ("The identification of such flaws in generally reliable scientific evidence is precisely the role of cross-examination.").

C. *Daubert*'s Testability Factor Is Inapplicable To Ms. Kopacz's Opinion

36. Syncora further contends that Ms. Kopacz's opinions are inadmissible because they are allegedly not testable. Mot. $\P\P$ 40-44. Even if this were true, the lack of testability is not, under the circumstances, a basis for excluding her testimony.

37. The reliability determination under Rule 702 is a flexible inquiry. *See Surles*, 474 F.3d at 295. As the Sixth Circuit has explained, "the law grants a district court the same broad latitude when it decides *how* to determine reliability as it enjoys in respect to its ultimate reliability determination." *Id.* (emphasis added).

38. While "testability" numbers among *Daubert*'s factors for assessing reliability, courts have no obligation to reflexively apply those factors in every circumstance. *See, e.g., id.* ("district courts need not adhere to those enumerated

factors"); *In re Scrap Metal Antitrust Litig.*, 527 F.3d at 529 (*Daubert* factors are not a "definitive checklist or test"). To the contrary, courts should apply *Daubert* factors *only* "where they are reasonable measures of the reliability of expert testimony." *Id.* (quoting *Gross v. Comm'r*, 272 F.3d 333, 339 (6th Cir. 2001)) (emphasis added). In the context of non-scientific expert testimony, this often means the *Daubert* factors will have little, if any, application. *See Barreto*, 268 F.3d at 334 (*Daubert* factors "may be of limited utility in the context of non-scientific expert testimony."); *Am. Gen. Life Ins. Co. v. Schoenthal Family, LLC*, 555 F.3d 1331, 1338 (11th Cir. 2009) ("Standards of scientific reliability, such as testability and peer review, do not apply to all forms of expert testimony.").

39. Here, given the subject-matter of Ms. Kopacz's testimony, the "testability" factor is patently unhelpful. The Court directed Ms. Kopacz to assess the *reasonableness* of the City's financial forecasts and assumptions. Order Appointing Expert Witness (Docket #4215). How the Court would even apply "testability" to an inquiry on this subject is unclear. For one thing, "reasonableness" is not a term of scientific or mathematical precision but, as Ms. Kopacz explained, represents a "range of values" and "exist[s] along a continuum." Report at 18 (Ex. B). "Projections can be reasonable and favor the views of the debtor <u>and</u> projections can be reasonable and favor the views of creditors." *Id.* As this suggests, "reasonableness" entails an element of judgment that does not lend

itself to scientific testing. For another, financial forecasting itself is "less than an 'exact science." *Brown v. Brewer*, 2010 WL 2472182, at *27 (C.D. Cal. June 17, 2010). Like valuation, it entails "[e]stimations, predications, and inferences based on professional judgment and experience," *id.*, and it does not allow for "mathematical certitude," *Protective Comm. v. Anderson*, 390 U.S. 414, 442 (1968). Given these realities, concepts like "testability" are "simply not applicable" here. *Hangarter v. Provident Life & Accident Ins. Co.*, 373 F.3d 998, 1017 (9th Cir. 2004).

40. Unsurprisingly, Syncora offers no explanation of how the Court could even apply the *Daubert* testability factor. Instead, Syncora warns that the inability to subject Ms. Kopacz's conclusions to scientific testing means the Court must "simply accept [her] opinions at face value." Mot. ¶ 44. This is incorrect. Courts regularly assess the reliability of non-scientific testimony based on a variety of other factors, including the expert's "knowledge or experience," without resorting to testability. *Barreto*, 268 F.3d at 335; *Brown*, 2010 WL 2472182, at *27. This comports with the trial judge's "broad latitude to determine" whether *Daubert* factors "are, or are not, reasonable measures of reliability in a particular case."

Barreto, 268 F.3d at 335. This Court thus has no obligation to apply the testability factor, let alone accord it dispositive weight.³

D. Failure To Conduct Additional "Sensitivity Analyses" Does Not Affect Admissibility

41. Finally, Syncora contends that Ms. Kopacz's testimony should be excluded because she performed "limited 'sensitivity analyses." Mot. ¶ 45. Once again, Syncora's argument is legally and factually flawed.

42. Syncora does not dispute that Ms. Kopacz performed a considerable number of sensitivity analyses. Syncora instead faults Ms. Kopacz for failing to conduct a single *type* of sensitivity analysis (multi-variable) concerning a particular issue (the effect of "a change in Detroit's economy"). Mot. ¶¶ 47, 49. But Syncora offers no reason to conclude that this tarnishes the *reliability* of Ms. Kopacz's methodology. *Cf. In re Linerboard Antitrust Litig.*, 497 F. Supp. 2d 666, 687 (E.D. Pa. 2007) (unless a party challenging the admissibility of a regression analysis can show that "an omitted variable … is likely to affect the result of the

³ Syncora also criticizes Ms. Kopacz for allegedly admitting that "there are no standard forecasting methodologies." Mot. ¶ 43. As an initial matter, Ms. Kopacz testified that there are "groups that are trying to promulgate a set of standards for municipalities in these areas" but, in her view, "there's nothing that is *as uniform and acknowledged* as we have with generally accepted accounting principles." Kopacz Dep. at 155 (Ex. A) (emphasis added). While Dr. Cline referenced a "standard methodology" for forecasting tax revenues (Syncora Ex. 6D, Cline Dep. at 47), this does not necessarily conflict with Ms. Kopacz's view that standards exist but are not "as uniform" as general accounting principles. In any event, this conflict in testimony—if it is one at all—relates to weight of the experts' opinions, not their admissibility.

regression analysis," it will not be excluded). Nor does Syncora cite any evidence that experts in Ms. Kopacz's field would even perform multi-variable sensitivity analyses in these circumstances. Ms. Kopacz testified that she was unaware of any "mathematical or forecasting rule[s]" for "offsetting variations" (Kopacz Dep. at 56-57 (Ex. A)) and that sensitivity analyses are generally "done around a single variable." *Id.* at 97.

43. Regarding "the *likelihood* that deviations from the City's forecasts may actually happen" (Mot. \P 50), Syncora again offers no reason to suspect that experts in municipal forecasting invariably evaluate the likelihood of deviations, or how absence of such analysis here would affect Ms. Kopacz's bottom-line conclusions.

44. In any event, Ms. Kopacz's analysis *did* consider the possibility of multiple deviations from the City's forecasts. Ms. Kopacz specifically concluded that even though both long-term and short-term forecasts "are going to be wrong," there will "be enough variation in the forecast both plus and minus that on average things will be okay." Kopacz Dep. at 56 (Ex. A); *see also id.* at 126 ("variabilities" are "necessarily going to happen"). She explained that because there are "offsetting entries and offsetting variations," deviations from the City's forecasts would not necessarily upset her conclusions. *Id.* This conclusion was bolstered by the City's contingencies, the very purpose of which is to "balance off

the positive and the negative variances" in a forecast model. Id. at 81; see also id. at 95 ("I'm saying taken as a whole -- the projections with all of the conservative and aggressive assumptions taken as -- as a whole are reasonable."); id. at 222 ("A. I don't believe for a minute that the projections will come in exactly as they've been forecast. Q. I understand. But in the aggregate, you would not have rendered your opinion if you believed a material risk of failure existed, correct? A. Correct."); Report at 200-01 (Ex. B) ("I believe that there are enough conservative assumptions in the projections to offset what I view as an aggressive assumption concerning the level of contingencies."). Moreover, Ms. Kopacz specifically noted that the City's projections had not "accounted for any significant economic disruptions similar to those experienced recently during the Great Recession." Id. at 193. It is thus unclear why Ms. Kopacz had an independent obligation to do so for them (*contra* Mot. ¶¶ 47-48).

45. But even if Ms. Kopacz had not considered the multiple-deviation issue, Syncora's argument would relate solely to weight, not to the admissibility, of Ms. Kopacz's opinion. *See, e.g., Quiet Tech. DC-8, Inc.*, 326 F.3d at 1345 ("[I]n most cases, objections to the inadequacies of a study are more appropriately considered an objection going to the weight of the evidence rather than its admissibility." (internal citation and quotation marks omitted)); *Cummings v. Standard Register Co.*, 265 F.3d 56, 65 (1st Cir. 2001) (holding that "whatever

shortcomings existed in [the expert's] calculations went to the weight, not the admissibility, of the testimony"); *In re Toyota Motor Corp. Unintended Acceleration Mktg., Sales Practices, & Prods. Liab. Litig.*, 978 F. Supp. 2d 1053, 1070 (C.D. Cal. 2013) ("Plaintiff's arguments about other sources that Dr. Cassini could have consulted and alternative explanations he could have considered go to weight, not admissibility." (internal citations omitted)).

III. Ms. Kopacz's Assessment Of The Reasonableness Of The City's Assumptions Is Reliable And Therefore Admissible

46. Unable to seriously dispute that Ms. Kopacz completed the task as the Court framed it, Syncora next suggests that the work she performed was not reliable. Syncora offers a grab-bag of alleged deficiencies: Ms. Kopacz allegedly did not "examine the experience of the City's forecasting experts," "determine how bias and subjectivity may have affected the City's forecasts," "verify the data on which the forecasts were based," or determine "what methodology was used for the City's forecasts." Mot. ¶ 54. Syncora *never* asserts that the Court ordered these extraneous tasks, nor does it identify any basis for concluding that these sub-tasks were essential to the successful completion of her project.

47. The common thread in all of the alleged deficiencies is the suggestion that Ms. Kopacz failed to evaluate whether the City's process was reliable. But whether the City's *process* was reliable is logically distinct from whether its *assumptions* were reasonable, and the Court's direction to Ms. Kopacz was to consider the reasonableness of the assumptions (Order Appointing Expert Witness (Docket #4215)). Nothing prevents an expert from evaluating the reasonableness of financial-forecasting assumptions without first learning who produced it or how they did it. *See* Kopacz Dep. at 188 (Ex. A) ("What was important to me was to assess the outcome of that estimate and whether or not that was reasonable."). Although Ms. Kopacz did, in fact, examine the reliability of the City's forecasting process, it would not have had a bearing on the admissibility of her opinions if she had failed to do so.

48. Tellingly, Syncora fails to cite a single authority to the contrary. Syncora also fails to furnish any reason for concluding that the identified sub-tasks were essential to the reliability of Ms. Kopacz's opinions. As previously discussed, Ms. Kopacz's experience in assessing municipal forecasts is extensive—and nothing in Syncora's bald assertions that she should have done more precludes her from offering her opinions. Indeed, Ms. Kopacz had no obligation to *disprove* every conceivable negative influence on the City's assumptions; she was only asked to evaluate their bottom-line reasonableness. While evidence of bias, faulty data, or questionable methodology that influenced the City's projections could provide material for cross-examination, Ms. Kopacz's "failure to account for all possible ... factors goes only to the weight, not the admissibility, of [her] testimony." *Amway Global v. Woodward*, 744 F. Supp. 2d

- 29 -

657, 678–79 (E.D. Mich. 2010); *see also L.E. Cooke Co., Inc.*, 991 F.2d at 342 ("any weaknesses in the factual basis of an expert witness' opinion, including unfamiliarity with standards, bear on the weight of the evidence rather than on its admissibility").

WHEREFORE, the Court should deny Syncora's Motion to Exclude Certain Of The Opinions Of Martha Kopacz.

Dated: August 27, 2014

ATTORNEYS FOR THE CITY OF DETROIT

<u>Exhibit A</u>

Page 15 1 - MARTI KOPACZ - VOLUME 1-2 Α. This appears to be the order 3 appointing me as the expert witness. Okay. Paragraph 2 of the order 4 Q. 5 specifies what the Court has asked you to do, 6 correct? Yes, it does. 7 Α. And could you tell me what it is you 8 0. were instructed by the Court or asked by the Court 9 10 to do? 11 Α. I was asked to investigate and reach a conclusion on, A, whether the city plan is 12 feasible as required by 11 U.S.C. Section 943(b)(7), 13 14 and, B, whether the assumptions that underlie the 15 City's cash flow projections and forecasts 16 regarding its revenues, expenses, and plans are 17 reasonable. 18 0. And does your report -- and did you 19 do that work? I did that work. 20 Α. 21 0. And does your report contain your 22 conclusions as a result of having done that work? 23 Α. It does. 24 Ο. Okay. So let me ask you a little bit about the background of the report. 25

Page 21 1 - MARTI KOPACZ - VOLUME 1-2 is a spreadsheet that Jones Day has updated as we 3 went along. 4 Have you seen versions of Exhibit 3 5 before? 6 Α. I have not. 7 Q. You have not. Are you aware that versions of it were given to members of your team 8 9 as the project went along? 10 Α. I'm not sure I understand that 11 question. 12 Q. Do you know whether anyone from your team has seen this document or versions of it? 13 14 Not that I know of. Α. 15 0. Okay. Let's go to Exhibit 4 of 16 your -- of your report. Do you have Exhibit 4 17 before you? 18 Α. I do. 19 And what does Exhibit 4 set forth? 0. 20 Α. Exhibit 4 sets forth the open 21 information requests as of the date of my report. 22 Q. Okay. Your report was, what, the 23 25th? 24 July 18th. Α. 25 Q. July 18th. Have some of these

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 22 - MARTI KOPACZ - VOLUME 1-1 2 materials since July 18th been provided to you? 3 Α. I don't think so. I don't think so. Ο. Okay. Do you know for a fact that 4 5 all of these materials, in fact, exist? Α. I do not know that. 6 7 0. Has the absence of these materials affected your analysis in any way? 8 9 Α. The -- some of the requests here I would still like to receive. 10 11 Q. Sure. 12 Because it would -- obviously, I Α. 13 asked for it because I thought it was -- would be 14 helpful and it would be more information. 15 I reached my opinion on the 16 information I had so, you know, I don't know how 17 to answer that. In the sense of yes, I'd still 18 like to have them, but --19 0. Sure. 20 -- I didn't have it and I was still Α. 21 able to reach an opinion. 22 Q. In other words, you were able to work 23 around the absence of these materials? 24 Α. I did. 25Okay. Exhibit 3 of your report Q.

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 23 1 - MARTI KOPACZ - VOLUME 1-2 contains a list of all the meetings that you and 3 others at Phoenix held. Am I correct on that? 4 Α. This is the contact log that the 5 Judge asked me to keep. I, in turn, then asked my 6 team to keep a contact log as well. 7 Q. Okay. 8 Α. So, it's -- there really are kind of two sections to it. One is all of the contacts 9 10 that I was involved in and then the second part of 11 it is contacts that team members had that I wasn't 12 involved in. 13 Ο. Okay. 14 Α. And it could -- it could be phone 15 calls, it could be e-mails. Most of them are 16 face-to-face meetings. 17Sure. You began your work shortly 0. 18 after your appointment on April 22nd? 19 Α. I began my work on April 22nd, yes. 20 0. And certainly continued it up until 21 the time you submitted your report? 2.2 Α. I did. 23 Q. And have you continued working since 24 then? 25 Α. Other than to prepare for this

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 42 of 351

Page 29 1 - MARTI KOPACZ - VOLUME 1-2 in your report you'd like to change? 3 Α. No. 4 0. Now, I think I'd shown you the 5 order -- Court's order, which would be I think our Exhibit 1. No, it's our Exhibit 2 appointing you 6 7 as the expert witness. You'd already read into the record, Ms. Kopacz, about feasibility. 8 9 As part of your work, you defined the 10 standard of feasibility, did you not? 11 Α. I did. 12 Q. And it's on Page 13 of your report. 13 Let me ask you just to look at Page 13. 14 Uh-huh. Α. 15 Is that before you? 0. 16 Α. It is. 17 Okay. And I'm directing your 0. 18 attention to the italicized, indented language and let me just ask you, just so we have it on the 19 20 record, if you could read it into the record. 21 Then I'm going to ask you about it. 22 Α. Okay. "Is it likely that the City of 23 Detroit after the confirmation of a plan of 24 adjustment will be able to sustainably provide 25 basic municipal services to the citizens of

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 30 1 - MARTI KOPACZ - VOLUME 1-2 Detroit and to meet the obligations contemplated 3 in the plan without the significant probability of a default." 4 5 Ο. And this was the definition you 6 worked with in analyzing the data and reaching the 7 conclusions on your project? 8 Α. This is a definition that I developed 9 along with my team against which I then assessed 10 the City's plan. 11 And it says here "sustainably Q. 12 provide." 13 What did you mean when you said 14 "sustainably provided"? 15Α. That the City would be able to 16 deliver basic municipal services indefinitely into 17 the future. 18 Q. When you say "basic municipal 19 services," what services are you referring to? 20 Fire, police services, road Α. 21 maintenance, the like. 22 Q. And you go on to say, "to meet the 23 obligations contemplated in the plan." 24 That means what the plan provides for 25 in terms of what the city must in future years

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 31 1 - MARTI KOPACZ - VOLUME 1-2 pay, correct? 3 Α. Yes. And then you go on to say, "without 4 0. 5 the significant probability of default." 6 Do you see that? 7 Α. Yes. 8 0. And what does "significant 9 probability" mean as you used it here? 10 Α. It's my thought around, is the plan 11 structured so that there's a likelihood that the 12 City would default, so --13 0. And is -- go ahead. 14 Α. Yeah. 15 Q. So significant probability is the 16 flip side of a likelihood, right? 17 Α. Yes. 18 Q. Okay. Can you put a percentage 19 number on the term "significant probability"? 20 Α. I cannot. 21 Now, in your work, I think you've 0. 22 written in your report that you looked at 23 quantitative factors, correct? 24 Α. Yes. 25 Q. And those included the accuracy of --

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 32 - MARTI KOPACZ - VOLUME 1-1 2 the mathematical accuracy of projections? 3 Α. Yes. 4 Q. Correct? 5 And the reasonableness of the City's assumptions, both individually and as a group? 6 7 Α. Yes. And finally, whether there was an 8 Ο. 9 adequate contingency as set forth in the City's 10 projections, correct? 11 Α. Yes. 12 I meant to ask you, by the way, in a Q. 13 footnote you point out that the term "forecasts" 14 and the term "projections" are not necessarily 15 synonymous although you will treat them as such 16 for your report. 17 For the record, what is the 18 difference? 19 Α. It's -- the difference exists in 20 accounting terminology. 21 Q. Uh-huh. 22 Α. Whereas a -- generally, the thinking 23 is that a forecast is kind of the best estimate, 24 whereas projections can include any set of 25 variables and any sort of assumptions, sensitivity

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 37 1 MARTI KOPACZ - VOLUME 1-2 Ο. So the first sentence says, 3 "Ms. Kopacz has prepared dozens of financial 4 projections for clients and reviewed and critiqued 5 dozens more prepared by others." 6 This has been in connection with your work at Phoenix and elsewhere? 7 8 Α. Yes. 9 0. And by "projections," you mean 10 forecasts as well as projections as we just discussed? 11 12 Α. Yes. 13 Ο. And just as a general matter, when 14 you, yourself, have prepared projections, what 15 kind of assignment did you have that asked you to 16 prepare projections? 17 Α. Generally, it would be in the context of representing a client that was financially or 18 19 operationally troubled, potentially involved in a formal or informal restructuring or Bankruptcy 20 21 Court proceeding. 2.2 Ο. Okay. And then you write you 23 "critiqued dozens more prepared by others." 24 Would that be in a comparable --25 comparable setting?

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

		Page 38
1	- MARTI KOPACZ - VOLUME 1-	
2	A. Yes.	
3	Q. Okay. And then you write or this	
4	exhibit says, "She has previously testified as to	
5	the appropriateness of forecasting methodology,	
6	the assumptions upon which forecasts are based and	
7	the likelihood of an organization to meet its	
8	forecast."	
9	Okay. And what engagements asked you	
10	to do that work?	
11	A. That the first time I ever	
12	testified on forecasting and assumptions was in a	
13	matter called HealthCo HealthCo. It was a case	
14	that and I believe it's in, we go back to my	
15	proposal to the Court, it's listed and it will	
16	tell you, but it was a bankruptcy case that	
17	involved a failed leverage buyout transaction that	
18	the trustee believed was a fraudulent conveyance.	
19	Q. Okay.	
20	A. And my engagement, I represented the	
21	Lazard Freres who had been the investment banker	
22	and Coopers & Lybrand, at the time the	
23	accountants, who were being sued and my job was to	
24	put myself back in the position at the time that	
25	that transaction was done and evaluate the

Page 39 1 - MARTI KOPACZ - VOLUME 1-2 reasonableness of the projections that were made 3 then. And this leads me to ask you a 4 Ο. 5 question. 6 I take it that a good deal of your 7 work in your career has involved entities that are one way or the other involved in bankruptcy or 8 9 insolvency matters? 10 Α. Yes. 11 0. Have you, as a practice, represented 12 one side more than the other side; in other words, creditors more than debtors or debtors more than 13 creditors in this work? 14 15 Α. I don't think -- I think it's very 16 balanced for the most part. 170. And you've also been involved in 18 municipal insolvencies? 19 Α. I have been involved in municipal --20 troubled municipal situations. 21 Q. Okay. And what are some examples of 22 those? 23 Α. The one that I was involved in most significantly and for the longest period of time 24 25 was Nassau County here in New York.

Page 40 1 - MARTI KOPACZ - VOLUME 1-2 Q. Okay. But you've had others too? 3 Α. Yes. 4 Back to Exhibit 1, further Ο. Okay. 5 down it's written, "Ms. Kopacz understands the 6 nuanced area" -- "area of municipal budgeting." 7 Do you see that -- budgeting. 8 Α. Yes. 9 Ο. Okay? What -- what do you mean when 10 you say "nuanced area"? 11 Α. Municipal budgeting and government 12 accounting are significantly different than what 13 most of us become familiar with in the private 14 sector. It involves fund accounting. It involves 15 appropriations and encumbrances and concepts that 16 we don't have in the private sector. 17 0. When you say "incumbrances," what do 18 you mean? 19 Α. Encumbrances is a manner by which government on paper sets aside funding for 20 21 particular projects or services or goods. 2.2 Q. Okay. And the next sentence says, 23 "Because municipal entities lack a 'standard' in 24 budgeting, forecasting and accounting, great 25 variations occur in the manner in which public

		гu
1	- MARTI KOPACZ - VOLUME 1-	
2	entities report financial results and develop	
3	forecasts."	
4	When you say they "lack a standard,"	
5	what do you mean by that?	
6	A. They private entities are for the	
7	most part required to adhere to generally accepted	
8	accounting principles. There are the government	
9	version of accounting principles allow for a great	
10	deal of variety and individual variation in terms	
11	of how municipal entities report revenues,	
12	expenses, capital expenditures, and the like.	
13	Q. Do municipalities typically approach	
14	these issues in the same manner?	
15	A. No.	
16	Q. So how does one go about	
17	understanding how any particular municipality has	
18	handled its accounting?	
19	A. You have to do a detailed analysis of	
20	whatever the revenue, the expense and the	
21	accounting for that is.	
22	Q. You did that here in the case of the	
23	City of Detroit?	
24	A. In in some cases, yes.	
25	Q. Okay. You certainly got to the point

Page 42 - MARTI KOPACZ - VOLUME 1-1 2 where you felt you understood how Detroit did its 3 forecasting and budgeting, correct? 4 Α. Is that -- are you talking before the 5 bankruptcy or during the bankruptcy? 6 No, during -- during your -- your Ο. 7 work. 8 Α. Right. In terms of those forecasts and budgets --9 10 Q. Yes. 11 -- as they relate to the plan? Α. 12 Q. Yes. 13 Α. Yes, I do. 14 Okay. Now, you mentioned that you 0. 15 met with financial advisors, including Ernst & 16 Young and Conway MacKenzie? 17 Α. Yes. As between the two, how have they 18 0. 19 divided up the work of being advisors to the City? 20 Α. It's my understanding that Ernst & Young was responsible for the ten-year baseline 21 22 plan, the 40-year plan and, at a functional level, 23 is responsible for the cash management for the 24 City. And that Conway MacKenzie developed the 25 restructuring and reinvestment initiatives, what

Page 48 1 - MARTI KOPACZ - VOLUME 1-2 forecast of income in future years -- income tax revenues in future years was or was not a 3 reasonable forecast? 4 5 I looked at historical information. Α. I looked at the outside -- the statewide 6 7 information from various parties, and I and my 8 team interviewed the team at Ernst & Young who did 9 the analysis and the development of these 10 projections. 11 Q. Fair to say you didn't simply accept 12 the credibility of the Ernst & Young assumptions? 13 Α. I did not. 14 Q. Or the Ernst & Young calculations? 15 Α. I did not. 16 You did your own checking of them? 0. 17 Α. T did. And then used your own knowledge base 18 Q. 19 to reach a conclusion about the quality of Ernst & 20 Young's work? I -- I didn't reach a conclusion 21 Α. 22 about the quality of Ernst & Young's work. Ι 23 reached a conclusion on the reasonableness of 24 those assumptions. 25 Q. And -- and by the way, the Okay.

2	report the projections are generally	
3	mathematically correct and materially reasonably	
4	and, therefore, fall within the feasibility	
5	standard I have defined."	
6	Do you see the language I read?	
7	A. Yes.	
8	Q. I notice there's a typo. Did you	
9	mean to write "materially reasonable" instead of	
10	"materially reasonably"?	
11	A. Yes. Thank you.	
12	Q. It's all right. It's basically what	
13	lawyers are trained to do is look for typos. I	
14	went to law school imagining myself in front of	
15	the U.S. Supreme Court; instead I've become a	
16	glorified proofreader.	
17	All right. Now, when you say the	
18	generally mathematically the projections you're	
19	speaking about are the City's 10 and 40-year	
20	projections?	
21	A. That's correct.	
22	Q. And we already go ahead. I'm	
23	sorry.	
24	A. And the and the RRI projections.	
25	Q. And I've already asked you about the	

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 51 1 - MARTI KOPACZ - VOLUME 1-2 phrase "mathematically correct." 3 Α. Uh-huh. What do you mean when you say 4 Ο. 5 "materially reasonable"? 6 Α. I believe the projections taken as a 7 whole are reasonable. 8 Q. And then the next paragraph says, "It 9 is my opinion that, except where otherwise noted 10 in my report, the individual assumptions used to 11 build the projections fall into a reasonable range 12 and that, when taken as a group, these assumptions 13 are also reasonable." 14 Can you tell me why you were able to 15 reach that conclusion? 16 Α. Because we reviewed and looked at 17every line item, every cell of every model. 18 Ο. And how big was this model? 19 Α. The -- the E&Y model is, my recollection, I think about a -- over a hundred 20 21 sheets -- over a hundred Excel spreadsheets. 22 Q. Okay. 23 Α. The Conway model is actually about 24 30 models together and each of those models is 25 multiple Excel spreadsheets. Clearly, Kevin Barr

- MARTI KOPACZ - VOLUME 1-1 2 Ο. So you testified that one feature of 3 a long forecast is the greater chance for variability as the years go on, correct? 4 5 Α. I would agree with that statement, 6 yes. 7 Q. Are you also saying that in the future years that, although there may be such 8 9 variation, it becomes less material as we sit here 10 today because the variations happen so far into 11 the future? 12 Α. The material word, I don't agree with 13 that in the sense that if it is a large risk component in the out years, that could affect my 14 assessment of feasibility even though it was far 15 16 out into the future. The other part, and I don't 17 mean to quibble, but the near-term forecasts are 18 going to be wrong too. It's just will there be 19 enough variation in the forecast both plus and 20 minus that on average things will be okay. 21 0. Okay. And there are such things as -- as offsetting entries or offsetting 22 23 variations, correct? 24 Α. Correct. Yes. 25 Q. Is there any mathematical or

Page 57 1 - MARTI KOPACZ - VOLUME 1-2 forecasting rule about that? 3 Α. Not to my knowledge. 4 Ο. Let me ask about the RRIs if I could. 5 Α. Okay. 6 Ο. You've mentioned. That's short for 7 restructuring and reinvestment initiatives? 8 Α. Yes. 9 Ο. Okay. And fair to say that you 10 generally are complimentary of the RRIs that the 11 City has planned? 12 Α. Complimentary? 13 0. Let me look -- let's look at 207 of 14 your report. 15 Α. Okay. 16 Q. At the very top, you've written, "The 17 RRIs are one of the positive outcomes of the 18 bankruptcy process. The RRIs provide the backbone 19 of the improved services to the City of Detroit." That's -- that's what I was asking 20 21 you about. 22 Α. Yes. Yes. 23 Q. So you -- you believe that on balance 24 the RRIs are a good not a bad thing? 25 Α. Yes.

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 58 of 351

Page 61 1 - MARTI KOPACZ - VOLUME 1-2 by which the RRIs were to be implemented? 3 Α. I'm not sure anyone has yet. 4 0. Okay. Or the timetable for 5 implementation -- for implementation? 6 I'm not sure -- I'm not sure that Α. 7 that has been completely defined at this point. 8 Q. In the course of your work, did you 9 look at the dollar amount of the RRIs to see if 10 those were reasonable assumptions for the each 11 RRI? 12 Α. Yes. 13 Q. And what did you determine? 14 Α. We concluded that they were 15 reasonable estimates for what these initiatives 16 would cost. 17 Now, one of the things you looked at Q. 18 I think you said was blight? 19 Α. Yes. 20 0. And specifically, I quess the removal 21 of blight? 22 Α. Yes. 23 Ο. How significant in your opinion is 24 the City's program for the removal of blight? 25 Α. Blight removal is very important to

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 59 of 351

- MARTI KOPACZ - VOLUME 1-1 2 Ο. Because they've been changed in the 3 most recent set of projections? 4 Α. The/the conversations that I and my team had with E&Y with regard to this were looking 5 6 at the long-term trends, they have studied it. Ιt 7 would be -- you don't want to overreact to any 8 very short-term change. So, I think the -- the 9 decrease in the wagering tax assumption here 10 was -- was reasonable in light of the long-term 11 nature of the projection. 12 Q. Okay. Just to summarize, because 13 your answer touched a few things. 14 There has been a set of projections 15 from the City and the fourth amended plan of 16 adjustment which was filed in May, correct? 17 Α. Yes. 18 0. And then EY came up with a revised and updated set of projections on July 2nd? 19 20 Α. EY and Conway. 21 Q. And Conway. 22 Α. Uh-huh. 23 Ο. And as to wagering taxes, the 24 July 2nd projections lowered the level of wagering 25 tax revenue that was forecast, correct?

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

1	- MARTI KOPACZ - VOLUME 1-
2	Q. But when you say "factor in," you
3	mean the projections have some allowance for the
4	chance this opportunity may not be realized?
5	A. I don't know if the contingency was
6	created to address this specifically, but clearly,
7	this is a risk and you put a contingency in so
8	that you can balance off the positive and the
9	negative variances.
10	Q. Okay. Now, at Page I've asked you
11	before about improvement of the City's IT systems
12	and we talked about the amount of the spend the
13	City is thinking about for IT improvements. Some
14	of those would be implementation of new IT systems
15	all together?
16	A. Yes.
17	Q. Are you familiar with the failure
18	rate of implement implementation of new IT
19	systems?
20	A. We did. I am.
21	Q. Okay. And what what is what
22	are the risks of a failure of implementation of a
23	new IT system?
24	A. Time and money.
25	Q. Okay. How and what would the

		ruge J
1	- MARTI KOPACZ - VOLUME 1-	
2	conservative assumption would be something that	
3	would either cause a reduction in the value of the	
4	revenue or an increase of the value of the	
5	expenses.	
6	Q. Have you attempted to quantify the	
7	conservative assumptions in the City's	
8	projections?	
9	A. I have not.	
10	Q. You then go on the say, "While I do	
11	not believe a 1 percent contingency is adequate, I	
12	believe that the POA projections taken as a whole	
13	fall within the range of reasonableness and within	
14	my definition of the feasibility standard."	
15	Do you see that?	
16	A. That's correct.	
17	Q. And are you saying that, although the	
18	1 percent contingency is not enough, the other	
19	conservative assumptions offset any shortcomings?	
20	A. I'm saying taken as a whole the	
21	projections with all of the conservative and	
22	aggressive assumptions taken as as a whole are	
23	reasonable.	
24	Q. Okay. Let me ask you about	
25	sensitivity analyses now.	

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 96 1 - MARTI KOPACZ - VOLUME 1-2 Α. Okay. 3 0. And you have about a half dozen of 4 them in your report, correct? 5 Α. I haven't counted them. Okay. Well, nor are we going to 6 0. itemize them all here, but they seem to be about 7 that many. And let me just go to the first one, 8 which is on Page 48, 49. And this is the 9 10 sensitivity analysis about income taxes. 11 Α. Okay. 12 Q. And the analysis is described on 13 Page 48 and the table is on 49. 14 Uh-huh. Α. 15 0. Is it fair to say that this is the mathematical exercise of the simply showing what a 16 17 1 percent change results in if no other constants 18 change? 19 That's correct. Α. 20 0. In fact, a change in taxable income 21 could affect other constants, right? 22 Α. It could. 23 And if so, the sensitivity analysis 0. 24 would have to be altered to take into account 25 those other changes; is that right?

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 97 - MARTI KOPACZ - VOLUME 1-1 2 Α. Generally, a sensitivity analysis is 3 done around a single variable. 4 0. Okay. 5 Α. Right? 6 0. And all of the sensitivity 7 analyses -- analyses you have done have been done 8 around a single variable, right? 9 Α. Yes. 10 Q. And when it predicts a -- the effects 11 of a 1 percent change, it would be that absolute 12 number whether the 1 percent is up or whether the 13 1 percent is down, correct? 14 Α. Yes. Yes. 15 MR. STEWART: That is all I have. 16 MR. HACKNEY: This might be a good 17 time for a break. I'm going to move all my 18 stuff over there. 19 MR. STEWART: Sure. 20 THE VIDEOGRAPHER: Okay. The time 21 now is 11:04 a.m. We're going off the 22 record. 23 (Whereupon, there was a brief recess 24 in the proceedings.) 25 THE VIDEOGRAPHER: Time now is

Page 104 - MARTI KOPACZ - VOLUME 1the microphone. MR. HACKNEY: That's okay. It's a long one, but I think it was the best way to ask it, so it may be better to have it read back. (The question requested was read back by the reporter. THE WITNESS: That didn't help me. Can we try again? BY MR. HACKNEY: So, I think -- let me try and Yeah. summarize what you've said. I believe that you have testified that you believe the CAFRs are reliable financial information sets, correct? Right. I -- the CAFRs are based on financial information that has been tested and vetted and upon which KPMG has opined. Okay? I may quibble with some of the accounting that's in there just because I have a view of certain things. Okay? But at least at that point in time, if we're looking at, for

example, the CAFR in June of '12, which was the 25 basis for the original baseline by E&Y, if they

2	had to be.	
3	Q. Yeah. It had to be.	
4	A. By definition, had to be.	
5	Q. Are there problems with the forecasts	
6	that are in the plan in your view?	
7	A. Problems? I I don't there's	
8	not problems with them in the sense of where they	
9	end up, right? I, again, have been really	
10	critical of how confusing they are.	
11	Q. I was going to say that it seems to	
12	me that when a forecast is confusing, and I'm one	
13	of the people that shares your view that they're	
14	confusing, that strikes me as a problem with the	
15	forecast. I think a forecast should not be	
16	confusing, but that's me and I wanted to ask	
17	whether or not the confusing nature of the	
18	forecasts was a problem from your point of view?	
19	A. It it caused my team to spend an	
20	enormous amount of time in understanding and	
21	checking the model, right? It it I think	
22	the the word I'd use in here or a word I used	
23	at one point in time was it was tedious.	
24	Q. Isn't it fair to say that it it	
25	took an enormous amount of time just to understand	

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

- MARTI KOPACZ - VOLUME 1-

2 the model?

1

3	A. We yes. I I believe that I
4	have a good understanding of all the models. You
5	know, members of my team have a an incredibly
6	intimate understanding of those models. But that
7	required a significant effort on our part, but we
8	understand them now.
9	Q. How long would you say it took you
10	and your team to reach the point where you could
11	say, okay, I now have an understanding of the
12	model?
13	A. About the by the time we got the
14	July 2nd numbers, we had a really good
15	understanding of the May 5th numbers.
16	Q. Okay. So, you were retained on or
17	about April 22?
18	A. April 22nd. We got the working
19	models on the E&Y stuff Memorial Day.
20	Q. Which was April 30 or something like
21	that?
22	A. May something or other, right?
23	Q. Okay.
24	A. And, you know, within a couple of
25	weeks of actually getting the working models, we

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 113 - MARTI KOPACZ - VOLUME 1-1 2 were in -- in pretty good stead with understanding the May 5th, and then we got the July 2nd and went 3 through a similar process with that; albeit, you 4 know, we already knew how they worked so it was 5 6 easier to do those. 7 0. So would you say by the end of May 8 that you believe your team had achieved a good 9 working understanding? 10 Α. By the end of -- by the end of No. 11 June. 12 Oh, by the end of June? 0. 13 Α. By the end of June. 14 And you --Q. 15 Α. We didn't get the working models until the end of May. 16 Okay. You had less than --17 Q. 18 Α. May something or other. 19 You had less than 90 days to do your 0. 20 work in this case, correct? 21 Α. Yeah, whatever it's been. 22 So May, June, July -- April 22 to Q. 23 May -- July 18 I think. 24 Α. Yes. 25 0. Did you have sufficient time to do

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

1 MARTI KOPACZ - VOLUME 1-2 your work? 3 Α. I feel like I did. I mean there's 4 still a couple of things that, as I said in to 5 response to Mr. Stewart, questions that I intend to do going forward. But for the most part, I am 6 7 satisfied with our ability to evaluate what all the information that was available and meet with 8 9 the people that were available and do what we needed to do. 10 11 Q. With respect to the forecasts? 12 Α. With respect to the forecasts. 13 Now, with respect to the 0. 14 restructuring and reinvestment initiatives, you're 15 not offering the opinion that they will achieve 16 the goals that they're held out to achieve, 17 correct? 18 Α. No. No. 19 Ο. And you haven't conducted a 20 comprehensive review of the City's department from 21 an operational standpoint to understand how the 22 restructuring and reinvestment initiatives map on 23 to needs of each department, correct? 24 Α. I have not redone -- I have not 25 redone the work that Conway has done. That's for

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

1 - MARTI KOPACZ - VOLUME 1-2 They're not in -- they're not what we 3 would consider to be part of the City's budget. 4 Q. Understood. 5 Α. Right. But they're in the plan as a 6 sources of funds. Okay. So, let me -- let me put --7 Q. 8 let me turn the question around, which is what 9 revenue streams did you not study? 10 Α. I don't think that there was any 11 revenue stream of a recurring nature that we 12 didn't study. 13 Well, what about something like DWSD? 0. 14 Did you undertake an analysis to determine whether in the future the City's general fund might obtain 15 revenue from what is currently known as DWSD? 16 17 Α. We did not do that. 18 Q. Okay. So you have no opinions on 19 that one way or the other? 20 Α. I do not. 21 0. You are generally aware that there is 22 this concept that the DWSD may change the 23 structuring in which it's housed in a way that 24 yields an additional revenue stream to the general 25 fund?

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 126 1 - MARTI KOPACZ - VOLUME 1-2 increase the likelihood that the prior plans, all 3 things being equal, were feasible, correct? 4 Because it would make the City's ability to comply 5 with the plan a lower bar? 6 MR. ALBERTS: Objection. 7 THE WITNESS: More cash available 8 improves feasibility. 9 BY MR. HACKNEY: 10 If steeper cuts to pensions increases Ο. 11 the amount of cash that's available, steeper cuts 12 to pensions makes the plan more feasible. Do you 13 agree? 14 I'm not sure if it's -- that's it's Α. 15 if P then Q, and you're saying Q therefore P. I'm 16 not sure that -- that you can do that, right? 17 0. Why not? 18 Α. Well, because again, it's -- it's the 19 totality of the cash that's available. So would I 20 like to have -- again, I have been very clear in 21 my report. I'm being very clear today. 22 I would like to see more cash that's 23 not committed to somebody or something available 24 in this plan to provide cushion for variabilities 25 that are necessarily going to happen. So if -- if

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 72 of 351

Page 129 1 - MARTI KOPACZ - VOLUME 1-2 Q. Have you ever seen another 3 municipality do a comprehensive general fund forecast over a 40-year period -- a gen --4 5 comprehensive general fund forecast over a 40-year 6 period? 7 Α. Forty years. 8 0. Yeah. 9 Α. No. 10 So, the two that are in the plan, the Ο. 11 10-year and the 40-year, are the first you've ever 12 seen a municipality do, correct? 13 Α. That I've ever seen? Yes. 14 0. Have you ever seen a municipality do 15 a forecast when it was undergoing this level of 16 change? 17 Personally? Α. No. 18 Q. Ma'am, have you ever been qualified in a court of law as an expert before? 19 20 Α. I have. 21 0. Okay. And tell me how many times 22 that's happened to you? 23 We should go back and look at my Α. 24 testimony list, right? Probably -- I don't think 25 it's in there. I think it's in my proposal. Ι

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 73 of 351

Page 130 1 - MARTI KOPACZ - VOLUME 1-2 referenced it. 3 MR. KANE: I've got some copies of it 4 if you want it. 5 BY MR. HACKNEY: 6 0. Okay. I missed that. 7 Α. Yeah. More than two, probably less 8 than five, ten. Something like that. 9 Ο. So that means that's where a Okay. 10 Court has said Ms. Kopacz is an expert and I'm going to allow her to testify on Subject X? 11 12 Α. Right. 13 And it's somewhere between two and 0. 14 five? 15 Α. That's what I'm thinking. 16 0. What were the subjects of your 17 testimony? 18 Α. Generally, it's all been insolvency 19 and restructuring oriented. So whether or not, 20 you know, an entity was solvent or insolvent. 21 Whether or not -- it's all -- I mean, my career 22 has been spent in restructuring, so it's all in 23 that context. 24 Q. A very typical restructuring expert 25 testimonies that I come across in my practice, an

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 145 1 - MARTI KOPACZ - VOLUME 1-2 the average income data for the City of Detroit, 3 correct? That's correct. 4 Α. 5 0. Okay. You relied on data that was 6 given to you by Ernst & Young? 7 That's correct. Α. 8 Q. Okay. And you haven't taken steps to 9 assess the accuracy of that data, correct? 10 Α. That's correct. 11 And with respect to the level of Q. 12 unemployment in the City, you also relied on data 13 that was given to you by Ernst & Young, correct? 14 Α. Yes. 15 Q. But you did not attempt to 16 independently verify that data --17 I'm not --Α. 18 -- correct? Ο. 19 Α. -- sure. I'm not sure what 20 independent information we had on employment -- on 21 unemployment. 22 Q. Okay. You may have. You may not 23 have. You just don't know? 24 Α. Yes. 25 Q. Is it true that unemployment in the

Page 149 1 - MARTI KOPACZ - VOLUME 1-2 "directly"? 3 Well, I've -- I worked extensively Α. 4 for the Nassau County Interim Finance Authority, which is the state control board that oversees the 5 6 finances in Nassau County here in New York. So, 7 the -- that -- that is -- again, it's not the 8 county itself. It's the control board that 9 oversees the county. 10 Understood. Okay. Q. 11 Α. Right. 12 0. Now -- so let's try and -- let's try 13 and break it down a bit. 14 You personally have never done a 15 municipal forecast, correct? 16 Α. That's correct. 17 You have worked with municipal 0. 18 forecasts in connection with your work for Nassau 19 County, correct? 20 Α. Correct, and other entities in 21 municipalities. 22 Q. Okay. That was my next question, 23 which is other than Nassau County, what 24 engagements have you had where you worked with a 25 municipal forecast understanding that you're not

Page 150 1 - MARTI KOPACZ - VOLUME 1-2 the one who created it? 3 In -- I had an engagement where I've Α. 4 been retained by seven transit authorities. 5 0. One engage meant? 6 Α. Yes, it was interesting. New York, 7 Chicago, Boston, San Francisco, Minneapolis. I'm 8 trying to think. Oh, Dallas was part of that 9 group, right. So I worked with their forecasts 10 and their budgeting and planning system. 11 Oh, I see. Ο. 12 Α. Right. 13 Q. And that was limited to just their 14 enterprise funds? I -- I -- to be honest with you, I 15 Α. 16 don't know if they were just enterprise funds or general funds, but it would have been departmental 17 18 level budgeting and projecting. 19 Q. Can I describe your work for those --20 those transit authorities as looking at their 21 operations and at the forecasts that related to 22 them and trying to understand how they could 23 improve operations in order to improve the 24 forecast? Is that a generally accurate 25 description?

Page 151 1 - MARTI KOPACZ - VOLUME 1-2 Α. It could be -- you could generally say that, but yes. 3 4 Is it fair to say that in --Q. Okay. 5 in that retention you weren't studying the accuracy of the forecasts. You were trying to 6 7 help the transit authorities improve? 8 Α. No. In that situation we were 9 dealing explicitly with the revenue side of 10 transit businesses and advertising income and, you 11 know, pricing that. 12 Q. Okay. So you were trying to understand the accuracy of the forecasts of the 13 14transit revenue? 15 Α. And the -- and the potential to 16 transit revenue. 17 Ο. I see. Okay. So it was kind of a 18 mixture of trying to understand, first, whether 19 you agreed with forecast and then, second, trying 20 to understand whether doing things like 21 advertising might improve --22 Α. It had to do with long-term No. 23 contracts for advertising revenue to those transit 24 authorities relative to the person who -- the 25 entities that had contracted with them for the

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 78 of 351

Page 152 - MARTI KOPACZ - VOLUME 1-1 2 advertising revenue. 3 Ο. Okay. So, we have NIFA, right, which 4 is the Nassau County --5 Α. Yes. 6 0. I learned all about NIFA. And then 7 we've got transit authority retention? 8 Α. We've got the transit authority. 9 Q. Any other municipal retentions where 10 you've worked with a municipal forecast? 11 Α. In the -- in the Legal Aid Society 12 case, because the vast majority of the Society's revenue comes from New York City or New York 13 14 state, okay, in terms of we worked with those municipal entities relative to our own budgets. 15 16 0. I see. So because they get money 17 from the state --18 Α. Right. 19 Q. -- you worked with --20 Α. And the City and has to be 21 appropriate and legislated, yes. 22 0. And does that mean that you worked 23 with the state and city forecasts because had you 24 to understand them in order to prepare a forecast 25 for the Legal Aid Society?

Page 153 MARTI KOPACZ - VOLUME 1-1 2 Α. We had to understand what the 3 possibility of funding was from state and the City, okay, and how the City's budget process 4 worked and how we got appropriated our monies. 5 But in that context, you were not 6 0. 7 assessing the accuracy of either the state or city 8 forecasts? 9 Α. That's correct. 10 0. Okay. And in the Nassau County 11 retention, were you assessing the accuracy of the 12 Nassau County forecast? 13 Α. Yes. 14 Okay. 0. So you were -- part of your 15 job was to evaluate the Nassau County forecast to 16 determine whether you agreed with it? 17 Α. Yes. 18 0. That's helpful. Okay. 19 What is the methodology that a 20 municipality typically employs when preparing a 21 forecast for its general fund? 22 Α. I'm not sure there's a typical. 23 0. Okay. So, I noticed in your CV that 24 you said one aspect of municipal -- I think you said, we can get it out, but it was something like 25

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 80 of 351

		Page	154
1	- MARTI KOPACZ - VOLUME 1-		
2	municipal accounting and budgeting is that there		
3	is no standard.		
4	A. Correct.		
5	Q. Do you remember saying that in your		
6	CV?		
7	A. Yes.		
- 8	Q. What did you mean by that?		
9	A. Well, there's no government		
10	accounting there's something called the		
11	Government Accounting Standards Board, okay, that		
12	would like to believe that it creates standards		
13	analogous to generally accepted accounting		
14	principles. But there is a great deal of		
15	variability in what the GASB prescribes in terms		
16	of municipal accounting procedures, right? And		
17	there is no standard for budgets. Okay? There is		
18	no accounting standard that covers budgets.		
19	Accounting covers historical recording of revenues		
20	and expenses.		
21	Q. So, you're not aware, as you sit here		
22	today, of any either government agencies or or		
23	associations that have promulgated methodologies		
24	for forecasting municipal revenues?		
25	A. There are. Okay? Either it's things		

		rage
1	- MARTI KOPACZ - VOLUME 1-	
2	like the Government Finance Officers Association.	
3	There are trade associations. There are	
4	quasi-oversight committees that panels and	
5	groups that are trying to promulgate a set of	
6	standards for municipalities in these areas, but	
7	there's nothing that is as uniform and	
8	acknowledged as we have with generally accepted	
9	accounting principles and the way that the SEC	
10	oversees that.	
11	Q. Okay. So have you reviewed the	
12	publications of the Government Finance Officers	
13	Association?	
14	A. I saw them.	
15	Q. Okay. It's fair to say that you	
16	didn't review them in connection with this case,	
17	correct?	
18	A. No, that's correct.	
19	Q. Okay. So, have you ever reviewed An	
20	Elected Officials Guide to Revenue Forecasting,	
21	which is a publication by the GFOA?	
22	A. I may have.	
23	Q. I'll show you what it looks like. It	
24	looks like this.	
25	A. I would probably have looked at it	

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 160 1 - MARTI KOPACZ - VOLUME 1-2 A. Yes. 3 Ο. You didn't perform trend analysis 4 with respect to the City's forecasts? 5 Α. That I would say we did. 6 0. Okay. That is something you would 7 say that you did do? 8 Α. Yes. 9 And did the City do that? 0. 10 Α. I believe the City did that. 11 Q. Okay. Now, have you reviewed the 12 National Advisory Council on State and Local 13 Budgeting and their publications? 14 Α. I have not. 15 Q. Do you agree that forecasting is a 16 highly subjective area? 17 Α. Yes. 18 Q. And, as such, it's subject to the 19 biases of the person doing the forecast, correct? 20 Α. Yes. And -- and -- but I would 21 qualify biases as neither good nor bad. 2.2 Understood. It's not a -- it's not Q. 23 meant to be a negative word like -- like racial 24 bias. 25 Α. Right.

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 83 of 351

Page 174 1 - MARTI KOPACZ - VOLUME 1-2 reason that you found the forecasts confusing is 3 because they were the product of actually three different groups of forecasters? 4 It's not that there are different 5 Α. 6 people involved. It is that they were never 7 harmonized and concatenated in a way that they're 8 all in one kind of place. 9 What is the experience of Mr. Kline Ο. and his team when it comes to forecasting 1011 municipal revenues? 12 Α. I don't know. 13 Q. Okay. Did you make any effort to 14 assess that? 15 Α. I did not. 16 0. Was that important to you? I looked at -- I used all the 17 Α. 18 information that was available to me and all the 19 people that were available to me and -- got 20 satisfied with the projections in the plan as 21 being reasonable revenue projections. 22 Were you working under the assumption Q. 23 that Mr. Kline and his team had substantial 24 experience forecasting municipal revenues? 25 Α. I did not make that assumption, no.

Page 175 1 MARTI KOPACZ - VOLUME 1-2 0. You hadn't thought about it one way 3 or the other? 4 Α. No, I did not make a determination 5 one way or the other. 6 Q. Okay. Did you ever meet them in 7 person? 8 Α. I did not. 9 0. You spoke to them on the phone? 10 Α. I did. 11 Q. And what was the experience of Mr. 12 Malhotra's team when it came to forecasting 13 municipal expenses? 14 Α. I don't know. 15Q. And what was the experience of the 16 Conway MacKenzie team when it came to projecting 17 the costs or revenues associated with a municipal 18 restructuring? 19 Α. I don't know. 20 Q. Now, when you were assessing the 21 reliability of the assumptions that are in the 2.2 forecasts, did you independently seek to develop 23 your own assumptions first and then compare so 24 that you could then compare them to the City's 25 assumption and see how they compared?

- MARTI KOPACZ - VOLUME 1-

2 A. No.

Q. Okay.

A. Generally not.

Q. So what you did, instead, was you
first understood what the City's assumption was
and then you tested the reasonableness of that
assumption, correct?

9

1

3

4

A. Generally that's correct, yes.

Q. Okay. Why didn't you, for example, kind of in order to avoid just, you know, the impact that even seeing their assumption can have on you, why didn't you say, What do I think wages will be year over year for the next ten years, and do the work independently and then see how it mapped?

A. Generally two reasons, time. When I was appointed I had, I think, 62 days originally between when I was appointed and when my report was due.

21 Q. Yeah.

A. Okay. Secondly, I learned very quickly the condition of the historical records of the City, and realized that in order to get done with my assignment, I was going to have to rely on

Page 177 1 - MARTI KOPACZ - VOLUME 1-2 the assimilation of data that the other 3 professionals had acquired. And that included the creditors' professionals, as well. 4 5 Being the last person at the dance, 6 so to speak, I needed to rely on not only on 7 Ernst & Young and Conway, but Alvarez and FDI --8 Q. Yeah. 9 Α. -- and Houlihan, to help get us to 10 the best data that was out there. 11 So let me see if I can summarize, the 0. 12 time that you were allotted which we discussed and which I've told you I'm of the view wasn't very 13 14 much, but it was what it was, but the time that 15 you were allotted did not allow you to either 16 independently verify the data or independently 17 generate your own assumptions? 18 Α. I -- I wouldn't go so far as to say 19 we didn't independently verify because we did, 20 specifically on the revenue projections and things 21 surrounding those, we did seek other third-party 22 sources of data. So --23 0. There were instances where you sought 24 some form of corroboration? 25 Α. Separate and apart from the City.

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 87 of 351

Page 184 1 - MARTI KOPACZ - VOLUME 1-2 generally. Right. And did you undertake a 3 Ο. Yes. 4 revenue portfolio analysis in this case? 5 Α. A revenue portfolio analysis? Don't 6 know what a revenue portfolio analysis is. 7 We looked at all the revenues that 8 were presented in the plan of adjustment 9 projections. 10 Q. So I guess can I say that to the 11 extent you undertook a revenue portfolio analysis, 12 you didn't do so consciously? 13 I wouldn't -- I don't think -- that Α. sounds like a term of art, it doesn't sound like 14 15 something that you would think about. 16 That's -- that sounds like a term of Ο. art from the world of revenue forecasting? 17 18 Α. It's somebody's -- it's somebody's 19 term of art, but it's not my term of art. 20 0. Did you make an independent Okav. 21 assessment for yourself as to whether or not the 22 City's revenue streams could be classified as 23 either predictable or unpredictable? 24 Α. I looked at each revenue stream and 25 assessed whether I thought the City's forecast or

Page 185 1 - MARTI KOPACZ - VOLUME 1-2 projection of that revenue was reasonable. 3 0. You did not otherwise attempt to 4 classify a revenue stream, correct? 5 Α. No. It wouldn't serve my purpose. 6 Ο. Okay. Do you agree as a general matter that qualitative methods are useful for 7 8 forecasting new or volatile revenues sources? 9 Α. What qualitative method? 10 Ο. Oualitative methods like the naive 11 method, expert, judgmental, trend. Any of those. 12 Α. Again, that's not the way that I 13 think about the analysis that we did of the City's 14 projections. 15 Q. Okay. Is it fair to say you never 16 took a step back from the City's approach and 17 tried to determine whether the approach should be 18 different for different revenue streams? 19 No, that's not fair to say. Α. 20 Q. That's not fair? 21 Α. No. 2.2 Did the City employ different Q. 23 approaches for different revenue streams or did it 24 employ the same approach? 25 Α. When you say "approach," right, we're

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

MARTI KOPACZ - VOLUME 1talking about, they -- each revenue stream is
forecasted on its own set of assumptions and then
they're aggregated to come up with a total revenue
projection. So income tax and the various types
of income tax are estimated differently than
wagering tax.

8 Q. How are they estimated differently? 9 A. Well, income tax looks at the change 10 in wages, it looks at the change in employment. 11 Whereas, wagering taxes looks at the change in 12 casino revenue.

Q. From my standpoint, I think of those as being different data inputs but not necessarily different approaches. But in your analysis, is it a different approach?

A. They're -- they are definitely different inputs and a different type of assumption. I don't know whether that's a different approach or different methodology, whatever -- right -- whatever you say is they have different inputs.

Q. I guess, you are an educated woman and very experienced, I mean -- let me -- let me quibble with you a little bit and say you have

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 90 of 351

Page 187 1 - MARTI KOPACZ - VOLUME 1-2 heard the term methodology before, right? 3 Α. Uh-huh. Yes. 4 Ο. And you understand that that 5 different methodologies can all employ 6 assumptions, right? 7 I would agree, yes. Α. 8 0. And so do you understand the 9 difference between testing the assumptions that go 10 into a methodology from the idea of testing the 11 propriety of the methodology itself? 12 Do you understand that distinction, 13 right? 14 Α. I understand the distinction you're 15 making right now, yes. 16 You did not attempt to determine or Ο. critique the methodology the City employed, 17 18 instead, you focused on the assumptions that the 19 City adopted, correct? 20 Α. Yes and no. 21 0. Okay. 2.2 Α. Okay. Methodology in terms of what 23 we evaluated was the approach used by E & Y and 24 Conway. Okay? Methodology is a term, to me, that 25 is lower case, there's not a capital methodology,

1	- MARTI KOPACZ - VOLUME 1-
2	it's not a proper noun. Okay? It is a word that
3	describes how something is done. Okay? Depending
4	on what particularly on the cost side, what
5	costs were being estimated for the projections,
6	there were multiple methodologies used. Okay?
7	What was important to me was to
8	assess the outcome of that estimate and whether or
9	not that was reasonable. So, looking at the
10	assumptions, looking at the input, looking at how
11	those were mathematically manipulated and what the
12	output was and assessing whether or not that was
13	reasonable, is the approach that I used to fulfill
14	my responsibilities as part of this this
15	appointment.
16	Q. So let me give you an example, see if
17	we can kind of refine our conversation a little
18	bit. Take a single revenue stream like property
19	tax revenue.
20	A. Okay.
21	Q. Okay. Do you understand that you can
22	look at historical evidence of property tax
23	revenue collections and then apply just individual
24	judgment to the different components of it in
25	order to forecast property revenue into the

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 189 1 - MARTI KOPACZ - VOLUME 1-2 future? 3 Α. I agree with that, yes. 4 Q. That's a possible approach? 5 Α. Yes. 6 Ο. Correct? 7 Α. Uh-huh. 8 0. But separately, you can use a 9 statistical method like a time series forecast in 10 order to forecast future property revenues, 11 correct? 12 Α. You could, yes. 13 Ο. Let's describe those for purposes of my question as two different methodologies, okay? 14 15 Α. Okay. 16 0. You never attempted to look at the 17 City's approach to any of the revenue streams and 18 say, they are using the wrong methodology, 19 correct? 20 Α. That's correct. 21 0. Now, within their methodology, what 22 you did do is you looked at the assumptions that went into the methodology the City adopted and 23 24 determined the reasonableness of those 25 assumptions, correct?

Page 190 1 - MARTI KOPACZ - VOLUME 1-2 Α. That's correct. Okay. And I take it as a corollary 3 0. 4 of that, you don't have an opinion as to whether 5 the City utilized the correct methodology, not 6 assumptions, in forecasting the revenue that it 7 forecasted, correct? 8 Α. I accepted the methodology, whatever 9 that may be, that the City used and evaluated the 10 result of that methodology, plus the inputs and 11 the assumptions. 12 0. Okay. You did not attempt to 13 critique whether they employed the correct 14 methodology, correct? 15 Α. I don't know that there is a correct 16 methodology, so --17 Q. Okay. 18 Α. -- the answer is I don't know. 19 Q. So, you don't know if there is one so 20 you couldn't have critiqued it, right? 21 Α. I think that's correct. 2.2 Q. Okay. Now, have you -- you know that 23 the City's forecasts in one form or another, they 24 go back to the prefiling period 2013, correct? 25 Α. In terms of their preparation?

		Page	222
1	- MARTI KOPACZ - VOLUME 1-		
2	see a material risk that the City will fail to		
3	live up to the plan's forecasts, correct?		
4	A. Again, I don't the City can meet		
5	its obligation I believe the City can meet its		
6	obligations in the plan of arrangement and deliver		
7	services, okay, within the confines of the		
8	projections.		
9	I don't believe for a minute that the		
10	projections will come in exactly as they've been		
11	forecast.		
12	Q. I understand. But in the aggregate,		
13	you would not have rendered your opinion if you		
14	believed a material risk of failure existed,		
15	correct?		
16	A. That is correct.		
17	Q. When it comes to evaluating the		
18	City's obligations, the ability to meet its		
19	obligation, Ms. Kopacz, in order to get your seal		
20	of approval, would you agree that you needed		
21	really to confirm that the actual results would		
22	not turn out to be materially worse than the		
23	forecasted results; that's what you're assessing,		
24	right?		
25	A. I'm not assessing future actuals. I		

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 235 1 - MARTI KOPACZ - VOLUME 1-2 Q. Uh-huh. 3 Α. Okay? And the average are, in fact, the numbers that you recited in the beginning of 4 5 this section --6 0. Right. 7 Α. -- 0.85, but it shows, if you will, a -- for each of the types of income tax, 8 9 resident, nonresident and corporation, it makes 10 individual assumptions for each year. 11 0. Correct. 12 Α. Okay? So there's -- there's a lot 13 that goes into that. 14 0. Okay. 15 Α. Okay? To get to that average. 16 Q. But in terms of historical data that 17 you used to judge reasonableness --18 Α. Right. 19 -- did you rely on any historical 0. 20 data of taxable income other than fiscal years 21 2011 to '13? 22 Did we -- I'm -- I'm pretty confident Α. 23 that we looked at a much longer time frame on 24 taxable income revenues. 25 Historical? Ο.

Page 236 1 - MARTI KOPACZ - VOLUME 1-2 Α. Historical. 3 Ο. You believe that you did? Because if there was a down and 4 Α. 5 there's then beginning to tick up now. 6 Q. Okay. So do you know what the 7 ten-year historical taxable income was in the City? 8 9 Α. Not off the top of my head. 10 0. Now, what you present here is that 11 residents' taxable income growth averaged 12 3.4 percent for that three-year period, correct? 13 Α. Right, right. 14 And that is -- that's more than 0. 15 quadruple the assumed average, right? 16 Α. It is the estimate for fiscal '14/'15 17 is about half of that rate. Okay? 18 Right. So --Q. 19 Α. But mathematically, the ten-year 20 average, right, is, what, a third of what it's 21 been the last couple of years or more? 22 0. Does it make sense to you that the 23 City's residents' taxable income growth tails off 24 substantially after the first two years? 25 Α. It does in the sense that I think

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

1	- MARTI KOPACZ - VOLUME 1-
2	the the assumption is based on the recovery in
3	income from the recession in '08 and '09, and even
4	before that, the the deterioration in the
5	economy in Southeast Michigan as a result of the
6	automotive thing. So there's a period now where
7	incomes are coming back up and but to assume
8	that that trajectory continues for ten years would
9	be an aggressive assumption.
10	Q. So, is it that 2011, 2012 and 2013,
11	because they come on the heels of the recession,
12	are not representative
13	A. As a percentage.
14	Q years when it comes to projecting
15	future income growth?
16	A. That would be I believe that's the
17	assumptions that Ernst & Young made in this, and I
18	would conclude that it was that's a reasonable
19	assumption to make, that you're not going to
20	continue that high rate of increases ad infinitum.
21	Q. Take sorry. Take a look at fiscal
22	year 2016 for residents. The projected taxable
23	income growth is .46 percent, right?
24	A. Correct.
25	Q. That's about one-ninth of the

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 98 of 351

Page 238 1 - MARTI KOPACZ - VOLUME 1-2 three-year trailing average, correct? 3 I don't know what the -- the -- I'd Α. have to do that math, but it's a half percent 4 5 versus 3 1/2, right? 6 Ο. Right. What's the basis for your 7 conclusion that that's a reasonable assumption for 8 fiscal year 2016? 9 Α. As -- as I said, I think it is --10 it's appropriate, it's reasonable. It's 11 reasonably conservative to make the assumption 12 that at some point the percentage of growth will 13 begin to flatten out in terms of income growth. 14Ο. Understood that that's your general 15 opinion, but how do you specifically arrive at 16 .46 percent? 17 Α. I did not. 18 0. I understand. 19 Α. This is -- right. This is what -- I 20 looked at this and said, you know, does that look 21 reasonable in the context of everything we know, 22 and -- and I concluded that I am not -- that that 23 assumption is reasonable in the context of trying 24 to project income tax over the next ten years for 25 the City.

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

1	- MARTI KOPACZ - VOLUME 1-		
2	this these projections.		
3	Q. Understood.		
4	A. And I didn't you know, again		
5	Q. You didn't did you not consider		
6	whether any individual assumption was reasonable		
7	standing by itself? You only considered them in		
8	the aggregate?		
9	A. I looked at all of the individual		
10	assumptions.		
11	Q. You did?		
12	A. I did. Okay?		
13	Q. Okay. So let's talk about this one.		
14	A. Right.		
15	Q. What's your basis for your opinion		
16	that 1.25 percent appears reasonable?		
17	A. This it is reasonable because it		
18	is not either too low or too high when you look at		
19	all the surrounding data points.		
20	Q. What are those data points?		
21	A. It is the prior experience in terms		
22	of what's been collected over time, all that,		
23	right? It's looking at information that comes		
24	from the state.		
25	Q. Okay.		

Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 102 of 351

1 - MARTI KOPACZ - VOLUME 1-2 Α. I know we looked at some federal 3 estimates, right? 4 0. So what was the prior experience with 5 income with average wage growth? 6 Α. I would have to go back and look at 7 the historical information that we looked at at 8 the time to be able to answer that today because I 9 don't recall. 10 But do you have like workpapers that 0. 11 show that? 12 Α. There would be documents that we looked at that showed that. I'm sure. 13 14 0. Okay. And they'll be -- they'll be 15 somewhere on Exhibit 2? 16 Α. Tell be somewhere on Exhibit 2 or 17 they'll be somewhere in the -- in the data room. 18 Q. Okay. And what did they show? You can't remember the specifics, but what time period 19 20 did they show? 21 Α. I can't remember. I remember that 22 income taxes went down and income taxes have 23 started to grow back. 24 Q. Okay. Was it aggregate income tax 25 data that you reviewed?

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 103 of 351

Page 256 1 - MARTI KOPACZ - VOLUME 1-2 Α. I don't recall. 3 0. Do you remember when we were looking 4 at taxable income growth you had some historical comparisons that you showed here in your text, 5 6 right? 7 Α. That's correct. 8 0. But here you didn't present any, 9 correct, in the body of your report? 10 Α. There are other data points shown on 11 Page 47. 12 Aren't those forecasted data points? Q. 13 Α. They are forecasted data points. 14Okay. Did you rely on any Q. 15 historical -- so is -- are these the data points 16 that you relied upon these forecasts? 17 Α. These are forecasts made by other 18 forecasting entities that we looked at to analyze 19 and assess the forecasts for wage growth and on 20 Page 48 for employment growth that the City used. 21 Ο. Okay. So, for example, in the 22 ten-year without reinvestment scenario, do you see 23 that box on Page 47? 24 Α. Yes. 25 First of all, was your basis for Q.

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

13-53846-swr Doc 7117 Filed 08/27/14 Entered 08/27/14 18:49:26 Page 104 of 351

Page 257 1 - MARTI KOPACZ - VOLUME 1-2 analyzing this assumption -- and by "this 3 assumption," I mean the 1.25 percent assumption. 4 Α. Right. Without reinvestment. 5 Ο. Was it the -- was it these forecasted 6 data points from other entities? 7 Α. I'm sorry. Repeat that question, 8 please. 9 Ο. Let me turn it around. Α. 10 Yes. 11 0. Did you rely on any historical 12 information relating to wage growth in reaching 13 your opinion that 1.25 percent was reasonable? 14 Α. I consider -- I am sure that we 15 considered historical information in looking at 16 the totality of these assumptions, okay? 17 So it's part of the basis for your Ο. 18 opinion that it's reasonable is the historical 19 data relating to wage growth for residents and 20 nonresidents, correct? 21 There is -- there is some relevance Α. 22 to historical data relative to these current 23 estimates, okay? 24 The -- without reinvestment 25 assumptions, okay, are not particularly meaningful

- MARTI KOPACZ - VOLUME 1-1 2 to me because I believe the City is going to make 3 reinvestment decisions, okay? 4 So, I mean we -- we analyzed this or 5 we laid out in our report the way the City had 6 laid it out, okay? As a practical matter, the --7 what I think is relevant is the ten-year plan with the reinvestment. 8 9 Q. Okay. So is it fair to say that you 10 not focus as hard on the ten-year plan without 11 reinvestment as you did the ten-year plan with 12 reinvestment? 13 Α. That is correct. 14 0. Okay. Do you know what? Let's talk 15 about -- well, let's just first note that the --16 do you -- I'm sorry if I reasked this. I don't 17 mean to. The -- do you see that on Page 47 you 18 19 produced comparable metrics from the Michigan 20 Department of Treasury, the Michigan Senate Fiscal 21 Agency and the CBO, which means the Congressional 22 Budget Office? 23 Α. The Congressional Budget Office, 24 right. 25 Q. Do you know whether their metrics are

Page 265 1 - MARTI KOPACZ - VOLUME 1-2 were? 3 Α. I am not seeing that here. 4 0. Do you know separate and apart from 5 the presentation here? 6 Α. I don't. 7 0. Let's go down to employ -- sorry. Let's go down to Employment Growth. Do you see 8 that the number of city residents that are 9 10 employed is forecasted to increase .15 percent? Can you tell me where we are? 11 Α. 12 Q. It's on Page 46 right down Yes. 13 below "Employment Growth with RRIs. It's in the 14 prose section, the number of city residents 15employees forecasted to increase .15 percent. Do 16 you see that? 17 Α. Over a ten-year period, yeah. For the fiscal year period. 18 Q. Yes. 19 While the nonresidents' average 20 annual employment is anticipated to increase 21 .21 percent. Do you see that? 22 Α. Yes. 23 Q. Now, in -- this is one of those 24 sections in your report where you are just 25 narrating what the assumptions are, correct?

> Elisa Dreier Reporting Corp. (212) 557-5558 950 Third Avenue, New York, NY 10022

Page 266 1 - MARTI KOPACZ - VOLUME 1-2 Α. That is correct. 3 Ο. You did not make a finding in your report that these two assumptions were reasonable 4 5 specifically, correct? 6 Α. Correct. 7 0. Do you -- did you make a specific 8 finding that these two assumptions were 9 reasonable? 10 I did not. Α. 11 Ο. Is it -- am I correct in reading your 12 report that if there is a section that describes -- like this one, that describes what 13 14 the City's assumptions are, but does not include 15 your specific seal of approval as to finding that 16 the specific assumption being discussed, that I 17 should infer that you did not make a specific 18 finding about that assumption? 19 Α. I did not make a specific finding 20 about 2.16 or any of that sort of thing. What I 21 did is, as I said before, I looked at all the 2.2 information that was available to us, historical, 23 projections, talked with people who did this, 24 looked at other people who make projections about 25 these things. I did the sensitivity analysis that

1	- MARTI KOPACZ - VOLUME 1-
2	said what if they're off by a percentage point one
3	way or another, what does that do? Okay? And in
4	totality of looking at all of that stuff, I
5	concluded that this is a reasonable assumption
6	for, in this case, municipal income tax.
7	Q. Well, wait. I would rephrase that
8	and see if you agree with how I rephrase it.
9	You included that in the aggregate
10	all of the assumptions were reasonable, correct?
11	A. Correct.
12	Q. You did not make a specific finding
13	or conclusion about whether this assumption on
14	Page 46 regarding employment growth was
15	reasonable, correct?
16	A. That is correct. I looked at a
17	what-if scenario, the the estimate was off.
18	Now, how if if that estimate is off, right,
19	by some amount, does that have a what kind of
20	an impact does that have on the overall projection
21	for income tax?
22	Q. Okay. So speaking to your expertise
23	in terms of what your training and experience
24	renders you capable of doing, you are capable of
25	assessing whether or not a forecasted increase of

Page 273 1 - MARTI KOPACZ - VOLUME 1-2 RRIs was lower than with RRIs, correct? 3 Α. That's correct. 4 0. Okav. With respect to the population 5 assumptions in the forecasts, is it correct that 6 the ten-year projections assume that there will be 7 a 12.3 percent decline in Detroit's population 8 over the next ten years? 9 Α. That is the SEMCOG estimate and 10 that's what the City used. 11 So the City relied on SEMCOG, Ο. 12 correct? 13 Α. Correct. 14 Do you -- you did not make a specific Q. 15 finding in this section as to whether that population assumption was a reasonable one. 16 Do 17 you agree? 18 Α. I accepted that as a given. 19 Ο. Okay. You accepted it as a given. 20 You did not otherwise test its reasonableness, 21 correct? 22 Α. I did not. 23 Q. Okay. Do you know -- have you read 24 SEMCOG's report? 25 Α. I did not personally read it.

Page 379 1 - MARTI KOPACZ - VOLUME 1-2 Α. At some time prior to this, okay, my 3 team's relationships with Ernst & Young and Conway 4 got frayed okay? And there were, this was 5 basically all of the parties being called to 6 chambers to be instructed to play nicely in the 7 sand box. 8 0. So did Judge Rosen initiate this 9 meeting? 10 Α. Judge Rosen initiated this meeting. 11 Ο. So he called you and said I want to 12 clear the air? 13 Yes, you're not playing we will Α. 14 continue sand box with the other children. 15 He said that to you? 0. 16 Α. Yes generally that's, that's he 17 didn't, he didn't use those words but it was like 18 we need to have a conversation now. By the time 19 we get to this meeting of which there was already 20 this kind of dinner party plan, that same with Mr. 21 Ravitch --22 Ο. There was already the plan for the 23 dinner party? 24 This was, actually, that night was to Α. 25 be this group and E & Y and Conway didn't

2	participate in the dinner. But that was to be the	
3	dinner in which I was going to and Mr. Ravitch	
4	were meeting with Dan Gilbert. All right. He	
5	canceled last minute. So we all went anyway.	
6	But, yes, it was that was that	
7	was the way that I got on his calendar was for the	
8	Blustein's to throw a dinner party.	
9	Q. So what happened at the meeting that	
10	was called because there was whatever, tempers	
11	were flaring or whatever?	
12	A. Yes. By the time we got to the	
13	meeting, we had already worked out our issues and	
14	our differences.	
15	Q. And so everyone was kind of like,	
16	we're good?	
17	A. We're good. And we talked at that	
18	point in time we talked a lot about where my	
19	thinking was on the feasibility standard.	
20	Q. In this meeting with Judge Rosen?	
21	A. Uh-huh.	
22	Q. What did Judge Rosen say during this	
23	meeting?	
24	A. I'm not sure that Judge Rosen said a	
25	whole lot. It was mostly a dialogue with Jones

2	Q. In reviewing the transcript from	2	Q. And you didn't do anything to analyze
3	yesterday, I believe Mr. Stewart asked you at the	3	whether DWSD would have the financial capability
4	start if you had any misgivings or any conclusions	4	to make the payments; you just relied on the
5		4 5	
6	that you weren't confident about in your report.	5	assumption they could make the payments?
	Given the past day and a half of		A. Yes.
7	questioning, do you have anything?	7	Q. And you and because you didn't
8	A. I'm still no, I'm still really	8	review any DWSD financial projections, you have no
9	comfortable with what we did, given the scope of	9	opinion as to whether any financial projections
10	our assignment, given the best information	10	are reasonable; isn't that right?
11	available. And I really haven't changed any of my	11	A. That's correct.
12	thoughts in the last day and a half.	12	Q. And you have no opinion as to whether
13	MR. WAGNER: Very good. I have no	13	or not DWSD is viable after confirmation of the
14	further questions. I yield to others.	14	plan, do you?
15	MR. BRILLIANT: I'm not going to have	15	A. Like I said, I don't have any
16	very much time. Do you want to take a	16	perspective or point of view on DWSD.
17	few-minute break and we'll switch seats.	17	Q. Okay. So when you say in your report
18	THE VIDEOGRAPHER: The time is	18	that the plan is feasible, you mean this the plan
19	11:16 a.m. We're going off the record.	19	as relates to the general fund is feasible based
20	(Whereupon, there was a brief recess	20	on the assumptions contained in your report, but
21	in the proceedings.)	21	you have no opinion as to whether the DWSD portion
22	THE VIDEOGRAPHER: The time is	22	of the plan is feasibility; is that correct?
23	11:26 a.m. We're back on the record.	23	A. That's correct.
24		24	Q. Mr. Neal had asked you about
25	EXAMINATION BY MR. BRILLIANT:	25	conversations that you had with respect to

<u>Exhibit B</u>

UNITED STATES BANKRUPTCY COURT EASTERN DISTRICT OF MICHIGAN SOUTHERN DIVISION

In re: City of Detroit, Michigan, Debtor, Chapter 9 Case No. 13-53846 Hon. Steven W. Rhodes

_____/

EXPERT REPORT OF MARTHA E.M. KOPACZ REGARDING THE FEASIBILITY OF THE CITY OF DETROIT PLAN OF <u>ADJUSTMENT</u>

On April 22, 2014, Judge Rhodes entered an Order¹ appointing me as the Court's expert witness. Pursuant to that Order, "(t)he Court's expert shall investigate and a reach a conclusion on:

- (a) Whether the City's plan is feasible as required by 11 U.S.C. § 943(b)(7);and
- (b) Whether the assumptions that underlie the City's cash flow projections and forecasts regarding its revenues, expenses and plan payments are reasonable."

I am providing this Report under Fed. R. Evid. 706(a). Should additional information become available, I reserve the right to amend or supplement this Report.

¹ Docket #4215, Order Appointing Expert Witness

Section A – Introduction, Scope and Approach

Introduction

I am a Senior Managing Director with Phoenix Management Services, LLC ("Phoenix"), Boston, MA and my *curriculum vitae* is attached as Exhibit 1. I have been assisted throughout this engagement by my colleagues from Phoenix. My billing rate is \$595 per hour and the billing rates of my colleagues range from \$100 per hour to \$550 per hour. As a courtesy, we are reducing our rates by 10% in this case. I have testified previously as noted in my proposal.²

Scope and Approach

The scope of my engagement is limited to providing an opinion *only* as to feasibility of the Plan of Adjustment ("POA" or "Plan") of the City of Detroit ("Detroit" or the "City"). My engagement does not include providing an opinion regarding the best interest of creditors. There is little applicable case law related to what constitutes feasibility in a chapter 9 proceeding and even less guidance on my

² Docket #4068, Notice Regarding Interviews of Expert Witness Applicants, pages 266-267

role as the Court's independent expert. As such, I developed an approach for this assignment based upon my professional experience and taking into account the facts and circumstances of this matter that I believed to be most relevant. In large measure, I and my team, ("we") have followed the outline contained in my proposal, which is included below.³

- Understand the framework and methodology used to prepare the Ten-Year Plan including reliance on historical information
 - Conduct interviews of key personnel and financial advisors
 - Review documentation used to develop the forecasts
 - Review other third party information to independently verify assumptions
- Perform a detailed analysis of the Plan's financial and cash flow forecasts to determine baseline and critical assumptions
- Critique and analyze critical assumptions those that have significant dollar and/or timing impact and, if not achieved, could decrease cash flow significantly
 - Revenue and/or cash receipts
 - Cost cutting initiatives
 - o Reinvestment initiatives and capital spending
 - Interest rate variations
 - Provisions for contingencies
- Evaluate the execution risks associated with the Ten-Year Plan
 - Availability of financial and human capital
 - Reasonableness of timing assumptions
 - Reasonableness of dollar impact (cost or benefit)
 - Adequacy of contingencies
- Perform sensitivity analysis related to the forecast and critical assumptions, as appropriate, to better assess the achievability of the projections
- Form an opinion as to the feasibility of the Ten-Year Plan, as presented

³Docket #4068, Notice Regarding Interviews of Expert Witness Applicants, pages 256-257

• Prepare a written report supporting the opinion including additional information that facilitates communication and understanding by stakeholders of the likelihood of Plan success and the potential risks associated with Plan execution

We began with stakeholder interviews amongst the groups listed below. The

"Contact Log" as directed in Judge Rhodes' Order, is included as Exhibit 3. This

fact- and perception-gathering phase was important to understanding the current

situation with the City, the status of bankruptcy case and how the City was

approaching its restructuring.

- City of Detroit elected and appointed officials (including the Mayor, City Council President, Chief Financial Officer, Chief of Police and department heads)
- Emergency Manager
- City employees
- City of Detroit retained advisors
 - o Jones Day
 - o Ernst & Young
 - o Conway MacKenzie
 - Miller Buckfire & Co.
- City's retirement systems (PFRS and GRS) and their advisors
- City's public safety labor unions and their advisors
- Creditor constituencies and their advisors
- Detroit Land Bank Authority
- Detroit Institute of Art and their advisors
- Charitable foundations and City benefactors

We then approached the analytical phase, which was iterative. We reviewed

and analyzed documents relevant to the City's Plan and the financial projections.

We reviewed other City data and third party information to provide background and

perspective on the Ten Year ("10 Yr") and Forty Year ("40 Yr") projections and the Restructuring and Reinvestment Initiatives ("RRIs"). We asked more questions of the City, its advisors and other stakeholders, requested more information, and analyzed that information. This process was repeated as necessary until our questions were answered. Some general categories of data, documents and information we reviewed and analyzed are identified below. A more complete listing is included in Exhibit 2.

- Court Documents POA, Disclosure Statement, City Motions and Creditors' Objections, Eligibility Opinion, Court Orders, Court Docket
- May 5, 2014 and July 2, 2014 10 Yr projections, 40 Yr projections and RRIs, including working models
- Third Party Reports
 - Detroit Blight Removal Task Force Plan
 - o Detroit Future City Strategic Framework Plan
 - Consulting reports McKinsey
 - State and various task force reports on Detroit's financial condition
 - Various federal, state and regional government reports

We critiqued the methodology used to develop the financial projections, as well as the data and information used as the foundation for the assumptions. An explanation of these models is contained in Part II, Section E. We identified the assumptions used to create the June 2013 Baseline Projections and the assumptions that formed the 40 Yr projections. We identified and analyzed the assumptions contained in the RRIs and tested both projections (May 5th and July 2nd) for mathematical integrity.

My assessment focused primarily on operations that are accounted for in the City's General Fund. In addition to the City's General Fund activities, the City has numerous operations that are accounted for in Enterprise Funds. Only Enterprise Funds that have an impact on the City's General Fund were evaluated to determine their impact on the feasibility. ⁴

The Report

This Report is comprised of four parts. Part I includes my opinion and the building blocks I used to formulate that opinion. This includes background and contextual information that underpin my assessment as well as the definition I and my team formulated for "feasibility" which establishes the framework for my opinion. Part I includes Sections A through D.

Part II is comprised of Sections E through H and provides insight into the quantitative factors that impact my feasibility assessment. Part III consists of

⁴For example the Detroit Department of Transportation (DDOT) operates primarily as an Enterprise Fund but receives a significant subsidy from the General Fund to fund negative cash flow in the Enterprise Fund; therefore, the failure of DDOT to achieve its plans directly impacts the City General Fund.

Sections I through O and include those issues that affect feasibility in a qualitative manner. Part IV contains the Conclusion. A Table of Contents follows.

Section B – Statement of Expert's Opinion

On April 22, 2014, Judge Rhodes entered an Order⁵ appointing me as the Court's expert witness. Pursuant to that order, "(t)he Court's expert shall investigate and a reach a conclusion on:

- (c) Whether the City's plan is feasible as required by 11 U.S.C. § 943(b)(7); and
- (d) Whether the assumptions that underlie the City's cash flow projections and forecasts regarding its revenues, expenses and plan payments are reasonable."

This Report contains my expert opinion and the basis for that opinion. I was assisted by my colleagues at Phoenix Management Services LLC. My work has been guided by the approach that was outlined in my proposal⁶ and discussed during

⁵ Docket # 4215, Order Appointing Expert Witness

⁶ Docket # 4068, Notice Regarding Interviews of Expert Witness Applicants, pages 256 and 257

my interview on April 18, 2014⁷. I, and members of my team, have conducted more than two hundred interviews and fact gathering meetings with persons involved in this matter or with persons I believed to be helpful to me in forming my opinion.

Based on this work, I conclude that:

- (a) The City's plan is feasible as required by 11 U.S. C. § 943(b)(7); and
- (b) The assumptions that underlie the City's plan of adjustment projections regarding its revenues, expenses and plan payments are reasonable.

It should be noted that this opinion is rendered in an environment where there are many factors that will have influence on the City's conditions post confirmation that are unknown and unknowable. Throughout this Report, I have noted some of these factors, while other factors may not even be recognized today as potentially having an impact. My opinion is necessarily limited by these unknown factors. It should be recognized, that these factors, when known, could have a material impact on my view of feasibility.

The above statement should only be viewed in the context of this entire Report. No reliance should be made on these statements outside of the context of this Report.

⁷ Transcript of Hearing, April 18, 2014

The remainder of this Report will provide my definition of feasibility, the context in which I am rendering my opinion and my assessment of the key factors affecting my feasibility assessment. While my opinion is arguably very narrowly limited to "feasibility", the assessment I and my team did to arrive at my opinion is multifaceted. This Report attempts to clearly and succinctly lay out the foundation, framework and details supporting my opinion.

The following section, Section C, addresses my definition of feasibility and relies upon numerous resources - legal and otherwise - and my own experience to establish the benchmarks against which I assessed feasibility. Section D discusses the context in which I am rendering my opinion. While there are common experiences among every restructuring and even among municipalities, the unique mix that is Detroit and this chapter 9 proceeding, necessarily impact my perspective and opinion. My intent is not to rehash every issue or pleading that has occurred in this case or even Detroit's recent history, but rather, to highlight a few aspects of the facts and circumstances of this case which have had an important impact on the formulation of my opinion. The last sections of the Report provide a more in depth review of the issues, quantitative and qualitative, I found particularly relevant to my assessment of feasibility. By no means does this Report include every factor I reviewed or considered but does include those issues that shaped my opinion to the greatest extent.

Section C – Feasibility Definition

Defining a Feasibility Standard

Section 943(b)(7) of the Bankruptcy Code requires that before a plan of adjustment may be confirmed the Court must determine that the plan is feasible. However, the Bankruptcy Code does not define "feasible." Few chapter 9 cases address the feasibility requirement⁸ and there is little in the way of authoritative writing published regarding feasibility. ⁹

In assessing feasibility, I have examined available legal authority and consulted with counsel and other experienced professionals to assist in the formation of an appropriate approach to determining feasibility of the City's POA. Every

⁸ In re *Mount Carbon Metropolitan District*, 242 B.R. 18, 31 (Bankr. D. Colo. 1999) ("The Code does not define feasibility in Chapter 9 nor does it specify what factors the Court should consider in determining whether the Plan is feasible. Due to the relative rarity of Chapter 9 cases, neither the parties nor the Court have found case law specifically addressing the issue.")

⁹ Pryor, Scott C., <u>Who Bears the Cost? The Necessity of Taxpayer Participation in</u> <u>Chapter 9</u>, (June 11, 2014) Available at SSRN, http://ssrn.com/abstract=2448997. The author referring to feasibility: "(w)hat is merely unclear in chapter 11 is an impenetrable fog in chapter 9."

restructuring professional, with some degree of experience, probably believes they understand what feasibility is and what it is not. However, in my early discussions with professionals in this case, my own research, and consultations with professionals not involved in the Detroit matter, I found a variety of nuanced points of view regarding a definition of feasibility. Therefore, while it will ultimately be up to the Court to articulate the precise legal parameters of feasibility in this Case, I, along with the Phoenix team, have developed the following feasibility definition (the "Standard"), which I believe is crucial to serving the Court's purpose for my appointment:

> 'Is it likely that the City of Detroit, after the confirmation of the Plan of Adjustment, will be able to sustainably provide basic municipal services to the citizens of Detroit and to meet the obligations contemplated in the Plan without the significant probability of a default?'

Two Dimensions of the Standard

While I believe that there are certain imposed limitations on feasibility within this Standard, I have taken a relatively structured approach to my view of what is included in feasibility. The Standard includes both quantitative and qualitative components:

Quantitative

- Are the projections contained in the POA mathematically correct and materially reasonable?
- Are the assumptions that the City has used to develop its projections individually, and when taken as a group, reasonable?
- Is there an adequate contingency included in the projections?

Qualitative

- Does the City have the human resources, or can it likely recruit the human resources, required to meet its obligations under the POA?
- Does the City have the appropriate systems and procedures to monitor its financial performance and to provide early warning signs of variances in performance that might cause the City to fall short of the projections and be unable to meet its obligations under the POA?
- Are there appropriate structures to ensure the City's compliance with the POA and with reasonable government standards of operation?
- Will the City be able to reasonably deliver a minimum level of municipal services?
- Is the City's trajectory sustainable?

The quantitative assessment of feasibility is straightforward but exacting. As

will be more fully discussed in Part II, the projections¹⁰ in the POA are (correctly

¹⁰ For purposes of this Report, "projections in the Plan" are inclusive of the 10 Yr plan, the 40 Yr plan and the RRIs. If only one of these is discussed, it will be noted. The term "forecast" is often used as a synonym for "projections". While this is not technically correct within accounting literature, the terms will be used interchangeably in this Report to provide variety. The term "model" is used in this Report to describe the one or more excel spreadsheets that together form a financial projection. A "values only model" or "flat model" is essentially a printout of the excel spreadsheets, although it may be provided in electronic format rather than in hard copy. A "working model" contains all the cell references, formulas and

so) quite detailed in many areas. Financial modeling is a highly subjective undertaking that is affected by the assumptions made and the professional biases of the analyst developing the model. Financial modeling is both a science and an art. When the analyst forecasts growing revenue, declining costs, or a change in headcount, he or she has a number of ways to write the mathematical formulas which arrive at the intended numbers. In this case, the POA projections are comprised of multiple forecasts, inclusive of hundreds of individual spreadsheets, prepared by many different individuals and then concatenated into what we all simply call the "projections"¹¹. Simple questions, such as "are the salaries used to determine the cost of newly hired employees reasonable?" become detailed. For example, the salary estimates are multifaceted depending on which model and which analyst did the modeling and appear in many of the RRI projections. Because of this, the

[&]quot;macro" commands that are within the spreadsheets and allows a reviewer of the model to understand what the inputs and assumptions are that create the projections. It is in the working model that a reviewer can understand the "art" of the analyst's modeling.

¹¹ Expert Report of Charles M. Moore, CPA, CTP, CFF in re City of Detroit, Michigan. In footnote 2, Mr. Moore provides a similar explanation of modeling methodology: "Given the number and diversity of the departments my team and I examined, the specific methodology utilized was not exactly the same for each department. Notwithstanding any particular deviations that were necessary, this core methodology and approach was generally utilized across our analysis and development of the Reinvestment Initiatives." This is an example of differences that can occur within a model built by the same firm. There were also differences in modeling approach used by Conway MacKenzie, Mr. Moore's firm, and Ernst & Young, the City's other financial advisor.

quantitative assessment of "reasonableness" surrounding the individual assumptions, and assumptions taken as a group, of the POA projections was more involved than I would have expected.

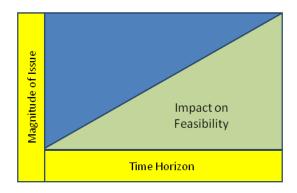

The qualitative aspects of the Standard include what I have come to refer to, as "skill and will" and are as important as the quantitative assessment. Qualitative aspects also include external influences that can affect the implementation of the Plan. Part III, Section K – Leadership and Human Capital, discusses the City's need for more highly skilled employees. Another qualitative issue is the upcoming transition from the leadership of the Emergency Manager to the leadership of Mayor Duggan and his administration. When that transition occurs, there will be little more than three years remaining within which the current elected officials will have the responsibility to operate the City consistent with the POA – therefore political 'will' must be passed to future elected officials. This is not a problem limited to Detroit, but to all municipal proceedings. Section M – Post-Confirmation Oversight discusses ways to mitigate this variable.

The Aspect of Time on the Standard

A municipal government is an entity designed to exist in perpetuity. Therefore, as we considered feasibility there is a requirement to determine the timeframe for the feasibility assessment. As we developed the feasibility Standard, we considered the following questions:

- Given the electoral system and the requirement for strong leadership, do we limit the timeframe to the next election cycle?
- Is there some other timeframe at which feasibility stops? For example, if after 5 years, visibility into the operations of the City becomes more opaque, do we only consider the first 5 years?
- Do we consider the timeframe over which financial commitments are made in the POA? That is, do we look at the restructured pension obligations of the retirees and current employees and attempt to determine whether the POA is feasible during their entire lifetimes?

Ultimately, we based our Standard on an indeterminate time period. However, I believe that the issues of feasibility must be viewed both in terms of their quantitative or qualitative impact <u>and</u> the time horizon over which the impacts may occur. That is, as the time horizon expands, so too does the magnitude required for an issue to impact feasibility. For example, a potential \$50 million shortfall in year 1 will have a much more significant impact on the assessment of feasibility than the same shortfall in year 20.

The Standard Allows for a Range of Values

An additional aspect to my definition of feasibility is the concept that the reasonableness of the quantitative and qualitative components of the Standard can be a range of values. When looking at the reasonableness of assumptions and projections, most people understand that "reasonable" can exist along a continuum. Projections can be reasonable and favor the views of the debtor <u>and</u> projections can be reasonable and favor the views of creditors. Of course, at the outer edges of "reasonable", values become unreasonable, either because they are exceptionally conservative or wildly aggressive. We have evaluated the assumptions imbedded with the financial forecasts within this continuum of reasonableness.

Detroit differs from a company emerging from chapter 11 in that the City does not have to be service delivery solvent to emerge from bankruptcy. It will be on a trajectory towards service delivery solvency¹² and in some areas, the current level of service is adequate. I do not need to envision that Detroit will become a best in class municipality to determine that the POA is feasible. For Detroit, emerging from essential services failure to adequate and reasonable service delivery will be a success.¹³

What Feasibility is Not

When we developed the feasibility definition, we also considered what feasibility does not include. First, and foremost, feasibility is not a guarantee. If the City were to propose a plan under which, based on reasonable assumptions, the City could not help but meet its obligations – effectively a guaranteed outcome – it is likely that while feasible, such plan would not satisfy the best interests of creditors test under section 943(b)(7) of the Bankruptcy Code.¹⁴

¹² Eligibility Opinion of Judge Rhodes

¹³ Anderson, Michelle Wild "The New Minimal Cities" http://yalelawjournal.org/article/thenew-minimal-cities; March 2014

¹⁴ The "best interest test of creditors" is specifically outside the scope of my appointment and as such, is not part of the opinion I have formed. See Docket #4215, Order Appointing Expert Witness, ¶2 and 3.

Similarly, but at the other end of the spectrum, a feasible plan should avoid visionary schemes primarily based on "mere hopes, desires and speculation"¹⁵. Further, the Court must determine whether there is a reasonable prospect of successful completion of the proposed plan.¹⁶ As a point of reference, a frequently cited legal standard for feasibility in Chapter 11 is whether the factual showing at the plan confirmation hearing establishes a "reasonable assurance of success," though "success need not be guaranteed."¹⁷

Lastly, I do not believe the Standard entails: (1) whether the projections in the POA may generate more cash to distribute and therefore provide greater recoveries for creditors or (2) whether there may be alternative plans that could produce a better outcome for the City or its creditors. During my team's evaluation of feasibility, we have been exposed to numerous views on these subjects. Because this is outside my scope and not included in our Standard, I have not attempted to form, nor have I formed, any opinion on these matters.

¹⁵ 242 B.R. 18 (1999) in re Mount Carbon Metropolitan District.

¹⁶ Lawall, Francis J. and Miller, J. Gregg, <u>Debt Adjustments for Municipalities</u> <u>Under Chapter 9 of the Bankruptcy Code</u>, a Collier Monograph, 2012.

¹⁷ Case, Stephen H., <u>Some Confirmed Chapter 11 Plans Fail, So What?</u>, 47 B.C. L. Rev. 59 (2005), http://lawdigitalcommons.bc.edu/bclr/vol47/iss1/4.

In summary, the Standard we have defined includes both quantitative and qualitative assessments of feasibility, including a risk assessment measured against a time horizon and allows for a reasonable range of values within the projections. This Standard is the backdrop against which the remainder of this Report should be read.

Section D - Context

This section of the Report attempts to identify some of the contextual parameters for my expert opinion. The role as the Court's expert on feasibility is both vast and specific, and subsumed within a unique set of facts and circumstances surrounding the City of Detroit, its history and plethora of challenges. Included amongst these topics are:

- The impact of the bankruptcy process on the feasibility assessment
- An "as is" perspective of Detroit which anchors my opinion
- An explanation of what the Plan of Adjustment is and is not
- Identification of factors that affect my opinion separate and apart from the proposed POA

Bankruptcy Process Impact

I am humbled and honored to have been selected as the Court's expert in this matter. The speed with which this restructuring and bankruptcy case has progressed is nothing short of extraordinary. The speed has been both an advantage and a disadvantage to the feasibility of the POA. The restructuring profession generally views quick trips through the bankruptcy process to be advantageous for a variety of reasons: less distraction of the management team, lower professional costs, more negotiated (vs. litigated) solutions, quicker payments to creditors, and less uncertainty for employees and vendors. This could all be true with the Detroit case.

However, I believe the speed of this proceeding has negatively impacted the level of feasibility of the POA. This bankruptcy has been largely focused on deleveraging the City, often to the exclusion of fixing the City's broken operations. The bilateral mediations between the City and the creditor groups worked well to quickly deliver settlements of key disputes. However, the lack of time available for multiparty negotiation has resulted in settlements that, taken in total, greatly reduce the contingency available in the Plan. Pain sharing is an important component of the restructuring process that helps ensure that all the stakeholders appreciate the "size of the pie" as opposed to creating the proverbial "win-lose" tug of war between the debtor and the creditor.

Detroit "As Is"

Detroit is at a tipping point. While some may consider the chapter 9 filing as the low point in this great City's history, I believe that it was the beginning of creating what can become a virtuous cycle of revitalization, improving economics and quality of life betterments for those who choose to live and work within the City. It is hard to imagine that people with such diverse political and socio-economic perspectives would have come together as they have in this process without the bankruptcy filing. Traditional political maneuverings are working to Detroit's advantage and residents have the prospect of once again living in a community that is more safe and supportive. Black, white, Republican, Democrat, poor, wealthy, educated, illiterate and everyone in between have an opportunity to contribute to the virtuous cycle of revitalization, or not.

The City of Detroit's chapter 9 filing has justifiably received extensive attention across international media and within legal and financial circles. The outcomes will be referenced extensively for years, for what was accomplished and arguably, what could have been accomplished during the proceedings. As the largest chapter 9 to date, if any municipality ever needed the protection and tools of the bankruptcy process, it is Detroit. At every level, Detroit was failing as a city – as measured by the shrinking of its population, useful infrastructure and purposeful

enterprises - and as a government – as measured by its inability to deliver essential services. Having spent a large amount of time in Detroit since my appointment, my interaction with citizens, City employees and stakeholders in the bankruptcy have influenced my view of both the in-court restructuring and the out-of-court work that is equally important to Detroit's ability to effectuate its POA.

The Plan of Adjustment

Even after many years of practice with dysfunctional, insolvent, operationally troubled enterprises, I was confused by the City's projections in POA. Section E of this Report provides detail on how the projections and RRIs are structured. Suffice it to say that the "10 Yr projections", the "10 Yr/40 Yr projections," and the "Restructuring and Reinvestments Initiatives" form an unusual construct for a financial plan for an enterprise attempting to emerge from bankruptcy. The baseline projections ("10 Yr projection, Exhibit J to the Disclosure Statement) were prepared in June 2013 to show what would happen to the City without a restructuring, which they did very well. The "10 Yr/40 Yr projection" (Exhibit K in the Disclosure Statement) expands the baseline, steady state projection for the 40 Yr time horizon of the POA. Then, in order to begin to understand how the restructured Detroit might operate – delivering services and paying creditors – one must factor in the RRIs

contained in Exhibit J to the Disclosure Statement. This is convoluted and contributes to the feelings amongst many creditors in this case that the financial projections in the POA are a "black box" and that it was the City's intent to obfuscate important information. I choose to believe that is was simply an unfortunate result of two advisory firms sharing responsibilities¹⁸ rather than one firm "owning" the financial projections start to finish, as is, and should be, the norm.

The City's Plan of Adjustment is primarily limited to a "balance sheet" restructuring, as chapter 11 veterans would characterize it, and it includes only some of the City's operations. This is loosely analogous to a company that files a bankruptcy for the parent company and some, but not all, of the subsidiaries. The chapter 9 proceeding has been overwhelmingly focused on deleveraging the City for the long term, reducing future obligations. That is good. However, the operational restructuring that often occurs with commercial reorganizations will be left largely to Mayor Duggan and his managers for the post confirmation period. That is

¹⁸Ernst & Young, originally retained by the City of Detroit in May 2011, and Conway MacKenzie, originally retained by the City of Detroit in January 2013, have served the City post-petition in a collaborative arrangement. Each firm has taken responsibility for certain aspects of typical debtor "financial advisory" services and the firms work well together. No comments herein should be construed as criticism of this collaboration; rather, I believe it would have been preferable for a single firm to have prepared a single, integrated financial projection for the POA.

unfortunate but is understandable given the speed with which this bankruptcy has occurred and the Emergency Manager's priorities during his similarly short tenure.

Readers of the POA should view the Plan projections as a "sources and uses" statement which describes cash available to fund delivery of some of the services the City provides and certain payments to creditors. As such, these projections are useful only for purposes of confirming the POA (or not, as the case may be) and directionally providing guidance for the City to plan its finances going forward for those operations that are addressed in the POA. It is important to understand that the POA projections are not a business plan for the City. They are not the City's budget. They are not the "financial plan" referenced in Public Acts 181 and 182 of 2014, also referred to as the "Grand Bargain" legislation.

The confusion about the projections in the POA and these other financial plans is evident within the City including its employees, amongst the media and the stakeholders. The projections in the POA have not been harmonized with the City's budget that was passed by the City Council on June 5, 2014. As such, any funding of the RRIs will require first identification of a funding source, and then approval by the CFO and Mayor, and finally, approval by the City Council of a budget amendment to support the appropriations. Although the City has many financial reporting priorities, it is highly advisable that the budget department amend the approved June budget for the numerous anticipated changes post confirmation, harmonizing the current headcounts and spending levels with the RRIs that the City intends to execute in the coming year, and submit a new budget to the City Council for approval.

The sooner the City can divorce itself from the confusion created by the POA projections, the better. The City needs a multi-year Business Plan which can act as a single financial and operational plan, including all departments and enterprise activities (of which an amended budget would be a part) as well as capital plans that can be publicly communicated and compared to actual performance. A "bridge" should be prepared which identifies the components of the POA projections that are included in the City's Business Plan and then the POA projections can be archived.

Another confusion I believe exists in the POA is the investment plan for infrastructure and service delivery improvements that are required to revitalize the City. Those funds will necessarily come from reducing costs of existing service delivery either through efficiency improvements or elimination of activities. The media has created the impression that the City's investment of more than \$1 billion over the course of the coming years is a "given". This is incorrect. There is no funding source for these investments, including blight removal, other than the Exit Financing¹⁹ and the projected structural surplus in the POA projections; that is: the projected revenues must exceed the projected expenses of the City for the foreseeable future. It is important that readers of the POA understand there is no cash in a bank account to fund the RRIs. The cash for the investments will come from the Mayor and the departmental leaders delivering services as economically and efficiently as the POA forecasts.

Outside Factors of Influence

I can say, unequivocally, that without the positive and capable leadership of Mayor Duggan and the constructive relationship between the City Council and the Mayor, I would be unable to opine that the plan, as currently proposed, is feasible. The near term future will require course adjustments as undoubtedly revenues and expenses will vary from projections and unforeseen events will demand changes in plans. The democratic system has put in place individuals who, at least for the next three years, can choose to continue the positive course for the City. I believe they will do so.

¹⁹ The City's investment banker, Miller Buckfire & Co. has prepared solicitation materials as is the process of sourcing this financing.

Southeast Michiganders and Detroiters are extensively engaged in civic and charitable pursuits that benefit the revitalization of Detroit. While detractors cite crime rates and nonfunctioning public works, there are a similar group of enthusiastic, impassioned supporters of Detroit's bright future. Two tangible examples are the Detroit Future City plan and the Blight Task Force report. Each of these privately funded efforts resulted in professionally stellar frameworks that current and future elected officials should consider as components of Detroit's master plan. I find it encouraging that there are the underpinnings of business plans for the City which can be blended with financial plans to improve the prospects of success.

In addition, the level of private funds invested in Detroit annually is significant. During my interviews, one executive estimated that private foundations, collectively, spend between \$150-\$200 million annually on "public" works to support investments in the safety, health and welfare and economic development within the City of Detroit. This level of funding is significant to the overall revitalization efforts outlined in the POA.

30

Section E - City of Detroit Financial Forecast Summary

Introduction

The City's Plan of Adjustment incorporates multiple, interrelated financial forecasts that must be individually and collectively evaluated in order to fully understand how the City intends to operate after a confirmation of the Plan of Adjustment. These forecasts, which vary in both duration and intended scope, emanated from the various City professional advisors and their original responsibilities. To fully appreciate the operating plan for the City, Phoenix has reviewed each of the financial forecasts and has worked with the City and its professionals to understand how each of these documents bridge to one another.

The Plan of Adjustment's financial forecasts are as follows:

- 1. Plan of Adjustment Ten Year Financial Projections (the "10 Yr Plan"),
- 2. Plan of Adjustment Forty Year Financial Projections (the "40 Yr Plan")
- 3. Plan of Adjustment Restructuring and Reinvestment Initiatives (the "RRIs")
- 4. City of Detroit Triennial Executive Budget ("City Budget")

Plan of Adjustment - Ten Year Financial Projections

The 10 Yr Plan, built and modified by Ernst & Young ("E&Y"), is the City's financial forecast for the fiscal years 2014-2023. This plan was originally developed to show how Detroit would operate exclusive of the chapter 9 bankruptcy proceeding. That is, it is effectively the baseline plan. This forecast was built on a department level basis and does not include the quantitative impacts of the restructuring initiatives, the cancellation of debt, the cash flow ramifications from the alterations in the City's pension plans and OPEB²⁰, and other impacts of the bankruptcy proceedings.

The City and its advisors produced, as part of the Fourth Amended Plan for the Adjustment of Debts of the City of Detroit and the corresponding Fourth Amended Disclosure Statement (dated May 5, 2014), an updated version of the 10 Yr Plan which reflected the then most current forecast assumptions and terms of negotiated agreements. In light of the incremental negotiations, modified forecast assumptions and other changes, a newer 10 Yr Plan (in concert with an updated 40 Yr Plan and modified RRIs) has been produced by the City advisors and is dated July 2, 2014. For the purpose of this Report, Phoenix used the July 2, 2014 version

²⁰ Other Post Employment Benefits

of the City's financial forecasts. The following analysis²¹ identifies the quantifiable variances between the most recent iterations of the City's financial forecasts. While the net of all changes only impacted the Plan by \$5.2 million, on an absolute value basis, the July 2nd version of the 10 Yr Plan contains changes that are in aggregate \$491 million versus the May 5th version for the FY2014-2023 time period.

²¹ The analysis is sourced from the 5.5.14 POA and 7.2.14 POA and figures are from the bibliography: Conway Mackenzie Models:1-54 and Ernst & Young Models 8-11

Plan of Adjustment - Forty Year Financial Projections

The 40 Yr Plan, also built and modified by E&Y, is the financial forecast for the fiscal years 2014-2053 that purports to indicate the City's performance over the next 40 years. Contrary to the 10 Yr Plan, the 40 Yr Plan includes the impact of the RRIs, the cancellation of debt, the cash flow ramifications from the alterations in the City's pension plans and OPEB, and other impacts of the bankruptcy proceedings. The 40 Yr Plan has not been built by department and is only a summary of the overall expected City performance.

Plan of Adjustment - Restructuring and Reinvestment Initiatives

The Restructuring and Reinvestment Initiatives have been constructed and amended by Conway Mackenzie ("CM") following CM's City-wide departmental review begun in January 2013. The reinvestment initiatives include funding for additional City personnel and operating requirements, targeted capital expenditures, and blight removal. In total, the RRIs assume the City will invest approximately \$1.7 billion in restructuring initiatives. This \$1.7 billion of investment is funded in part by \$483 million of incremental revenue generated as a result of the RRIs and \$358 million of anticipated costs savings from the execution of the RRIs over the FY2014-2023 period. The remaining funding source for the RRIs will be generated by operating City surpluses and the Exit Financing. The process to develop these detailed initiatives included highly detailed inputs, risks, constraints and other factors in how the initiatives will be implemented.

City of Detroit - Triennial Executive Budget

The City annually develops a Triennial Executive Budget that forecasts the financial operations of the City for the subsequent three fiscal years. This budget historically forms the basis for how the City intends to operate on a departmental level and is developed in line with historical government reporting protocols. The Triennial Budget is developed in a manner that allows for reconciliation with the City's fund accounting²² and only includes items for which funding has been received, approved and allocated. The City's FY2015 budget was unanimously approved by the Detroit City Council on June 5, 2014.

The timing of the City's annual budget cycle, including review and approval by the City Council, and the timing of the bankruptcy proceedings created a bit of a

²² Governmental fund accounting is beyond the scope of this Report. However, the reader should appreciate that 1) government accounting standards can vary significantly from those used in the private sector, 2) fund accounting can sometimes create artificial classifications of revenues and expenses that do not resemble how the entity operates on a regular basis and 3) the City's POA projections were prepared separately from the City's Triennial Budget. In the past few weeks, the City's budget team and the financial advisors have worked to reconcile the major differences between the POA projections and the City's budget.

conundrum for the FY2015 budget. As such, the FY2015 budget does not reflect many of the POA proposals, including most of the RRIs and the revised debt service requirements. This may create a procedural bottleneck in that funding for the RRIs will require first, approval by the Emergency Manager, Mayor and Chief Financial Officer,²³ and then a budget amendment to be approved by the City Council.

Phoenix Review

Phoenix has thoroughly reviewed each of the above identified forecasts. In addition, numerous meetings have been held to discuss the forecasts with the City, E&Y, and CM. While Phoenix appreciates the inherent complexity of any financial forecast for an enterprise of this magnitude, a number of concerns regarding how the multiple forecasts impact one another warrants discussion.

First and most importantly, the City does not have a consolidated, departmental financial forecast that incorporates the baseline forecast and all of the POA proposals, specifically, the RRIs. While the respective 10 Yr, 40 Yr, and RRI forecasts have been expertly researched, constructed, and amended, the fact remains

²³ This group is referred to as the "Approving Parties". Procedures have been established to manage the RRI activities. The Approving Parties will assess the RRI funding requests from the various department heads for appropriateness, ensure that the City has the cash for fund the initiatives and allocate the money amongst the requested initiatives.

that the City does not have an aggregated forecast to use as a fiscal roadmap going forward. During our many meetings with City leadership and department heads, it was evident that the individuals responsible for delivering essential services did not have an adequate understanding of the POA impacts to their operations and the manner in which the RRIs would occur.

I have participated in the budget review meetings with the Mayor, the department heads and their respective teams and believe that the sooner the POA projections, in their current form, can be archived, the better. Although improving, there is still a gap in the understanding by the department heads, relating to their budgets and the impact the RRIs will play in what they will be responsible for in the future. In the next few years, the funding for the RRIs is largely, if not exclusively, dependent on the Exit Financing. At this point, we understand the Exit Financing is not committed and the amount and terms have not been determined. For purposes of my assessment and resulting opinion, I have assumed that Exit Financing will be available in an amount sufficient to implement the POA as set forth in detail later in this Report.

Section F - Revenue and Macro Assumptions

Summary²⁴

The City of Detroit's Plan of Adjustment include 10 Yr revenue projections for the fiscal years 2014-2023 and 40 Yr revenue projections for the fiscal years 2014-2053 ("40 Yr Plan"). The 10 Yr Plan revenues were forecasted including and excluding the assumed accretive impact of the proposed RRIs detailed in the Plan of Adjustment. As illustrated below, the total revenues projected in the 10 Yr Plan -<u>exclusive of the impact of the RRIs</u> - is \$10.4 billion; alternatively, the 10 Yr Plan's cumulative revenues <u>inclusive of the impact of the RRIs</u> is \$11.2 billion.

		FY201	14-20	023		FY2024-2	033	FY2034-2	043	FY2044-2	053

²⁴ Unless otherwise stated the financial projections referenced in section F are sourced from the bibliography: Ernst & Young Models: 10-11

The analyses below will identify the City's individual revenue components (on an annual and cumulative basis), the estimated growth for each revenue category over the time periods of both forecasts, and the key assumptions utilized for each revenue category. The following analyses will also identify and compare, where applicable, third party assumptions for various operating metrics (e.g. wages, employment, population, etc.) as they relate to the assumptions the City used to derive these forecasts. Finally, this revenue analysis provides sensitivity scenarios designed to illustrate the variability of the revenue forecasts as underlying assumptions are changed.

Municipal Income Tax

The City of Detroit, in accordance with the Michigan Public Act 284 of 1964, has been one of 22 Michigan municipalities to impose a municipal income tax on its residents, nonresidents working in Detroit, and resident businesses. The City's municipal income tax receipts, due to declines in population and the economy, have decreased by 30% since 2002. Municipal income tax revenues are forecasted to account for 25% of General Fund revenue in the FY2014-2023 period.

As mentioned above, the City's POA projections estimate revenues for the 10 year period covering FY2014-2023 with and without the incremental revenue impact

of the RRIs. The following analysis illustrates the "without Restructuring and Reinvestment Initiatives" scenario.

10 Yr Plan - Without RRIs

The City's 10 Yr Plan forecasts annual municipal income tax through the estimation of the year-over-year ("YoY") growth in taxable income for the following subsections:

- City residents
 - Average annual YoY taxable income growth: 0.85%
 - Income tax rate: 2.4%
 - FY2014-2023 City resident income taxes: \$1,561 million
- Non-residents
 - Average annual YoY taxable income growth: 1.18%
 - Income tax rate: 1.2%
 - o FY2014-2023 non-resident income taxes: \$761 million
- Corporations
 - Average annual YoY taxable income growth: 1.63%
 - Income tax rate: 2.0%
 - FY2014-2023 corporation income taxes: \$245 million

The taxable income growth assumptions appear to be reasonably conservative

relative to the recent uptick in taxable income in FY2011-2013. For Detroit

residents, taxable income growth has averaged 3.4% annually for those three years.

During the same period, taxable income growth has averaged 3.5% for non-residents

and 2.2% for corporations. The annual taxable income growth during FY2011-2013

is likely reflective of the recovery from the 2008-2009 financial crisis, when the City's taxable income base suffered double-digit YoY percentage declines.

10 Year Plan – Municipal Income Tax (Without RRIs)

The POA's 10 Yr projections "build up" the annual taxable income growth assumption by adding separate assumptions for annual wage growth and employment growth.

Wage Growth (Without RRIs)

The 10 Yr Plan estimates – for both the City residents and nonresident categories – an average wage growth of 1.25% for the FY2014-FY2023 period, an

estimate that appears reasonable when compared to the state and national forecasts highlighted below. The income growth forecast for corporations is 1.63% and is conservative relative to the State forecast. The Michigan Senate Fiscal Agency assumed an average 2.65% wage growth rate for Detroit which is reflective of the average state forecast of 3.65% reduced by a 1% structural adjustment for the City of Detroit.

Employment Growth (without RRIs)

The annual employment rate of City residents is forecasted to decline by 0.4% for the FY2014-FY2023 period. Non-residents' average annual employment is estimated to decrease by 0.07% for this time period. As was the case with forecasted wage growth, the employment growth assumptions seem reasonable when compared to the recent actual employment growth for the entire City of Detroit over the last three fiscal years which averaged 0.4%.

<u>10 Year Plan – Municipal Income Tax (Without RRIs)</u> Taxable Income Growth Metrics

10 Yr Plan with RRIs

The 10 Yr projections forecast annual municipal tax income through the estimation of the year-over-year ("YoY") growth in taxable income for the following subsections:

- City residents
 - Average annual YoY taxable income growth: 2.32%
 - Income tax rate: 2.4%
 - FY2014-FY2023 City resident income taxes: \$1,693 million
- Non-residents
 - Average annual YoY taxable income growth: 2.37%
 - Income tax rate: 1.2%
 - o FY2014-FY2023 non-resident income taxes: \$817 million
- Corporations
 - Average annual YoY taxable income growth: 2.65%
 - Income tax rate: 2.0%
 - FY2014-FY2023 corporations income taxes: \$260 million

Due primarily to the more optimistic City residents' taxable income growth

assumptions in the "With Reinvestment Initiatives" scenario, the latter scenario

assumes an additional \$204 million in municipal income tax revenue in the 2014-2023 time period. A Sensitivity Analysis is provided below to gauge the impact of the City's actual results materially deviating from the 10 Yr Plan's forecast.

<u>10 Year Plan – Municipal Income Tax (With RRIs)</u>

Wage Growth (with RRIs)

The 10 Yr projections estimate – for both the City residents and nonresident

categories - an average wage growth of 2.16% for the FY2014-2023 period, or

roughly 91 basis points²⁵ higher than the "without RRIs" scenario. The wage growth forecast for corporations is 2.65%, or equivalent to the Michigan Senate Fiscal Agency assumption.

Employment Growth (with RRIs)

The number of City residents employed is forecasted to increase 0.15% for the FY2014-2023 period, while the non-residents' average annual employment is anticipated to increase 0.21% over this time period.

 25 A basis point is equivalent to 0.01%; therefore 100 basis equals 1%

Comparable Assumptions

When comparing the City of Detroit's wage growth assumptions versus its state or national estimates, the POA's wage assumptions appear reasonable in light of the City's history of lagging state/national statistics.

<u>Comparable Metric Analysis</u>	
Wage Growth	
10 Year Plan - without Reinvestment	1.25%
10 Year Plan - with Reinvestment	2.16%
State	
Michigan Dept. of Treasury - FY2014	3.90%
Michigan Dept. of Treasury - FY2015	3.90%
Michigan Dept. of Treasury - FY2016	3.90%
Michigan Senate Fiscal Agency - FY2014	2.30%
Michigan Senate Fiscal Agency - FY2015	2.60%
Federal	
CBO - Real Wage Growth	2.47%

In a similar fashion to forecasted wage growth, the City's employment growth assumptions for FY2014-2023 are more conservative relative to the applicable State of Michigan forecasts and the City's recent actual results.

Michigan Senate Fiscal Agency - FY2014	0.80%
Michigan Senate Fiscal Agency - FY2015	0.50%

Sensitivity Analysis

The following analysis illustrates the incremental impact to the City of Detroit's actual taxable income if there are deviations to the forecasted metrics in the 10 Yr Plan. For Municipal Income taxes, while multiple economic assumptions factor into the final estimates, the driving metric is the annual growth rate of taxable income. As such, the analysis below estimates the impact of a 1 percentage point change in the forecasted growth rate, up or down, for each category of income tax payer in both scenarios.

					Preliminar	y forecast					FY2014-2023
(\$ million)	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Total
For Every 1% Change in Annual Taxable	Income Growth Rate										
Without Reinvestment											
City Residents	1.5	1.5	1.5	1.5	1.5	1.6	1.6	1.6	1.6	1.6	15.5
Non-Residents	0.7	0.7	0.7	0.7	0.8	0.8	0.8	0.8	0.8	0.8	7.5
Corporations	0.2	0.2	0.2	0.2	0.2	0.2	0.2	0.3	0.3	0.3	2.4
Total	2.4	2.5	2.5	2.5	2.5	2.6	2.6	2.6	2.6	2.6	25.4
With Reinvestment											
City Residents	1.5	1.5	1.6	1.6	1.6	1.7	1.7	1.7	1.8	1.8	16.6
Non-Residents	0.7	0.7	0.8	0.8	0.8	0.8	0.8	0.8	0.9	0.9	8.0
Corporations	0.2	0.2	0.2	0.2	0.3	0.3	0.3	0.3	0.3	0.3	2.5
Total	2.4	2.5	2.6	2.6	2.7	2.7	2.8	2.9	2.9	3.0	27.1

For the Without RRIs scenario, every 1 percentage point deviation in the 10 Yr Plan's assumption will result in an approximate \$25 million in collected income tax revenues variance for the FY2014-2023 period. Due to higher income tax forecast in the With Reinvestment Initiatives case, the estimated variance – as compared to the original 10 Yr Plan - increases to \$27 million over that ten year period in question.

State Revenue Sharing

The City of Detroit receives aid from the State of Michigan in connection with constitutional and statutory sharing of sales tax revenue and economic vitality incentive payments ("EVIP"). Per Michigan's constitution, the State is required to distribute 15% of all state taxes imposed on retailers. The constitutional revenue sharing is a function of a municipality's population relative to the other municipalities in Michigan, while the statutory revenue sharing is distributed to municipalities that comply with certain "best practices" and reporting requirements.

Constitutional Payments

The State of Michigan's constitutional payments emanate from the statutory sharing of sales tax revenue and are based upon the population of Detroit (as measured by the decennial Census) as a percentage of the total State's population. The constitutional payments are distributed every other month via a formula multiplying Detroit's population by defined distribution rates.

The 10 Yr projections utilize Detroit's population from the 2010 Census – 712,501 – to factor the State's constitutional payment for the fiscal years 2014-2021. For FY2022 and FY2023, the 10 Yr Plan utilized the Southeast Michigan Council of Governments ("SEMCOG") forecast which reflects a 12.3% decline in Detroit's population to 625,152.

Statutory Payments

The State's EVIP funds are appropriated annually by the State Legislature and therefore carry more inherent risk than the mandated State constitutional payments. The EVIP funds are allocated per the following categories:

- Category 1 Accountability and Transparency
 - Each municipality is required by October 1st to produce a citizen's guide of its most recent local finances, including a recognition of unfunded liabilities, a performance dashboard, a debt service report, and a project budget report
- Category 2 Consolidation of Services
 - Each municipality is required by February 1st to produce a service consolidation plan that is submitted to the Michigan Department of the Treasury; including details of service cooperation, consolidations, and privatizations with estimated cost savings
- Category 3 Unfunded Accrual Liability Plan
 - Each municipality with unfunded accrual liabilities is required by June 1st to produce a plan to lower all such unfunded accrual liabilities; detailing previous actions taken and a go forward plan of existing and new initiatives

The 10 Yr projections assume that the City continues to receive 100% of its

possible State allocation, or approximately \$140 million annually for the entire

FY2014-2023 time period.

Sensitivity Analysis

The following analysis illustrates the incremental impact to the City if State Revenue Sharing deviates from the assumptions in the 10 Yr forecast. The analysis below estimates the impact of a 5% change in the 2020 Census forecasted population and a 5% change in the statutory payment allocation. Because the constitutional payment is based on the 2010 Census figure through FY2021, the impact of a 5% population change would only be realized in FY2022 and FY2023. For the statutory payment, a 5% change in the allocation would have a cumulative impact of \$70 million to the General Fund during the FY2014-2023 period.

										•	ecast									0 Year
	201	4	201	15	2016		2017	20	18	20	19	202	20	2021		2022	2	023	ľ	Total
For Every 5% Change in Applicable State Revenue	Sharin	g Met	tric																	
Constitutional Payment		-		-		-	-		-		-		-		-	3.0		3.0	\$	6.0
Statutory Payment		6.8		7.0	7	.0	7.0		7.0		7.0		7.0	7	.0	7.0		7.0	<u>\$</u>	70.0
Total State Revenue Sharing	\$	6.8	\$	7.0	\$7	.0	\$ 7.0	\$	7.0	\$	7.0	\$	7.0	\$7	.0 :	\$ 10.0	\$	10.1	\$	76.0

The City of Detroit recently saw its portion of State's revenue sharing decrease significantly, from a combined annual total of \$267 million in FY2009 to as low as \$173 million in FY2012. While the State's revenue sharing to Detroit has increased in FY2013 and FY2014, the City remains susceptible to decreases in revenue sharing should the State's budget position change.

Wagering Taxes

The City of Detroit, per the Michigan Gaming Control and Revenue Act, is authorized to impose a 10.9% wagering tax on casinos operating within the City. In addition, the City collects other fees from the casinos in the City based on operating

agreements with each. Wagering tax revenues are forecasted to account for 17% of General Fund revenue in the FY2014-2023 period.

Total Wagering Tax	169.9	168.2	169.0	169.9	171.6	173.3	175.0	176.8	178.6	180.3	\$ 1,732.6

As a result of the wagering tax rate (10.9%) and the additional 2006 tax rate (1.0%) being held constant, the key assumption in the 10 Yr forecast is the annual percentage change in casino gross receipts. The Detroit casinos have experienced increasing competition recently due to the openings of casinos in Cleveland and Toledo, Ohio resulting in declining wagering tax revenues for the City. The 10 Yr projections assume a 2.5% YoY decline in FY2014, a 1.0% decline in FY2015, a 0.5% annual increase in FY2016 and FY2017, and a 1.0% annual increase in FY2018-2023.

Through the first six calendar months of 2014, Detroit's aggregate casino revenues decreased 3.6% versus the same six month period in 2013. These actual results for the first six calendar months of 2014 represent a 110 basis points negative variance to the POA's FY2014 forecast and a 260 basis points negative variance to the FY2015 forecast.

Sensitivity Analysis

The following analysis illustrates the incremental impact of the City's actual Casino Wagering tax deviating from the assumptions in the 10 Yr projections. The analysis below estimates the impact of a 1% change, up or down, in the estimated casino gross receipts. The current projections assume casino gross receipts will average annual growth of 0.3% for FY2014-2023. Every 1 percentage point change in the gross receipts assumption will result in an approximate \$16 million variance in the FY2014-2023 period.

]	Preliminary	forecast					10 Year
	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Total

Annual Impact on Total Wagering Tax	1.6	1.6	1.6	1.6	1.6	1.6	1.6	1.6	1.7	1.7	16.2

Sales and Charges for Services

Detroit receives revenues for City delivered-services such as maintenance and construction, recreation, ambulance services, court fees, permits and licenses, etc. Nearly half of these revenues are reflected as "Non Departmental" (e.g. municipal servicing fees on gross wagering revenues, personal services IPOs). Sales and Charges for Services revenues are forecasted to account for 11% of General Fund revenue in the FY2014-2023 period.

During the ten year period, the largest change relates to transitioning responsibility for the City's street lights from the PLD to the Public Lighting Authority beginning in FY2014. When the seven year transition is complete, the City will no longer collect revenue from external customers. The balance of the revenue categories are assumed to remain relatively constant over the FY2014-2023 time period.

Property Taxes

The City of Detroit levies property taxes to fund general operations and support various tax obligations. Detroit also levies additional property taxes to fund the Detroit Public Library, Detroit Public Schools, Wayne County Community College, the State of Michigan, and a number of special authorities.

City of Detroit Millage

- Non-Departmental (General City): 19.9520 mills
- Debt Service: 9.771 mills
- Library: 4.631 mills

Property tax revenues are forecasted to account for approximately 9% of General Fund revenue in the FY2014-2023 period. As previously mentioned, the City's Plan of Adjustment estimates revenues for the 10 year period covering FY2014-2023 both with and without the incremental revenue associated with the RRIs. The following analysis illustrates the "without RRIs" scenario.

10 Yr Projections - Without RRIs

The City's forecasted property tax revenues, due to the relatively-constant millage rates, are largely predicated upon the assumed changes in assessed property values and the estimated collection rates going forward.

Assessed Property Values

The 10 Yr projections assume individualized, average annual property value growth rates for each of the City's three property classifications: real property, personal property, and the Renaissance Zone. The 10 Yr projections assume real property values will decline 4% annually during the FY2014-2023 period, and personal property values will decline 0.3% for the same time period. The Renaissance Zone forecast assumes a 4.8% annual increase – aided by the 47% forecasted growth assumption in FY2014 which is consistent with the FY2012-2013 average.

Collection Rates

The POA forecast assumes improving property tax collections over the FY2014-2023 timeframe. The 10 Yr projections assume that collections for the nondepartmental property taxes improve from an assumed 78% in FY2014 to 80% in FY2015-2019 to 84% in the last four years of this ten year period. Estimated collections for debt service is projected to decrease from an assumed 82% in FY2014 to 80% in FY2015-2019 to 84% in the last four years of this ten year period. Estimated collections for library property taxes are assumed to improve from 82% in FY2014-2016 to 84% in FY 2017 to 85% in FY2018-2023.

10 YR Projections - With RRIs

Assessed Property Values

The 10 Yr projections – with RRIs - assumes real property values will decline 1.7% during the FY2014-2023 period, and personal property will increase by 0.9% during that same time period. The Renaissance Zone is forecasted to increase 4.8% annually during the ten year period – aided by the 47% forecasted growth assumption in FY2014.

In January 2014, the City launched a property tax assessment reform designed to make Detroit more attractive to current and prospective residents. As initial studies have indicated that significant portions of the City are over-assessed, the assessment reform is likely to result, in the near term, in reduced assessments and property tax revenues. This scenario is forecasted via an assumed 9% decline in real property assessments in FY2015 and a 3-4% drop in FY2015. The City believes that reduced assessments will result in improved property tax collection rates and, in the longer term, increased property values as Detroit becomes a more desirable location.

Collection Rates

The POA forecast assumes improving property tax collection over the FY2014-2023 timeframe. The 10 Yr projections assume collections for non-

departmental property taxes improve from a 78-82% range the 1st six years of the ten year period to 87% in the four years at the end of this period. The 10 Yr projections assume collections for debt service improve from a 78-82% range the 1st six years of the ten year period to 87% in the four years at the end of this period. Estimated collections for library property taxes are assumed to improve from 82% in FY2014-2016 to 84% in FY 2017 to 85% in FY2018-2023.

Personal Property	0.8	0.8	0.7	0.7	0.7	0.7	0.6	0.6	0.4	0.4	6.4
Renaissance Zone	0.3	0.3	0.3	0.3	0.3	0.3	0.3	0.3	0.3	0.3	3.0
Total	2.6	2.4	2.3	2.2	2.2	2.2	2.1	2.2	2.0	2.1	22.4

For the Without RRIs scenario, every 1% change in the 10 Yr assumption will result in an approximate \$21 million change in collected income tax revenues in the

FY2014-2023 period. Due to higher property tax collection forecast in the With RRIs case, the estimated variance increases to \$22 million over that ten year period in question.

Utility Users' Taxes

The City of Detroit is the only city in Michigan authorized to levy a 5% utility users' excise tax. The City imposes this tax on consumers of telephone, electric, steam, and gas services. Utility users' tax revenues are forecasted to account for approximately 2% of General Fund revenue in the FY2014-2023 period.

Other Revenues

The City of Detroit annually generates revenues for City-services related to permits, licenses, parking fines, grant revenues, and 36th District Court fees. Grant revenue is comprised of approximately \$11 million in Fire Department SAFER grants in FY2015 and 2016, \$4-5 million annually in Police Department grants, with the balance related to Homeland Security, health initiatives, and the planning and

development department. Other revenues are forecasted to account for approximately 7% of General Fund revenue in the FY2014-2023 period.

Section G - Operating Expenditures

Summary²⁶

The operating expenditures in the City of Detroit's POA 40 Yr Projections are summarized below:

General Fund Operating Expenditures	FY2014-:	2023	FY2024-	2033	FY2034-	2043	FY2044-	2053
Salaries/Overtime/Fringe	\$ 3,768	47.3%	\$ 4,612	48.8%	\$ 5,700	48.1%	\$ 7,121	47.5%
Health Benefits	\$ 753	9.4%	\$ 928	9.8%	\$ 1,374	11.6%	\$ 2,034	13.6%
Active Pension	\$ 348	4.4%	\$ 444	4.7%	\$ 548	4.6%	\$ 683	4.6%
OPEB Future Retirees	\$ 32	0.4%	\$ 37	0.4%	\$ 43	0.4%	\$ 51	0.3%
Other Operating Expenses	\$ 3,073	38.5%	\$ 3,437	36.3%	\$ 4,190	35.3%	\$ 5,108	34.1%
Total General Fund Operating Expenditures	\$ 7,974	100.0%	\$ 9,458	100.0%	\$ 11,855	100.0%	\$ 14,997	100.0%

The City's 10 Yr projections were developed by E&Y primarily to reflect the "baseline" financial condition of the City in the summer of 2013, assuming no changes in legacy obligations. These projections were prepared in significant detail and are the initial building block for the financial forecasts that are contained in the POA. The analysis below identifies the City's individual operating expense categories, the estimated growth for each category, and the key assumptions utilized. These expenditures exclude the expenditures related to the RRIs even though the

²⁶ Unless otherwise stated the financial projections referenced section G are sourced from the bibliography: Ernst & Young Models: 10-11

categories are similar. Section H includes the analysis of the expenditures associated with the RRIs.

The detailed operating expenditures in the 10 Yr forecast are as follows²⁷:

	FY201	14-2023
General Fund Operating Expenditures	 \$	% of Costs
Salaries & Wages	\$ 3,165	39.7%
Health Benefits	\$ 753	9.4%
Overtime	\$ 326	4.1%
Other Benefits	\$ 278	3.5%
Active Pension	\$ 348	4.4%
OPEB Future Retirees	\$ 32	0.4%
Professional and contractual services	\$ 559	7.0%
Risk management and insurance	\$ 445	5.6%
Materials & supplies	\$ 376	4.7%
Utilities	\$ 296	3.7%
Purchased services	\$ 230	2.9%
Other expenses	\$ 359	4.5%
Maintenance capital	\$ 62	0.8%
Contributions to non enterprise funds	\$ 216	2.7%
DDOT subsidy	\$ 530	<u>6.7%</u>
Total General Fund Operating Expenditures General Fund	\$ 7,974	100.0%
Operating Surplus Prior to Legacy, Non Operating Expenses and RRI's	\$ 2,781	

²⁷ The analysis shows both estimates from the base 10 Yr plan and estimates from the 40 year plan including pension and OPEB payments to future retirees. The analysis was done to estimate a run rate operating surplus prior to accounting for the RRIs.

Salaries & Wages

Salaries and wages related to the General Fund were \$297.6 million in FY2013 and accounted for 40.4% of the City's estimated operating expenses. By FY2023, the City is projecting Salaries and Wages to represent 39.7% of operating expenses prior to the additional headcount from the RRIs.

Headcount

City-wide headcount in FY2013 was 10,043²⁸ versus the prior 5 year average of 12,610. The City projected headcount using the projected FY2013 headcount by department and assuming that headcount remained constant over the next ten years except for the following exceptions:

- Departments that are being outsourced including: DWDD, Human Services, PLD, Homeland Security and the majority of the Health and Wellness and City Council Departments. The City also adjusted some department headcount estimates higher or lower than FY2013 based on the most recent information from FY2014
- The Finance and HR department headcount reductions due to the implementation of a new payroll service in FY2017
- The Police and Fire Departments include projections for attrition and new hires beginning in FY2015

²⁸ The 2013 headcount is from the 10 Yr base model and was the estimated headcount when the financial model was initially prepared. The assumptions are based off of the projected headcount going forward. Actual headcount by department differs by this amount. The analysis in this section will reference the 2013 headcount in the base 10 Yr plan.

Total employees across all departments is projected to be 9,742 in FY2023 versus 10,043 in FY2013 or a 3.1% decrease. The average headcount from FY2008-FY2012 was 12,610 and the FY2023 headcount represents a 22.7% decrease from this level. Projected headcount by department:

					Preliminary	Forecast				
Department	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023

Average Salary

The City calculated departmental salaries and wages by using the headcount

projections above and calculating a base average salary by department. The City

determined the base average salary via two methods:

- The City calculated the average departmental salary by using the total FY2013 expense for salaries and wages by department and divided that by the average headcount of the department over the course of FY2013.
- The City analyzed each department's average salary at a point in time, conducting this analysis in November of 2013.

The City's advisors reviewed both estimates with each department head and

selected the average salary that was considered the most reasonable going forward

based on attrition estimates and estimated future hirings.

City-wide 10% wage reductions were implemented prior to FY2014 for the majority of employees. The Fire and Police departments FY2014 average salaries were adjusted by 4.1% and 2.1% in the projections respectively to account for 10% wage reductions for the remaining employees with contracts that expired in FY2013.

It should be noted that the baseline 10 Yr model used average salaries for the Fire and Police departments even though employees leaving via attrition will be replaced by employees at lower wages and new employees will most likely be entry level employees at lower salary levels. This assumption change was made recently and adjusted in the July 2, 2014 RRIs for each respective department. The add backs can be seen in Section H. The average wages also include a 10% wage reduction to 36th District Court employees from FY2013 levels in 2014. For all employees, wage inflation is assumed with the following schedule:

Year	YoY Change
2015	5.0%
2016	0.0%
2017	2.5%
2018	2.5%
2019	2.5%
2020	2.0%
2021	2.0%
2022	2.0%
2023	2.0%

Projected average salary by department by year:

Department Salaries and Wages

The Police and Fire departments represent 76.5% of total salaries and wages in the General Fund. The following charts summarize the salaries and wages by department over the 10 year period for labor costs reflected in the General Fund and the Enterprise Funds:

Salarie	Salaries and Wages - General Fund										
General Fund	FY	2014-2023	% of Salaries	% of Revenue							
Police	\$	1,654	52.3%	14.7%							
Fire	\$	765	24.2%	6.8%							
36th District Court	\$	187	5.9%	1.7%							
Finance	\$	106	3.3%	0.9%							
General Services	\$	103	3.2%	0.9%							
Law	\$	68	2.2%	0.6%							
Recreation	\$	38	1.2%	0.3%							
Human Resources	\$	37	1.2%	0.3%							
Planning & Development	\$	31	1.0%	0.3%							
Mayor	\$	25	0.8%	0.2%							
ITS	\$	24	0.8%	0.2%							
All Other GF Depts.	\$	127	4.0%	<u>1.1%</u>							
Total General Fund	\$	3,165	100.0%	28.2%							

All Other Funds	FY 2	014-2023	% of Salaries
Sewer	\$	637	36.1%
Water	\$	395	22.4%
DDOT	\$	363	20.5%
Waste	\$	98	5.6%
BSED	\$	96	5.5%
Streets	\$	84	4.7%
Planning & Development	\$	61	3.5%
All Other Depts.	\$	31	<u>1.8%</u>
Total Other Funds	\$	1,765	100.0%

Following FY2023, the City projects total salaries and wages will increase 2% a year from FY2024-FY2033 and 2.25% a year from FY2034-FY2053.

Health Benefits

Health benefits for active employees in the General Fund in FY2013 totaled \$47.8 million or 6.5% of operating expenses. Over the next ten years the city is estimating Health Benefits to account for 9.4% of operating expenses. The City relied on their actuary, Milliman, Inc.²⁹, to project health care costs per active employee. Milliman's estimated FY2014 healthcare costs are based on headcount estimates provided by the City and reflect cost of healthcare plan designs offered for FY2014 enrollment:

²⁹ See Milliman Letter Re: City of Detroit Active Health Plan Projections Dated November 3, 2014.

					FY2	014								
		Milliman Per Employee Estimate												
	Headcount	Μ	[edical	Denta	l	Vision		Tot	al	2014	Total

Library	384	\$	6,695	\$	667	\$	79	\$	7,441	\$	3			
Total	9,624									\$	84			

Milliman projected estimates for year over year percent changes in healthcare costs per employee from FY2015 thru FY2019. After FY2019 the City projected annual healthcare increases. The City estimated 4% a year in annual inflation in healthcare costs for FY2020 through FY2023.

Health benefits in the General Fund include \$142.8³⁰ million of OPEB payments for current retirees including \$123.8 million in FY2014 and \$19 million in FY2015. The City continued to pay healthcare costs for retirees after filing bankruptcy in the form of a stipend. The total amount projected to be paid was deducted when calculating total recovery for the OPEB claim via UTGO Note A.

³⁰ Total payments to current retirees in the financial model is actually \$162.8 million. This amount includes \$20 million considered recovered after negotiations and it is paid in cash under the sources section in the 40 Yr model along with other unsecured creditors.

The following chart shows the total projected health benefit expenses in the General Fund in FY2014-FY2023:

					Preli	minary F	`orecast				
General Fund Active Health Benefits	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	10 Year Total

Overtime

Overtime accounted for \$29.7 million in the General Fund in FY2013 which was 4% of total operating expenditures and 10% of payroll. The City assumed that overtime in the projections as a percentage of payroll stays constant from FY2013 except for a few exceptions:

- Overtime in the Fire department increases from 7% in FY2013 to 8.5% in FY2014 and finally decreases to 6% from FY2015-FY2023. The Fire Department overtime levels were down from the FY2008-FY2012 average of 13.4% to 7% in FY2013 as the Fire Department has been successful in reducing overtime due to better staffing model. Additional overtime reductions for the department are reflected in section H.
- Overtime in the Police Department is expected to increase from 12% in FY2013 to 15% in FY2014 and FY2015 and back to 14% in FY2016-FY2023. The expected increase is a result of changing from 12 hour shifts to 8 hour shifts.
- Overtime for DDOT is projected to decrease to 40% of payroll versus 42.8% in FY2013. The overtime for DDOT in operating expenditures does not account for projected overtime decreases due to additional hires in DDOT and updates to its existing bus fleet that reduce overtime by a considerable amount. The reduction in overtime can be seen in Section H.

The chart below highlights overtime across all departments as a percentage of total department payroll:

					Prelin	ninary For	ecast

The chart below highlights General Fund overtime paid over the ten year period:

Gener	al Fu	nd Overti	me
Department	10 Y	ear Total	% of Overtime
Police		235	72%
Fire		48	15%
General Services		24	7%
Finance		8	2%
All Other GF Depts.		12	<u>4%</u>
Total Overtime	\$	326	100%

The majority of overtime in the General Fund is driven by Police, Fire and General Services. Overtime for DDOT is projected to be \$145 million over the 10

13-53846-swr Doc 7117 Filed 08/27/14 ⁷ Entered 08/27/14 18:49:26 Page 189 of 351

year period. Although DDOT is not funded by the General Fund, the General Fund does provide a subsidy to DDOT as it has historically operated at a deficit. Overtime for the majority of departments has decreased from the FY2008-FY2012 average. If the current assumptions are understated and actual overtime reverts back to FY2008-FY2012 levels, the overtime costs could increase as shown below:

				Additional OT
Department	2008-2012 Avg	10 Yr Avg	Var	Over 10 Yrs at 08-12 Avg
Police	15.0%	14.2%	0.8%	14
Fire	13.4%	6.3%	7.1%	55
DDOT	44.6%	40.0%	4.6%	17
Total				\$ 85

Other Benefits

Other benefits including social security, unemployment and life insurance totaled \$34 million in the General Fund in FY2013 representing 4.6% of operating expenses and 11.4% of payroll. The City projected other benefits by calculating the FY2013 cost per employee for each benefit and multiplying it by the number of employees projected in FY2014. For the Fire and Police Departments, which have both uniform and civilian employees, the City calculated the uniform employees at the Police or Fire Department per employee cost and civilians at the General City per employee cost. The analysis below highlights the calculations the City made regarding fringe benefits:

Benefit Per Head		Fire		Police		DOT		Gen City		BSED		36DC		Sewer	,	Water	L	ibrary
As a % of Payroll																		
Emp Benefits-Social Security		0.00%		0.00%		7.65%		7.65%		7.65%		7.65%		7.65%		7.65%		7.65%
Per Head Cost

Going forward, the City assumed fringe benefits as a percent of payroll would stay constant. As a result, fringe benefits increase at the same rate as wage inflation projected in the forecast. In addition to fringe benefits, the City included a one-time 3% bonus in FY2016 to all uniformed employees and a one-time 2.5% bonus to nonuniformed employees. Below summarizes the General Fund cost for fringe benefits by year including the bonus payments:

					Prelin	nina	ry Forecas	t

Active Pension

The city is establishing a new hybrid pension plan for its active employees. Details regarding the new pension plan are discussed in Section J. The City assumed the following contributions per employee group as a percentage of payroll based on the most recent negotiations:

	Contribution %
Non Public Safety	5.75%
Public Safety	12.25%
PLSA	12.25%

The chart below summarizes the City's yearly estimated contributions to the pension plan:

						Prelimina	ry Forecas	t

Active OPEB

The city is establishing a Voluntary Employment Benefit Account ("VEBA") for its active employees' future healthcare costs. The City assumed a contribution

of \$1 million per year to PFRS and 2% of payroll for non-uniform employees based on the most recent negotiations. Summarized below is the City's yearly estimated contribution to the VEBA:

										Pre	elin	ninary I	For	ecast

Professional and Contractual Services

Professional and Contractual Services are comprised of the following categories: Auditing, Medical, Legal, Personal Service Contracts and Other Contracts. Professional and Contractual Services are expected to account for 7% of total costs over for the 10 Yr forecast. The City assumes all Professional and Contractual Services expenses will increase by 1% a year, with a few exceptions:

- Medical costs decrease from \$22.7 million in FY2013 to \$1.3 million in FY2014 due to the transition of the Health and Wellness department
- Personal Service Contracts are affected by a \$2 million increase in FY2014 related to City Council's outsourcing of its support staff
- Personal Service Contracts in the Mayor's department increase from \$8,000 in FY2013 to \$500,000 in FY2014 and to \$1 million in FY2015 before decreasing to \$29,000 in FY2018.
- Personal Service Contracts increase in the Public Lighting department as a number of jobs are outsourced beginning in FY2014. Those outsourced jobs are eliminated by FY2021.

• Other Contracts fluctuates due to additional resources needed in the election department during election years, resulting in an additional \$3 million expense.

Below is a breakdown including year over changes by line item:

Risk Management & Insurance

Risk Management and Insurance is comprised of the following categories: Litigation, Workers Comp, Other Claims and Insurance. Risk Management and Insurance is expected to account for 5.6% of total costs over the 10 Yr Plan. The global assumption is Risk Management and Insurance will increase by 1% per year except for the following assumption:

• Litigation costs increase to FY2013 levels in FY2015 as the City exits bankruptcy in FY2015.

Below is a breakdown including year over changes by line item:

Materials and Supplies

Materials and Supplies are comprised of the following categories: Operating Supplies, Fuel and Lubricants, Repairs and Maintenance and Other. Materials and Supplies are expected to account for 4.7% of total costs over the ten year period. The global assumption is all materials and supplies expenses will increase by 1% per year.

- Operating Supplies decrease from FY2016-2021 due to the transition of the Public Lighting department.
- Fuel and Lubricants decrease in FY2015 due to the transition of the Public Lighting department.
- Repairs and Maintenance decrease in FY2017 due to \$1.9 million in savings in the ITS department as a result of the new payroll system.

Utilities

Utilities are expected to account for 3.7% of total costs over the 10 Yr forecast.

All Utilities are expected to increase by 1% per year except for the following:

• Water is projected to increase year over year by the following:

Year	YoY Change
2015	1.5%
2016	5.7%
2017	5.7%
2018	2.8%
2019	3.5%
2020	3.5%
2021	3.5%
2022	3.9%
2023	3.9%

• Sewage is projected to increase year over year by the following:

Year	YoY Change
2015	1.4%
2016	3.7%
2017	2.9%
2018	3.1%
2019	3.7%
2020	3.6%
2021	3.7%
2022	4.0%
2023	4.0%

• Outside purchases for electricity is expected to increase 25% in FY2015 as the City transitions to purchasing electricity from an outside vendor.

Section H – RRIs and Non-Operating Expenditures

Summary³¹

The City identified restructuring and reinvestment initiatives by department that are essential to the revitalization of Detroit and the provision of essential municipal services. The City has identified \$1.7 billion of reinvestment initiatives to be undertaken during the next ten years, provided funding is available to do so. This section focuses on the underlying assumptions in the RRIs and certain other non-operating expenditures that are reflected in the POA projections. The total RRIs and non-operating expenditures are summarized below:

³¹ Unless otherwise stated the financial projections referenced in section H are sourced from bibliography: Conway Mackenzie Models: 28-54 and Ernst & Young Models 10-11.

General Fund	FY2	014-2023	FY2	2014-2023	FY	2014-2023	FY2	2014-2023
Operating Surplus Prior to Legacy, Non Operating Expenses and RRI's	\$	2,781	\$	2,054	\$	1,788	\$	1,434
Reinvestment Initiatives								
Department revenue initiatives	\$	483	\$	586	\$	715	\$	871
Less:								
Additional operating expenditures	\$	357	\$	359	\$	438	\$	534
Capital investments	\$	582	\$	443	\$	501	\$	605
Blight	\$	420	\$	-	\$	-	\$	-
Reinvestment Deferrals	\$	(30)	\$	(223)	\$	11	\$	242
Total Reinvesment Expenditures	\$	1,330	\$	579	\$	950	\$	1,381
Other Non Operating Expenses								
Less:

Total Non Operating Expenses	\$	1,179	\$	624	\$	211	\$	173
Funds Available for Unsecured Claims	\$	755	\$	1,437	\$	1,342	\$	752

The RRIs were developed by department by CM, and identify capital investments, additional labor and other operating expenses that are needed to ensure that each City department is providing a basic level of service for Detroit residents. In addition, the City identified revenue enhancing initiatives as part of its departmental reviews. The chart below highlights the RRIs by category:

Revenue	2	2014	2	2015	2	016	2	2017	2	2018	2	2019	2	2020	2	2021	2	2022	2	2023	10	Year Total

Revenue Initiatives

The City identified \$483 million in additional revenue over the 10 year period that could be available to the City if it implements the RRIs effectively. The largest sources of additional revenue include: increasing service and fares for DDOT, increasing the volume and dollar amount of parking tickets and collecting income taxes and various civil fines at a faster rate. The revenue initiatives also include \$52 million from the Hardest Hit Fund and other grants that the City has identified that were not in the baseline 10 Yr projections. The chart below highlights the revenue initiatives:

Revenue Initiative	2014	20	015	20	016	2	017	20)18	20)19	2	020	20	21	20	022	2	023	10	Year Total

Total Revenue Initiatives	\$7.2	\$8	38.0	\$4	15.1	\$4	49.7	\$ 5	52.9	\$4	12.5	\$4	46.9	\$4	6.8	\$5	51.3	\$	52.5	\$	482.9

DDOT is expecting to increase the number of buses in service from 282 in FY2013 to 394 in FY2023. In addition, the City is projecting total miles to increase from 12.1 million miles in FY2013 to 16.5 million miles in FY2023. The increase in mileage is expected to increase revenue by \$47 million over the ten year period and is dependent on obtaining new buses, which are grant funded, and increasing the number of routes.

The City is also projecting increased revenue as a result of fare price increases. The City has not had a fare price increase in the last 8 years. The following table shows the projected fare increases for DDOT:

Year	Far	e Price	YoY Change
2013	\$	1.50	0.0%
2014	\$	1.50	0.0%
2015	\$	1.50	0.0%
2016	\$	1.75	16.7%
2017	\$	1.75	0.0%
2018	\$	2.00	14.3%
2019	\$	2.00	0.0%
2020	\$	2.25	12.5%
2021	\$	2.25	0.0%
2022	\$	2.50	11.1%
2023	\$	2.50	0.0%

The City took into account decreased ridership at each fare price increase, assuming ridership would decrease 2% for every 10% increase in fares. The

increased revenue associated with the fare increases, minus the reduced ridership, results in a total revenue increase over the ten year period of \$70 million.

The City is projecting it will be able to collect an additional \$74 million as a result of better collections of civil fines and infractions. The City currently collects infractions at a 36% rate. The City is projecting it will increase collections from 36% in 2013 to 56.8% in 2023 leading to the additional \$74 million in revenue over the ten year period. The City believes this collection rate is achievable as the regional average is currently 65% which includes Detroit's low collection rate. The City has identified a few initiatives that will help improve collections including increased access to ATM's at the Court and improved operating systems and business processes.

The Emergency Manager implemented increases to parking ticket fines on April 3, 2014³². The City has long lagged comparable municipalities in this regard³³. The recent increase in the parking fines, in addition to additional parking officers, is expected to increase revenue by \$60 million over the ten year period.

The Finance department has identified a number of initiatives to improve the collection of income taxes. These include additional staffing, targeting non-

³² See Emergency Manager City of Detroit Order Number 24

³³ See PVB Revenue Enhancement White Paper dated December 9, 2013.

residents working in Detroit and using outside services. The initiatives are expected to generate an additional \$47 million over the ten year period.

The Fire department is expecting to collect additional revenue as a result of 9 new ambulances, additional Fire Marshalls and cross training fire fighters to do Fire Marshall and EMS work. The initiatives are expected to generate \$34 million in revenue over the ten years. The Fire department, along with the Police department, expects to increase revenues by billing services that have not been billed in the past. These new billings represent \$26 million in additional revenue over the ten year

Operating Expenditures

The City is projecting it will incur an additional \$357 million in operating expenditures in the next 10 years related to the RRIs. This does not include \$420 million estimated for Blight over the next ten years. Blight is discussed separately in section L of this Report.

Labor

The largest component of additional operating expense over the ten year period is permanent labor which totals \$186 million and represents 52% of the additional operating expenditures. Below is a summary of the labor increase:

Labor	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Te	n Year Total
New Labor due to Incremental Headcount	\$ 5.5	\$ 27.6	\$ 31.7	\$ 35.6	\$ 34.4	\$ 32.2	\$ 32.2	\$ 31.1	\$ 31.2	\$ 30.7	\$	292.2

Total General Funds	5,940	539	6,479	7,718	(1,239)	-19.1%

After accounting for the additional employees in the reinvestment initiatives, the City is still operating with 19% fewer employees than the 5 year average from FY2008-2012. The largest increases in employees occur in Transportation, Police,

Fire, Finance and the General Services departments:

- The 163 additional employees at DDOT include 35 additional uniformed employees to increase safety on buses, and additional bus drivers for additional routes
- The Police department is estimating 250 additional civilian personnel in FY2015 which will allow the City to redeploy uniformed personnel to police activities
- The Fire department expects to hire new fire fighters to provide adequate levels of service to the City. These fire fighters will be cross trained to improve efficiency and reduce overtime in the department

- The Finance department expects to hire an additional 112 employees as it identifies ways to operate more efficiently, identify new grant revenue and collect taxes at a faster pace
- General Services expects to hire an additional 112 employees primarily related to facilities and park maintenance.

The City forecasts incremental labor costs by identifying the positions to be added or eliminated and estimating the salary for those positions. Going forward the City assumed the same year over year incremental salary increases per employee as were projected in the base model. Over the ten year period the City expects incremental salaries and wages to increase \$292 million due to the RRIs. The chart below summarizes incremental labor costs by department:

Incremental Salary & Wages	20	014	2	015	2	016	2	017	2	018	2	019	2	020	2	021	2	022	2	023	Т	en Year Total

Non-Departmental (36D Initiatives)	\$	-	\$	(0.3)	\$	(0.7)	\$	(0.8)	\$	(0.8)	\$	(0.8)	\$	(0.8)	\$	(0.8)	\$	(0.8)	\$	(0.9)	\$	(6.7)
Total Incremental Salary and Wages	\$	5.5	\$	27.6	\$	31.7	\$	35.6	\$	34.4	\$	32.2	\$	32.2	\$	31.1	\$	31.2	\$	30.7	\$	292.2

In the base model, the City assumes that overtime remains at the FY 2013 level as a percentage of payroll. The City assumes that the incremental employees

hired as a result of the RRIs do not increase or decrease the overtime assumed in the

base model with the following exceptions:

- Fire department overtime decreases by \$2 million over the ten year period and further savings of \$6.3 million occur due to reaching adequate staffing levels
- DDOT assumes \$48.7 million in overtime savings over the 10 year period as new buses are added to the fleet, maintenance on old buses decreases, overtime is reduced considerably. In addition, new safety cameras and additional police staff should increase driver and rider safety, thereby decreasing driver absenteeism and resulting in decreased overtime

The decrease in overtime at DDOT is a key assumption over the next ten years

as the City provides a subsidy to DDOT. The analysis below highlights the projected overtime in gross dollars and as a percentage of payroll for both the base model and the added employees and the decreased overtime from the RRIs:

DDOT Consolidated Payroll and Overtime	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Total
Total Payroll Base Model	\$ 30.1	\$ 33.9	\$ 34.4	\$ 35.3	\$ 36.1	\$ 37.1	\$ 37.8	\$ 38.5	\$ 39.3	\$ 40.1	\$ 362.6
Total Overtime Base Model	\$ 12.0	\$ 13.5	\$ 13.8	\$ 14.1	\$ 14.5	\$ 14.8	\$ 15.1	\$ 15.4	\$ 15.7	\$ 16.0	\$ 145.0
As a %of Payroll	40.0%	40.0%	<u>40.0%</u>	40.0%	<u>40.0%</u>						
New Payroll	\$ 0.1	\$ 1.9	2.2	\$ 3.3	\$ 3.7	3.8	\$ 3.9	\$ 4.1	\$ 4.4	\$ 4.7	\$
Overtime Savings	\$ -	\$ (1.0)	\$ (5.6)	\$ (5.6)	\$ (5.7)	\$ (5.8)	\$ (6.0)	\$ (6.1)	\$ (6.1)	\$ (6.7)	\$ (48.7)
Consolidated DDOT Payroll	\$ 30.2	\$ 35.7	\$ 36.6	\$ 38.6	\$ 39.8	\$ 40.9	\$ 41.7	\$ 42.6	\$ 43.7	\$ 44.8	\$ 394.7
Consolidated Overtime	\$ 12.0	\$ 12.6	\$ 8.2	\$ 8.5	\$ 8.7	\$ 9.0	\$ 9.1	\$ 9.3	\$ 9.6	\$ 9.3	\$ 96.3
As a % of Payroll	<mark>39.</mark> 8%	35.2%	22.3%	21.9%	21.9%	22.0%	21.8%	21.9%	22.0%	20.8%	24.4%

The City is expecting overtime for DDOT to decrease from its baseline estimate of 40% to 20.8% by FY2023. If the City is unsuccessful in decreasing overtime and overtime remains at 40% of payroll, the subsidy would be \$61 million higher than currently projected over the ten years. Prior to the July 2nd projections, the City reexamined the projections for salaries and wages for new hires in the Police and Fire departments in the baseline 10 Yr projections. In the May 5th projections the City assumed all new hires would be at the average salary of the department. In reality, the new entry level employees hired will likely be at a much lower pay scale. Recalculating the actual salaries for these new employees in the baseline model results in \$48.5 million³⁵ in total savings for the ten year period:

Recalc of Police and Fire Base Model Hires	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	10 Year Total
Police	\$ -	\$ (1.1)	\$ (6.1)	\$ (3.5)	\$ (2.7)	\$ (1.9)	\$ (0.9)	\$ (0.2)	\$ (0.2)	\$ (0.2)	\$ (16.7)
Fire	\$ (2.9)	\$ (3.0)	\$ (3.0)	\$ (3.1)	\$ (3.1)	\$ (3.2)	\$ (3.3)	\$ (3.4)	\$ (3.4)	\$ (3.5)	\$ (31.8)
Total Add Backs for Pay Difference	\$ (2.9)	\$ (4.1)	\$ (9.1)	\$ (6.5)	\$ (5.8)	\$ (5.1)	\$ (4.2)	\$ (3.6)	\$ (3.6)	\$ (3.6)	\$ (48.5)

Professionals and Contractual Services

The City is projecting a \$10 million decrease in professional and contractual services over the 10 Yr projections. The savings are primarily related to the Income Tax department implementing CityTax and the need for less outside employment.

³⁵ The reduced costs associated with the changes in assumptions for the Police and Fire departments in this section do not include additional add backs for benefits which are \$5.8 million and \$13.3 million for the Police and Fire departments, respectively, and are included in the benefits section. Total reduced costs for the recalculation including salary, overtime and benefits is \$67.7 million for the two departments.

Benefits

The City estimated benefits using the following percentage of payroll projections:

Incremental Benefits as a % of Payroll	% of Payroll
Police	40.5%
Fire	42.0%
General Services	45.0%
DDOT - Transportation	49.2%

Using the above rates, the City estimates an additional \$105.1 million in benefits for employees hired as part of the RRIs:

Incremental Benefits	2	014	2	015	2	016	2	017	2	018	2	.019	2	2020	2	021	2	022	2	023	T	en Year Total

Buildings and Safety	\$	0.0	\$	0.0	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.1)
Elections	\$	-	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.0)	\$	(0.2)
City Clerk	\$	-	\$	(0.1)	\$	(0.1)	\$	(0.1)	\$	(0.1)	\$	(0.1)	\$	(0.1)	\$	(0.1)	\$	(0.1)	\$	(0.1)	\$	(0.7)
Non-Departmental (36D Initiatives)	\$	-	\$	(0.2)	\$	(0.3)	\$	(0.3)	\$	(0.3)	\$	(0.4)	\$	(0.4)	\$	(0.4)	\$	(0.4)	\$	(0.4)	\$	(3.0)
Total Incremental Benefits	\$	1.3	\$	10.2	\$	10.2	\$	12.7	\$	12.6	\$	11.8	\$	11.9	\$	11.6	\$	11.5	\$	11.3	\$	105.1

The City took a conservative approach to estimating benefits in its RRIs by using higher percentages of payroll estimates than those used in the baseline forecasts:

Benefits as a % of Payroll	2015	2016	2017	2018	2019	2020	2021	2022	2023
Police	34.0%	35.1%	35.9%	36.7%	37.3%	37.7%	38.1%	38.5%	38.9%
Fire	37.0%	38.0%	38.7%	39.5%	40.0%	40.4%	40.7%	41.1%	41.5%
DDOT	44.4%	47.3%	49.8%	51.4%	52.4%	53.0%	53.7%	54.5%	55.3%
Non Uniform	39.2%	40.2%	41.0%	41.7%	42.4%	42.7%	43.1%	43.5%	43.8%

Training

The City is projecting \$54.4 million in training expenditures over the next ten years, beginning in mid FY2015. The estimate includes \$2,000 per employee per year for all non-uniform City employees through FY2017 and \$1,500 per employee per year after FY2017. The City also assumes \$600,000 in yearly city-wide Human Resources training beginning in FY2016. Fire department training to cross train employees and meet minimum grant standards is projected to be \$13.3 million during the time period. Below is a breakdown of training expenditures over the ten years:

Training	20)14	2015	2016	2017	2018	2019	2020	2021	2022	2023	Ten	Year Total
Employee Training	\$	0.0	\$ 3.2	\$ 4.9	\$ 4.1	\$ 4.1	\$ 4.0	\$ 4.0	\$ 4.0	\$ 4.0	\$ 4.0	\$	36.3
Fire Training	\$	0.3	\$ 4.1	\$ 3.7	\$ 1.6	\$ 0.7	\$ 0.6	\$ 0.5	\$ 0.6	\$ 0.7	\$ 0.4	\$	13.3
HR Training	\$	-	\$ -	\$ 0.6	\$	4.8							
Total Training	\$	0.3	\$ 7.3	\$ 9.2	\$ 6.3	\$ 5.4	\$ 5.2	\$ 5.1	\$ 5.2	\$ 5.3	\$ 5.0	\$	54.4

Materials & Supplies

The City expects to spend \$87.1 million in additional materials and supplies related to the RRIs. The largest component is an additional \$65.1 million needed by the General Services department to repair city buildings and to provide adequate

levels of service to the City's operating departments. In addition the City expects to spend \$37.4 million on materials and supplies due to the additional routes projected by DDOT. The Police department expects to spend \$16.2 million on vests, improvements in technology and various other supplies.

The total additional expenditures related to materials and supplies are offset by \$35.8 million of projected cost savings from consolidation of vendors, improved department staffing and process related enhancements. Below is a breakdown of the projected increase in materials and supplies:

Materials and Supplies	2	014	2	015	20)16	2	017	2018		2019	2020	2021	2	022	2	023	Te	n Year Total

Risk Management & Insurance

The City is projecting \$50.7 million in savings related to risk management and insurance. The savings are projected as a result of reduced workers comp payments due to an improved risk management function and better claims processing. In addition, the City projects \$2 million of yearly savings due to a reduction in lawsuits through improved risk management. Below is a summary:

Risk Management and Insurance	20	014	2015	2	016	2	017	2	018	2	019	2	020	2	021	2	022	2	023	T	en Year Total
Workers Comp Savings	\$	-	\$ -	\$	(4.0)	\$	(4.0)	\$	(4.0)	\$	(4.0)	\$	(4.0)	\$	(4.0)	\$	(4.0)	\$	(4.0)	\$	(32.0)
Reduction in Lawsuits	\$	-	\$ (2.0)	\$	(2.0)	\$	(2.0)	\$	(2.0)	\$	(2.0)	\$	(2.0)	\$	(2.0)	\$	(2.0)	\$	(2.0)	\$	(18.0)

Other Operating Expenditures

Other operating expenditures over the ten year period include:

- Utilities: \$2.6 million in additional costs projected by the General Services department
- Purchased Services:
 - \$4.5 million in savings related to \$6.75 million less outside legal costs due to additional labor in the Law department
 - \$5.7 million in savings due to less involvement from consultants in the Finance department
 - \$1.1 million in additional expenditures related to additional DDOT miles
 - \$1.9 million in additional outside services in the Police department
 - \$1.7 million for storage and maintenance of medical records due to the outsourcing of the Health and Wellness department
 - \$1.3 million in additional actuarial and benefit consulting
 - \$1.2 million in security and planning related to the Airport department.
- Grants: \$20.3 million in grant related costs associated with the Hardest Hit Fund from FY2014-2016
- Other Expenses:
 - \$17.4 million in other savings as a result of the Neighborhood and Lean Process Improvement Program
 - \$7.1 million in costs in the Police department mostly related to new facilities

Reorganization/Investment

The City is projecting it will incur an additional \$582 million in capital expenditures and infrastructure improvements in the next 10 years to improve the City's level of services. The City views these initiatives as critical components in stabilizing the City and attracting and retaining quality employees for the City of Detroit.

Technology & Infrastructure

The City's IT department has been underfunded for many years and is in need of a significant upgrade to its operating systems, software and hardware. The City expects to undertake a number of initiatives to improve the current systems in place including:

- \$29 million related to a new ERP System which includes both installation and annual maintenance to improve the City's financial processes and reporting
- \$11.7 million related to City wide hardware upgrades
- \$10.9 million related to data backup centers
- \$10.4 million related to the City-wide installation of Microsoft 365
- \$5.2 million related to the implementation of CityTax

Other significant investments which will provide better services to the citizens of the Detroit include the installation and implementation of a new 311 system, implementation of an integrated public safety system and replacement of handheld Police radios. Below is a breakdown of key IT and infrastructure investments over the next ten years:

IT and Infrastructure	Department	20	014	2	015	2	016	2	017	2	018	2	019	2	020	2	021	2	022	2	023	Ten	Year Total

Capital Expenditures

The City has identified a number of facility-related capital expenditures including current facility repairs and new or replacement facilities, some of which are itemized below.

- \$40.3 million for repairs and space consolidation across all City buildings
- \$37 million for facility improvements and emergency repairs to the various parks and recreation centers

- \$34.2 million for a new Police training facility, new precincts and various improvements to current buildings
- \$71.3 million for Fire department improvements including \$31.2 million in repairs and maintenance to current firehouses, \$21 million for 7 new firehouses and \$19 million in new gear and equipment
- \$15.7 million in required airport upgrades by the Department of Transportation
- \$10.3 million in system and equipment upgrades for DDOT that are not grant funded.

The chart below details the capital expenditures the City is projecting over the ten

year period:

Capital Expenditures	Department	2	014	2	2015	2	2016	2	2017	2	018	2	019	2	020	2	021	2	022	2	023	Ter	n Year Total

Fleet

The City reviewed the current condition of vehicles in the Police, Fire, GSD and Parking departments. The City projected the number of vehicles needed by department to supply adequate levels of service to the City. The City then projected the cost per vehicle and projected life cycles for each vehicle to determine the yearly number of vehicles to be purchased and the related cost.

- The Police Department projects an average life cycle of 3.5 years resulting in 270 new scout cars costing \$91.3 million over the next ten years
- Fleet purchases for the Fire Department include \$40 million for new purchases and \$18.6 million for repairs of their current fleet
- The General Services department projects spending \$6.4 million over the next ten years on purchases of new vehicles and equipment and \$9.7 million on upgrades to City owned parks
- The Parking Department expects to spend \$1.4 million over the next ten on vehicles

The chart below outlines fleet spending over the ten year period:

Fleet	De partme nt	2	014	2	2015	2	016	2	017	2	2018	2	019	2	020	2	2021	2	022	2	2023	Ten Y	'ear Total
Fleet replacement - Police	Police	\$	-	\$	9.5	\$	11.7	\$	10.0	\$	10.0	\$	10.0	\$	10.0	\$	10.0	\$	10.0	\$	10.0	\$	91.3

Total Fleet		\$	8.3	\$	25.8	\$	24.0	\$	19.1	\$	16.4	\$	15.7	\$	15.8	\$	15.2	\$	13.7	\$	13.4	\$	167.4

Reorganization

The City is expecting to incur various expenses related to implementing the

RRIs. These are generally one-time expenses and include:

- \$15.4 million in costs related to reassessing and revaluing all properties in the City
- \$10.2 million related to outside services for strategic planning, facility consolidation and zoning activities
- \$3.7 million for contract employees at the 36th District Court related to restructuring initiatives.

Reinvestment Deferrals

As the City negotiated settlements with creditors and stakeholders, proposed POA payments have taken priority over RRI spending in the near term. As a result, there has been a need to permanently or temporarily defer RRIs in order to maintain adequate levels of liquidity to fund operations and meet the obligations proposed in the POA. The updated July 2nd projections identify all but \$29.8 million of the deferrals as to the individual RRI and the timing. In general, the City sought to defer RRIs that would have the least impact on future revenue and cost savings. If the City enters into additional settlements with creditors, it is likely that additional RRI deferrals will be necessary.

Non Operating Expenditures

The City projected a number of necessary non-operating expenditures in the POA projections. These include one-time costs associated with the chapter 9, decommission of the City's power plants, payments required in the POA and a 1% contingency, among other items. These expenses are detailed below:

Other Non Operating Expenses	10 Y	ear Total
Professional Fees	\$	130
PLD Decommission	\$	75
Working Capital	\$	25
Contributions to Income Stabilization Fund	\$	18
Secured Debt	\$	391
QOL Exit Financing	\$	336
Swap Interest	\$	104
Contingency	\$	101
Total Non Operating Expenses	\$	1,179

Professional Fees

The City projected professional fees for the various constituents involved in the Chapter 9 case. The City projected \$82.2 million and \$47.8 million in professional fees in for FY2014 and FY2015 respectively. The City assumes at the time of emergence the professional fees for the majority of the firms projected will be discontinued. The chart below highlights the professional fees by firm:

Professional Fees	2	014	2	2015	2	016	2	017	20)18	20)19	20	020	20)21	20	022	2	023	Ten	Year Total

Total Professional fees	\$	82.2	\$	47.8	\$	-	\$	-	\$	-	\$	-	\$	-	\$	-	\$	-	\$	-	\$	130.0

PLD Decommission

Street lights will be transitioned to the Public Lighting Authority during FY2015-2023. The City estimates approximately \$75 million over a ten year period in decommission expenses. The City assumed \$2.4 million for each of its 31 substations. Below are expected expenditures per year:

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Ten Yea	r Total
PLD Decommission	\$ -	\$ 2.5	\$ 5.0	\$ 15.0	\$ 10.0	\$ 10.0	\$ 10.0	\$ 12.5	\$ 10.0	\$ -	\$	75.0

Working Capital

The City estimates additional expenditures related to working capital in FY2014 of \$39.9 million primarily related to past due vendor payments. This amount is offset by \$20 million in proceeds from a bond escrow fund. The chart below identifies the working capital impact over the next 2 years.

Identified risks and opportunities to 10-year plan	2	2014	2015]	Fotal
Higher Transportation Dept (DDOT) operating subsidy in CF	\$	2.0	\$ 5.0	\$	7.0
Accounts payable vendor risk in CF	\$	30.0	\$ -	\$	30.0
Cash escrow reserve requirement for self-insurance	\$	7.8	\$ -	\$	7.8
Refunding bond proceeds drawn from escrow	\$	-	\$ (20.0)	\$	(20.0)
Total	\$	39.8	\$ (15.0)	\$	24.8

Income Stabilization Fund

The Income Stabilization Fund is the result of negotiations between the City and the PFRS and GRS. \$20 million will be paid to pensioners that meet the following criteria:

- Eligible pensioner's total household income is equal to 130% of the federal poverty Level in 2013 or:
- The annual pension benefit payment payable to each eligible pensioner equals 100% of the annual pension benefit payment actually received by the eligible pensioner in 2013, whichever amount is lower.

The payments will be made over a 14 year period from excess funds from the UTGO property Tax Millage after accounting for UTGO Secured debt payments and Note A UTGO debt payments. Below highlights the projected payments over the ten year period:

	2	015	2	016	2	017	2	018	2	019	2	020	2	021	2	022	2	023	Ten	Year Total
Income Stabilization Fund	\$	2.5	\$	2.3	\$	2.3	\$	2.2	\$	2.1	\$	2.1	\$	2.0	\$	1.3	\$	1.1	\$	17.8

Secured Debt

The City projects debt payments for secured debt to continue to be paid via the same amortization schedules used prior to filing Chapter 9. Below is the detailed amortization schedule for each tranche of debt:

	2014	2	015	20	016	2	2017	2	018	2	2019	2	2020	2	2021	2	2022	1	2023	Te	n Year Total

Quality of Life/Exit Financing

The City plans to draw down \$292.7 million on its \$300 million Exit Facility by the end of FY2016. The current quality of life loan is expected to be refinanced as part of the exit facility at the emergence of bankruptcy. The Exit Facility bears interest at 6% and matures in 2026. The City begins to make principal payments on the loan starting in 2019.

Swap Interest

The City assumes the agreed upon settlement of the PFRS and GRS Swaps of \$85 million at emergence from bankruptcy. The City has continued to make quarterly swap payments while in bankruptcy. The payments made to date will be deducted from the final payment made at settlement. Below are the projected payments in FY2014 and FY2015 and reconciliation of the final payment assumed to occur in October 2014:

	2	2014	2	2015]	Total
POC Swaps						
PFRS Interest	\$	29.6	\$	10.2	\$	39.8
GRS Interest	\$	16.3	\$	5.5	\$	21.9
POC Swap Payment	\$	45.9	\$	15.7	\$	61.6
Swap Settlement			\$	42.1	\$	42.1
Total Swap Payments	\$	45.9	\$	57.8	\$	103.8

Reconciliation of Final Payment	Total
Settlement	\$ 85.0
FY14 int. payments (Post Bankruptcy)	\$ 27.2
FY15 Int. payments (Prior to Emergence from Bankruptcy)	\$ 15.7
Bulk payment in Oct, 2014	\$ 42.1

Contingency

The City assumed a yearly contingency estimate of 1% of total revenue. Total revenue includes revenue from the base plan, revenue from the RRIs and proceeds from the Exit Facility. Total contingency is \$101 million over the ten year period. Public Acts 181 and 182 of 2014, part of the so called Grand Bargain legislation requires a contingency of not less than 5% of projected expenses in each year. This difference in the amount of contingency is approximately \$40 million in FY2015.

Section I - Systems, Controls and Reporting

Introduction

"The effective use of technology is an essential foundation of a modern, efficient and effective government, and that absent a modernized IT infrastructure, a city is unable to adequately deliver government services for the public."³⁶

This quote is from Beth Niblock's Report filed in connection with the Detroit bankruptcy. Ms. Niblock, the City of Detroit's Chief Information Officer, also concludes in her report that: "The City's information technology is deficient".³⁷ I agree that a working technological platform allows the City to properly operate. I also believe that the City's IT infrastructure is so broken that, left unaddressed, threatens the City's ability to meet the commitments in the POA. The City's current technology infrastructure problems are the direct result of long term, systematic underfunding and lack of leadership.

³⁶ Report of Beth Niblock, Chief Information Officer for the City of Detroit; in re: City of Detroit, para 6 page 3.

³⁷ Report of Beth Niblock, Chief Information Officer for the City of Detroit; in re: City of Detroit, para 4.A. page 3.

Nowhere is this failure as evident as it is in the City's Finance departments.

The lack of accounting and financial information systems confounds virtually every City operation and makes it difficult to perform even basic analysis or performance monitoring. The Emergency Manager's description below provides a realistic picture of the City's current systems:

"The City's core financial, accounting and budgeting systems similarly suffer from the lack of modern IT. The City's financial reporting and budget development systems: (a) are 10 to 15 years old; (b) require a manual interface (70% of journal entries are booked manually); (c) lack reliable fail-over and back-up systems; and (d) lack a formal, documented IT governance structure, all of which impairs the reporting, efficiency and accuracy of the data and the accountability of the systems. The City's grant tracking systems are fragmented and unstandardized to the extent that the City is unable to comprehensively track citywide grant funds and status or prevent disallowed costs. Aged IT infrastructure within the City's Buildings, Safety Engineering and Environmental Department ("BSEED") and the DFD leads to bottlenecks in permit invoicing and collections...."³⁸

These issues will not be addressed overnight, nor will they be easy. The funding, implementation, and management of new information and reporting systems are critical to adequately deliver government services to the public. The City has accumulated dozens of non-integrated systems which make it impossible to obtain the timely and reliable systemic information necessary for efficient operations and informed decision making. The remainder of this section will discuss some

³⁸ Declaration of Kevyn Orr in Support of City of Detroit, Michigan's Statement of Qualifications Pursuant to Section 109 (c) of the Bankruptcy Code. Page 30, para 41.

particular challenges with accounting and financial controls and reporting and conclude with a discussion of the broader issues surrounding the investments the City must make in IT.

Accounting Controls and Processes

Of all of the measurable impacts of the City's IT, Accounting Control and Reporting problems, perhaps the most visible is the impact on the City's financial reporting, which affects the ability of City leaders and department heads to make real time, informed decisions. In the City's 2012 Independent Auditors Report, KMPG states:

"Although the City of Detroit (City) has made incremental improvement in their financial closing and reporting processes, deficiencies still exist in the processes to evaluate accounts, and timely record entries into the general ledger in a complete and accurate manner"³⁹

Historically, the City has not performed monthly closings or published monthly financial statements. The City's accounting "closing" process is so inefficient that recent attempts the City has made to implement a monthly General Ledger ("G/L") closing and financial statement preparation process have failed.

³⁹ Independent Auditors' Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards, KPMG, 2012, Pg 3

Going forward, I believe the City needs to prioritize monthly financial reporting against the City's budget. A monthly closing process will enable the City's leaders to make the continuous large and small adjustments needed to promote directional compliance with the Plan.

KPMG has determined the City's system of internal accounting controls and procedures are so weak that KPMG cannot rely on them when performing the yearend audit. The ineffectiveness of the current financial systems does not allow the City to internally perform essential daily tasks such as account reconciliations, bank reconciliations, and account analysis, which are the cornerstones of good accounting controls. Rather, these activities are performed once a year by outside consultants as part of preparation for the annual audit process. To that end, KPMG performs substantive testing of all accounts to its materiality threshold in order to render an opinion on the City's financial statements and explains why it takes the City about twelve months to prepare fiscal year-end financial reports.

Financial Reporting

Perhaps the only standardized financial reporting that the City undertakes is the development of the Comprehensive Annual Financial Report ("CAFR") which is promulgated by the Government Finance Officers Association. The CAFR is essentially a comprehensive look at the City's financial position and performance. The City's CAFR for the fiscal year ended June 30, 2013 has not been released as of the date of this Report.

Another of the City's major reporting tasks is performed by Ernst & Young. E&Y prepares daily, weekly and monthly reports of cash, revenues, and expenditures. These reports track the City's available cash using bank statements and numerous other City documents that report one or more cash activities. These reports are independently generated and are not reconciled to the City's general ledger system through account reconciliations or bank reconciliations. These E&Y reports are consolidated for multiple accounting periods, as well as reported separately in other City reports including those of the Emergency Manager. The current cash management and cash reporting system has been managed by E&Y personnel since before the appointment of the Emergency Manager. It is my understanding that the City has not budgeted for E&Y continuing in this role after confirmation, nor has the City made accommodations to take over this work from E&Y. This is an unacceptable risk to the success of the POA and the City must identify and fund a solution for both the near term and longer term.

Whenever contemporaneous financial information is required, the City has no choice but to rely on the incomplete and unreliable financial data from the G/L system. As such, external reports such as the Emergency Manager's reports to Financial Advisory Board contain necessary disclaimers such as:

"The revenues and expenditures report includes entries that have not been posted in the general ledger and encumbrances. This manner of presentation provides the most up to date data on revenues and expenditures. Unposted entries are preliminary and subject to review before they are finalized; therefore, actual results will likely be different from the preliminary results presented herein, and those differences may be material."⁴⁰

Potential Plan Implications

Beyond financial reporting, the efficient and controlled execution of the accounting and finance functions are essential to achieving the financial initiatives set forth in the Plan. Some of the most important assumptions in the POA depend on improving the accounting and finance function within the City. For example:

- <u>Municipal Income Taxes</u>: the City processes and audits income tax returns, and collects income tax revenues which account for 25% of the City's revenue in FY2014-2023
- <u>Purchasing</u>: the City's purchasing function manages the City's contracts for all commodities and services which are forecasted to total \$3 billion in the next ten years
- <u>Property Taxes</u>: The assessor's office creates the tax rolls used to invoice citizens and commercial customers for real estate taxes which are estimated to account for 9% of the City's revenue in FY2014-2023 and the Treasury department is responsible for the billing and collection function

⁴⁰ Emergency Manager's report

• <u>Grants</u>: Grant funding is expected to increase in the City going forward. In fact, there are additional opportunities for the City to acquire grants if it can responsibly manage and account for them. The City has failed to properly account for and manage grants in the past which has led to improperly spent funds. The City can benefit by tens of millions of dollars if this process is improved

The diminished capacity of these finance departments to execute their basic functions is a result of attrition and an historic failure to invest in people and systems. If the City does not build internal capacity in its finance and accounting functions in a timely fashion, it could threaten the execution of the POA.

Information Technology

The City, as detailed in the Plan, is addressing its system issues with a number of major initiatives funded as part of the RRIs. These IT-related initiatives include:

- \$29 million related to a new Enterprise Resource Planning ("ERP") system, which includes both the installation and annual maintenance to improve the City's financial processes and reporting.
- \$11.7 million related to City-wide hardware upgrades.
- \$10.9 million related to Data Back Up centers.
- \$10.4 million related to the City-wide installation of Microsoft 365.
- \$5.2 million related to the implementation of City Tax.

While the IT department expects to spend almost \$85 million on restructuring initiatives over the next 10 years, the total investment in IT related expenses by the City is upwards of \$150 million. It should be noted that this figure does not include

a budget of \$3 million for the implementation of a replacement payroll system, which is included in E&Y's base line financial projections. We believe the City would benefit with a more centralized control over all IT related investments. The following chart details the significant IT-related restructuring initiatives out of each of the departmental RRIs:

IT and Infrastructure	De partme nt	2	014	2	015	2	016	2	017	2	018	2	019	2	020	2	021	2	022	2	023	Ter	n Year Total

These initiatives are a significant investment and present an opportunity for the City to improve services and functionality throughout its operations. However, to enhance the City's ability to execute the proposals within the POA, the City will need to manage the execution of the IT initiatives at the most senior level in the City and make sure that it reacts to any material deviations - from cost or timeline - in the implementations.

According to CFO John Hill, the City's strategy to correct this catastrophic decline in essential finance, accounting and IT services has three major components:

- Implement a new payroll system and restructure the existing payroll reporting structure
- Implement a new integrated ERP system without customization accompanied by the implementation of the ERP's "best practices" polices and business processing procedures
- Restructure the existing organization structure, processes and controls.

Replacing the payroll system is considered to be of the highest priority by everyone we spoke with. Under the existing organization structure, payroll processing reports operationally to the Human Resources department. The Payroll system technology is under the jurisdiction of the City's IT department. Under the envisioned Finance and Accounting reorganization, payroll processing would report to the CFO, as it should.

The second part of this major undertaking is to implement a new, integrated ERP system along with established "Best Practices" for policies, procedures and business processes. The City's IT department will have overall responsibility for the implementation forecasted to take approximately 2-3 years and cost approximately \$29 million.⁴¹ The objective will be to replace the existing Oracle ERP system with an updated, integrated ERP system that will:

- Replace various standalone Finance and Accounting systems
- Eliminate the manual loading of data coming from other stand-alone systems as is done with the current Oracle ERP system
- Improve efficiencies and implement strong systematic internal controls

⁴¹ Per the Conway McKenzie IT restructuring budget.

• Ensure an interim closing process and preparation of interim financial statements and other reporting necessary for the City to manage its financial affairs

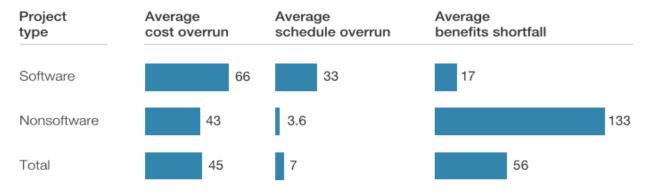

The City believes that it will take several years to implement a new ERP system and, in the interim, the City will have to rely on the existing systems. Although many of the inefficiencies and control weaknesses cannot be eliminated, the City believes the main ERP weaknesses can be mitigated by strengthening the organizational structure and hiring employees with enhanced skill sets at all levels and functions, but primarily mid-tier management. John Hill described the City's strategy as:

- Restructure the Organization to establish better functionality
 - o Implement a flatter, functionally-orientated organization chart
 - Strengthen mid-tier managers to provide better supervision and accountability
 - Establish centralized governance of City-wide Finance and Accounting functions with the CFO or alternative centralized governing body
 - Establish centralized governance of City-wide IT functions with the CIO or alternative centralized governing body.
- Revise and upgrade job descriptions and applicant skill set requirements and qualifications
- Update the City's outdated and uncompetitive compensation structure to enable the City to attract and retain qualified employees
- Implement new recruiting processes
- Implement initiatives aimed at correcting major deficiencies in each department's existing systems and procedures

Risk of Failure

The above strategy was created to help ensure the successful implementation of the IT system initiatives. Large IT systems initiatives have historically contained an inherent risk. McKinsey & Co. notes that:

As IT systems become an important competitive element in many industries, technology projects are getting larger, touching more parts of the organization, and posing a risk to the company if something goes wrong. Unfortunately, things often do go wrong. Our research, conducted in collaboration with the University of Oxford, suggests that half of all large IT projects—defined as those with initial price tags exceeding \$15 million—massively blow their budgets. On average, large IT projects run 45 percent over budget and 7 percent over time, while delivering 56 percent less value than predicted. Software projects run the highest risk of cost and schedule overruns

% of IT projects with given issue (for those with budgets >\$15 million in 2010 dollars)

Source: McKinsey–Oxford study on reference-class forecasting for IT projects

The root causes of cost overruns in IT systems implementations for projects over \$15 million include: unclear objectives and lack of business focus, shifting

requirements and technical complexity, unaligned teams, lack of skills, unrealistic schedule and reactive planning.⁴²

Impact on Feasibility

The risks associated with the IT initiatives alone, warrant additional financial contingency beyond the general 1% assumption in the POA projections. Systems, controls and reporting concerns are high on the list of long term threats to feasibility. It is critical that the City effectively implements the IT initiatives which lay the foundation of many of the other benefits associated with the RRIs. Detroit will need strong leadership and exceptional tenacity to accomplish the initiatives on time and on budget.

I am encouraged by the City's recent decision to terminate its efforts to outsource payroll due to a poor design for the implementation. Current City leadership appropriately abandoned this project, despite having previously spent several million dollars in the pre-implementation phase, when they realized the vendor was trying to automate the City's antiquated payroll system rather than implement a new system that would meet the needs of the City going forward. This exemplifies why the most senior levels of City leadership, including the Mayor, CFO

⁴² McKinsey Report on the City of Detroit, May 2011

and CIO, must be actively involved in the strategy and implementation plans to ensure success and progress with clear measurement metrics.

Section J - Pensions

Introduction

Detroit's legacy retirement obligations, combining both pensions and OPEB, are the City's largest liability when combining the funded and unfunded liabilities. Additionally, these liabilities are arguably the most visible to the City's retirees, current employees, and to its citizens, generally. Despite the relative importance, the magnitude of the City's retirement obligations and the methods for calculating them are largely unknown. Assessing the City's future pension and OPEB responsibilities involves, among other factors, forecasted health care costs, complex actuarial models⁴³, and assumptions for the anticipated rate of returns on the pensions' assets and the rate used to discount the plans' future liabilities. Critical decisions made today will have a substantial impact on the City's liquidity in future

⁴³ Traditional actuarial forecasts imbed assumptions related to pensioners' mortality, rates of retirement, salary increases, overtime, disability rates, interest earned on assets, and pension plan administrative expenses.

years. The magnitude and importance of these decisions will be critical to Detroit's viability in the decades to come.

Background

The City of Detroit has historically maintained two separate defined benefit plans, one for uniformed personnel and one for all other City employees. The City's existing pension plans are administered by the respective Retirement Systems, the Police & Fire Retirement System of the City of Detroit ("PFRS") and the General Retirement System of the City of Detroit ("GRS"). The bankruptcy claims related to PFRS claims are classified as Class 10, while the GRS claims are designated as Class 11 in the POA. These plans provided for a calculated amount of retirement income based on earnings and longevity of each individual employee. As typical with defined benefit plans, the benefits are fixed and are not dependent on investment returns or other outside factors.

Detroit's Plan, in an effort to mitigate the City's expanding legacy pension issues, proposes to fundamentally restructure the City's pension obligations for both its current retirees and its active employees, effective June 30, 2014. The Plan provides that, on the Effective Date, the City will assume the obligations related to already accrued benefits under the GRS and the PFRS pension plans *as those benefits will have been modified in the POA*. The POA pension proposal modifies

each plan under revised structures that impose reduced monthly pension amounts and/or reduced or eliminated COLA adjustments. The POA also proposes to restructure the accrual of pension benefits of active employees beginning on July 1, 2014, the parameters of which are detailed below.

City of Detroit Retirees Demographics

As of June 30, 2013, the Retirement Systems for the City of Detroit had approximately 32,247 members. The demographics of the each Retirement System are detailed below:

	PFRS		GRS		RS Tota	1
Active	3,272	26%	5,658	28%	8,930	28%
Retirees	9,054	73%	12,118	61%	21,172	65%
Other	111	1%	2,214	11%	2,325	7%
	12,437		19,990		32,427	

Of the City's estimated 21,172 retirees, roughly 7,200 (or 34%) are over the age of 75, with another 35% between the ages of 65 and 75. The average PFRS pension in FY2013 was \$30,607 as compared to the average FY2013 GRS pension of \$19,213.

Pension Funding Level

The accounting for defined benefit plans can be very complex. The calculations used to determine the appropriate funding levels required each year are dependent upon macro-economic factors, actuarial assumptions, and other variables that can be difficult to understand and can be manipulated to bias the required funding levels.⁴⁴

Historically, a number of different practices have contributed to a significant funding shortfall in the two pension plans. The Retirement Systems utilized unrealistic rate of return assumptions and managed the pension plans in accordance with questionable investment strategies that resulted in considerable underfunding of the respective Plans. The Retirement Systems assumed aggressive annual rates of return on investment (PFRS: 8.0%; GRS: 7.9%), allocated asset gains and losses over a seven-year period which masked potential funding shortfalls, and utilized renewing 29- (PFRS) and 30- (GRS) year amortization periods for funding the unfunded pension obligations.

The calculation of this funding shortfall, or the Unfunded Actuarial Accrued Liability ("UAAL"), is dependent upon the use of assumptions as noted above.

⁴⁴ Declaration of Charles M. Moore in Support of Detroit, Michigan's Statement of Qualifications Pursuant to Section 109(c) of the Bankruptcy Code; Docket No. 13; Page 5

Based on the assumption methodologies used by the retirement systems previously, the UAAL was projected, at the end of FY2012, to have been approximately \$977 million.⁴⁵ At June 30, 2013, that UAAL estimate was \$1.5 billion as PFRS reported it was 89% funded with a UAAL of \$415 million. At that same time, GRS reported it was 70% funded with a UAAL of \$1.1 billion. Using what the City now believes are more accurate assumptions, the City's actuary - Milliman, Inc. - has estimated that the combined systems' UAAL, at June 30, 2013, was approximately \$3.5 billion. ⁴⁶

In addition to issues involving the aggressiveness of the rate of return assumption used to determine funding levels, also contributing to the increase of the UAAL were a number of questionable activities engaged in by the retirement systems, which included:

• Utilizing GRS fund assets to pay the promised returns on the Annuity Savings Program which, upon members of GRS allocating 3%, 5% or 7% of their after-tax salaries into a discreet defined contribution plan, effectively guaranteed a minimum 7.9% annual investment return

⁴⁵ Declaration of Charles M. Moore in Support of Detroit, Michigan's Statement of Qualifications Pursuant to Section 109(c) of the Bankruptcy Code; Docket No. 13; Page 5

⁴⁶ Declaration of Charles M. Moore in Support of Detroit, Michigan's Statement of Qualifications Pursuant to Section 109(c) of the Bankruptcy Code; Docket No. 13; Page 7

regardless of the actual investment performance of the pension plans' assets;

- Using actual market returns for crediting purposes rather than the guarantee, the City believes that over \$387 million of excess investment earnings were credited to Annuity Savings Funds from 2003-2013
- GRS trustees, when the plan's actual returns were higher than the assumed rate of return, paid a portion of the positive variance between the actual investment return and the assumed rate of return in an additional pension check to already retired pensioners in what is commonly referred to as the "13th check" program
- The City periodically deferred its required year-end PFRS contributions, and then borrowed to pay those deferrals with debt priced at a rate of 8%;
- Retirement System officials have been accused and/or indicted of material fiduciary misconduct, allegedly draining the pension of necessary liquidity and contributing to the underfunding of the Retirement Systems.⁴⁷

Pension Treatment

The City's Plan of Adjustment proposes to "freeze" the accruing of pension benefits under the terms of the City's legacy pension plans and, effective June 30, 2014, institute restructured, distinct pension plans for the City's active employees. For the current employees, their future pensions will be a combination of that which was accrued under the legacy plan through June 30, 2014, and after that date, what will be accrued under the new revised plan as detailed below. For the City's retirees,

⁴⁷ Declaration of Charles M. Moore in Support of Detroit, Michigan's Statement of Qualifications Pursuant to Section 109(c) of the Bankruptcy Code; Docket No. 13; Page 10

depending on whether they are members of PFRS or GRS, the POA proposes to modify their accrued benefits under the legacy pension plans via reductions in gross pensions, cost of living adjustments, or reductions in investment earnings in the Annuity Savings Program.

Active City Employees

The Plan of Adjustment proposes a "hybrid" pension plan for the City's active employees for their accrued employment time after June 30, 2014. The adjusted pension plan – for both PFRS and GRS – endeavors to combine the features of a fixed contribution plan with the estimated investment performance of a fixed benefit plan. The City and its actuaries constructed this hybrid plan to generate accrued pension payments to its active employees upon retirement commensurate with a 6.75% estimated annual investment return.

For active PFRS employees, the updated pension formula will be equivalent to their Final Average Compensation ("FAC") – defined as the average base compensation (excluding overtime, sick leave, longevity, etc. over the last ten consecutive years) times years of service times 2.0%. For example, a theoretical PFRS employee whose FAC was \$40,000 with 25 years of experience would accrue an annual pension of \$20,000 (\$40,000 x 25 x 2.0%). This calculation represents the defined benefit portion of the new hybrid plan. The defined contribution portion of the new plan incorporates an annual 12.25% contribution from the City of employees' base compensation and requires an employee contribution of 6%, if the employee was hired before July 1, 2014, or 8% if hired after that date. In addition, PFRS employees will be eligible for retirement at ages 50-52, depending on their rank, with twenty-five years of service.

The revised GRS pension plan for active employees is similar to the PFRS plan, albeit adjusted for Social Security (GRS pensioners are eligible for Social Security in contrast to PFRS pensioners). The updated pension formula will be equivalent to FAC over the last ten consecutive years times years of service times 1.5%. For example, a theoretical GRS employee whose FAC was \$40,000 with 30 years of experience would accrue an annual pension of \$18,000 (\$40,000 x 30 x 1.5%). The City will contribute 5.75% of the employee's base compensation annually, while the employee will contribute 4%. In addition, GRS employees will be eligible for retirement at age 55 with thirty years of service.

Proposed POA Restructured Terms

	PFRS	GRS
Pension Formula	FAC x # of years x 2.0%	FAC x # of years x 1.5%
Investment Return	6.75%	6.75%
ER Contribution	11-12% of base compensation	5% of base compensation
EE Contribution	Hired before 7/1/14: 6%; after 7/1/14: 8%	4% of base compensation
Retirement Age	Age 50-52 with 25 years experience	Age 55 with 30 years experience
COLA Eligibility	0-1% compounded, variable	Variable after 4 years and 100% funded
Annuity Savings Fund	n/a	Interested credit at actual return (0-5%)
Theoretical Annual Pension		
(\$40k FAC with 25/30 years experience)	\$20,000 = \$40,000 x 25 x 2.0%	\$18,000 = \$40,000 x 30 x 1.5%

The fundamental amendments to the future pension plans lend themselves favorably to the POA's feasibility. Redefining base compensation as an average of the last ten years' pay as opposed to last three, eliminating non-base compensation such as overtime and sick leave from the calculation, reducing the estimated rate of return, and incorporating a defined employee contribution all contribute to the increased likelihood that the City can meet the requirements of the new pension plan. A concern remains, though, that embedded within the "hybrid" nature of this pension plan, is the concept that a fixed contribution will, over time, produce the required, fixed benefit. Pension plans with fixed contributions are generally just that -defined contribution plans, not defined benefit plans. To the degree that the actual investment return underperforms the targeted levels or the employee population exhibits life expectancies in excess of the actuarial assumptions, the City has the potential to again be saddled with an underfunded pension plan.

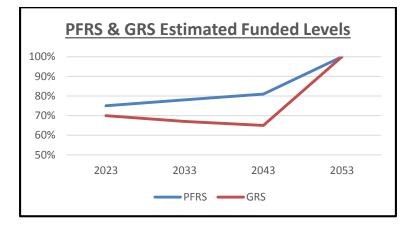

Current Retirees

The combined UAAL for both Retirement Systems was approximately \$3.5 billion as of June 30, 2013. The City's Plan of Adjustment, for the current retirees' pension plan, establishes targeted funding rates by the end of fiscal year 2023 for each Retirement System, specifically 75% for PFRS and 70% for GRS, based upon a heavily-negotiated 6.75% assumed investment rate of return. While I assume this investment rate of return as a "given" in all pension analyses to follow, further discussion with regards to the appropriateness of this assumed investment rate of return, and more particularly, its use as the assumed liability discount rate, is detailed These targeted funding levels, combined with the proposed benefit below. reductions for each pension plan, dictate the required cash contributions to the Retirement Systems during the period ending June 30, 2023. The POA proposes that the City will amortize the remaining UAAL for each Retirement System – as of June 30, 2023 – over the following thirty-year timeframe.

The following graph illustrates, per the City's actuary – Milliman, Inc. – the estimated funding levels for PFRS and GRS at ten-year intervals during the period FY2014-2053⁴⁸. Based on the City's actuarial tables, the POA projections assume

⁴⁸ Both PFRS and GRS plans are forecasted to initially have decreasing funding levels; PFRS is forecasted to decrease from 87% in FY2015 to 78% in 2023; GRS is estimated to decrease from 74% in FY2015 to 65% in FY2043

that the pension plans' funding levels significantly improve in the last ten years of this forty year period in question⁴⁹.

The POA assumed investment rate of return of 6.75% was a heavily negotiated component of the POA amongst the City, its retirees, the Retirement Systems, the Retiree Committee, and the labor unions. The POA stipulates that the board of trustees of the PFRS and GRS "must" maintain a 6.75% investment return assumption through the period ending June 30, 2023; thereafter, that rate is at the discretion of the Retirement Systems. While the new, proposed rate is more conservative than the historically-used 7.9% and 8.0% rates, current debate abounds as to whether a municipal pension plan, that is not 100% funded, should use any rate for its liability discount rate other than the government risk-free rate.

⁴⁹ Milliman, Inc. letter, dated May 7, 2014

The following table illustrates where the City's proposed 6.75% investment rate compares to other comparable municipal pension plan assumptions⁵⁰:

City of Detroit	6.75%
Connecticut Teachers	8.50%
Houston Firefighters	8.50%
Ohio Police & Fire	8.25%
Ohio PERS	8.00%
Michigan Municipal/SERS/Public Schools	8.00%
U.S. National Average	7.72%
CALPERS	7.50%
Indiana PERF/Teachers	6.75%
DC Police & Fire/Teachers	6.50%

Public Pensions - Assumed Investment Returns - Dec 2013

Pension Funding

In an effort to partially alleviate the City of Detroit's liquidity concerns and to fund some portion of the proposed RRIs in the first ten years, the Plan of Adjustment incorporates dedicated external funding for the Retirement Systems aimed at reducing the respective UAALs, portions of which the receipt is predicated upon Classes 10 (PFRS) and 11 (GRS) voting to accept the Plan. The following analyses illustrate the POA's proposed funding sources for the respective Retirement Systems over the 2014-2053 timeframe encompassed in the POA's 40 Yr Plan.

Plan of Adjustment – Proposed PFRS Contributions – FY2014-2053

⁵⁰ NASRA Issue Brief: "Public Pension Plan Investment Return Assumptions"; April 2014

(\$ Millions))14 - 023	 024 - 2033	034 - 2043	2044 - 2053		
City-specified Contributions						
State of Michigan	\$ 96	\$ -	\$ -	\$	-	
Foundations (DIA Settlement)	\$ 165	\$ 201	\$ -	\$	-	
Other/City GF	\$ -	\$ 416	\$ 465	\$	311	
Total	\$ 261	\$ 618	\$ 465	\$	311	

Plan of Adjustment – Proposed GRS Contributions – FY2014-2053

(\$ Millions)	2	014 -	2	2024 -	20	034 -	2044 -		
	2	2023		2033	2	043	2053		
City-specified Contributions									
DWSD	\$	429	\$	-	\$	-	\$	-	
UTGO	\$	32	\$	-	\$	-	\$	-	
State of Michigan	\$	99	\$	-	\$	-	\$	-	
DIA (DIA Settlement)	\$	45	\$	55	\$	-	\$	-	
Other/City GF	\$	115	\$	575	\$	474	\$	318	
Total	\$	719	\$	630	\$	474	\$	318	

In order of magnitude, the City-specified contributions in the 2nd, 3rd, and 4th decades reflect the estimated 30-year amortization payments on the respective plans' UAALs at June 2023. The DWSD is expected to contribute to GRS roughly \$428 million from FY2015-2023, constituting DWSD's allocable share of the remaining GRS UAAL, after considering the pension modifications proposed in the POA. The State of Michigan has committed to contribute the present value of \$350 million, approximately \$194 million⁵¹, for the benefit of pensioners. The State's contribution, signed into law by Governor Snyder on June 20, 2014, requires the approval of Classes 10 and 11, requires support from the Retirement Systems,

⁵¹ The \$350 million contribution is discounted at the 6.75% rate.

cessation of all bankruptcy-related litigation, and the full commitment of other external financing sources dedicated to the pension plans.

In addition to the identified pension funding sources highlighted above, the POA assumes implementation of the DIA Settlement, in which the City, DIA, and certain charitable foundations agree to irrevocably transfer the DIA art collection to the DIA Corporation. The art will be held in perpetual charitable trust within Detroit's city limits, in exchange for future payments of \$366 million, pledged by the charitable foundations, and a commitment from the DIA Corporation to raise \$100 million. Both DIA Settlement commitments are designated to be paid into the pension plans over the next twenty years.

The following tables illustrate the proposed funding contributions into PFRS and GRS for the fiscal years 2014-2023:

Plan of Adjustment – PFRS (Class 10)

The POA proposes two alternative restructuring scenarios of the PFRS pension, with the respective depth of the assumed pension cuts being dependent on whether *both* Classes 10 and 11 approve the Plan of Adjustment.

PFRS - Scenario A

In the event that both Classes 10 and 11 vote for the POA, with an assumed investment return of 6.75% and a targeted funding rate of 75% in 2023, the POA proposes that PFRS pensioners will receive 100% of their current/accrued pension, but will have their lifetime Cost of Living Adjustments ("COLAs") reduced by 55%. With COLAs estimated to represent approximately 18% of the total PFRS liabilities, the proposed 55% COLA elimination translates into a 9.9% reduction in estimated PFRS liabilities.

PFRS – Scenario B

If either Classes 10 or 11 vote against the POA, and maintaining the assumed investment return of 6.75% and a targeted funding rate of 75% in 2023, PFRS pensioners will still receive 100% of their current/accrued pension, but their lifetime COLAs will be completely eliminated.

Plan of Adjustment – GRS (Class 11)

Similar to Class 10, the POA proposes two alternative restructuring scenarios of the GRS pension, with the respective depth of the assumed pension cuts being dependent on whether *both* Classes 10 and 11 approve the Plan of Adjustment.

<u>GRS – Scenario A</u>

In the event that both Classes 10 and 11 vote for the POA, with an assumed investment return of 6.75% and a targeted funding rate of 70% in 2023, GRS pensioners will receive 95.5% of their current/accrued pension, will have their lifetime COLAs eliminated, and pensions will be subjected to a maximum of a 15.5% recoupment of their Annuity Savings Fund excess return⁵³. The combined impact of these proposed changes represents an approximate 27% reduction in

⁵³ Not all GRS retirees will be subject to ASF recoupment; only those retirees who ASF annual return, for FY2004-2013, was greater than the plan assets' actual return up to a maximum recoupment of 15.5% of the pensioner's peak ASF balance

GRS's estimated liabilities comprised of 4.5% from reduced pensions, roughly 9% from the Annuity Savings Fund recoupment, and 14% from the eliminated COLAs.

GRS – Scenario B

If either Classes 10 or 11 vote against the POA, and maintaining the assumed investment return of 6.75% and a targeted funding rate of 70% in 2023, GRS pensioners will receive 73% of their current/accrued pension, will have their lifetime COLAs eliminated, and the ASF recoupment will vary from 0.01% to 100% of a retiree's pension, based upon the excess amount of the pension. The combined impact of these proposed changes represents an approximate 50% in GRS's estimated liabilities comprised of 27% from reduced pensions, roughly 9% from the Annuity Savings Fund recoupment, and 14% from the eliminated COLAs.

General Retirement Systems of the City of Detroit Projection of Liabilities and Assets Scenario A Assuming 4.5% Benefit Reduction, 100% COLA Reduction, 70% Funded Status, Annuity Savings Fund Recoupment, and 6.75% Investment Return⁵⁴

Pension Restoration

The Plan of Adjustment incorporates, for both PFRS and GRS, the potential for previously-reduced pension benefits to be restored if the funding levels of the respective Retirement Systems improve to agreed-upon restoration levels at designated timeframes, the fiscal years ending 2023, 2033, and 2043. These pension restoration payments are designed to be variable, in that, they are only distributed to the pensioners if the investment performance of the pension plans is at least three percentage points above the targeted funding levels.

The pension restoration thresholds, for both PFRS and GRS, are perpetually three percentage points above each pension plan's targeted funding level throughout the FY2014-2053 time period. If the funding levels exceeds the plan's restoration targeted funding level, i.e. are more than 3 percentage points above the targeted funding level, monies will be allocated to a "restoration reserve account". Once the restoration reserve account equals at least 10% of the lifetime value of the previously-reduced COLA payments, restoration payments will commence in the following year. According to the POA, restoration payments for PFRS will be conditional until 2023, and until 2028 for GRS. If, as a result of the funds' assets subsequently underperforming the targeted investment levels, which would mean that the returns fall below the 3 percentage point threshold for restoration payments, COLA restoration payments are immediately suspended. Beginning in FY2023 for PFRS and FY2028 for GRS, to the degree the plans' funding levels are in excess of the restoration targeted levels, those specific restoration payments become fixed, or "guaranteed", going forward.

It should be clearly understood, in FY2023 (FY2028 for GRS), FY2033 and FY2043, the *maximum* funded level of the GRS and PFRS is the amount shown in the table below. As a result of the negotiations with the parties, the provisions of the

POA relative to the pension settlements ensure that the pension plans at these benchmark dates will never be funded above the restoration funding rate for either the PFRS or GRS plans. If the funding level is above this targeted amount at the benchmark dates, the excess will be swept to a permanent restoration fund such that the funding level will be reduced to the amount shown. In the event that the funding levels at these benchmark dates are below these levels, the City is responsible for this unfunded amount and must fund it in the future. Therefore, as the City considers the average rate of return, it must keep in mind it is "giving away" some of the upside, yet retaining all of the downside.

The following table summarizes both PFRS and GRS's targeted and pension restoration funding levels for the 2014-2043 timeframe (pension restoration payments cease in 2043)⁵⁵.

	Р	FRS	0	iRS
	Funding	Restoration	Funding	Restoration
	Target	Target	Target	Target
2014-2023	75%	78%	70%	73%
2024-2033	81%	84%	70%	73%
2034-2043	84%	87%	70%	73%

Impact on Feasibility

⁵⁵ Multiple Milliman, Inc. Pension reports; multiple Phoenix discussions with Jones Day attorneys re: Pension plans

There is considerable debate regarding the selection of the discount rate for calculating liabilities in government sponsored defined benefit (DB) plans. At one end of the debate is the thought that the discount rate of liabilities should equal the expected return on pension assets; at the other end is the thought the liabilities have a very strong contractual and legal requirement and therefore represent a certainty of payment and therefore should be discounted at, or near, the risk free rate. This seemingly academic question has real world consequences when viewing Detroit's POA and its perceived feasibility.

The Nelson A. Rockefeller Institute of Government's recent analysis on this

issues - The Blinken Report - dated January 2014, notes⁵⁶:

The problem begins with mismeasurement of liabilities and the cost of funding them securely, for financial reporting purposes. The proper way to value future cash flows such as pension benefit payments is with discount rates that reflect the risk of the payments. This is separate from the question of the rate pension funds will earn on their investments.

This bears repeating: The proper rate for valuing pension liabilities on financial statements is separate from the question of what pension funds will earn on their investments. Different rates may be appropriate for valuing liabilities than for assumed investment returns — and we recommend, later, that different rates be used. The major

⁵⁶ <u>The Blinken Report- Strengthening the Security of Public Sector Defined Benefit</u> <u>Plans</u>, dated January 2014. Donald J Boyd and Peter J Kiernan. *Expert's Note: In the preface of this Report special note is made of the contribution to the analysis and work by Dick Ravitch. Mr. Ravitch is Judge Rhodes' non-testifying consultant in this chapter 9.*

significance of valuing liabilities incorrectly is that it leads to inadequate funding policies, and encourages the mistaken belief that benefits can be greater, services can be greater, or taxes lower while still funding benefits securely. (Blinken Report Emphasis)

Because pensions are promises that should be kept, and have strong legal protections, they should be valued using discount rates that reflect the riskiness of expected benefit payments. Unfortunately, the longstanding practice for public pension plans in the United States, developed before modern financial theory, is to use the expected return on pension fund assets to value liabilities, even though there is no logical connection between how much is owed to workers and what assets will earn. This practice is not used by public pension plans in other countries, or by private plans in the United States, or by economists or financial analysts valuing other cash flows. Our nation's public pension plans stand virtually alone, and recent accounting rule changes by the Governmental Accounting Standards Board (GASB) have not addressed this properly. Rates that reflect the expected risk of benefit payments ordinarily are much lower than the rates public pension funds use to value liabilities, and as a result, public pension liabilities are underestimated by at least \$1-2 trillion, and the annual costs of funding them securely are underestimated by at least \$100-200 billion.

The City of Detroit, in its POA, has used a rate of 6.75% to discount the liabilities of the pension plans. This rate is lower than the historical rates that PFRS and GRS have previously used and lower than recent investment returns, although recent market returns are heavily impacted by the recovery from the Great Recession. It is also low relative to peers (see previous chart on comparison of Assumed Investment Returns of comparable public plans). In fact, there are few other major government sponsored plans that use a lower rate to discount the liabilities in their pension plans. On the surface, this appears to be a conservative

assumption. However, I am not convinced that the City appreciates the opportunity it has to provide stewardship in this area. Highlighting that the City's assumptions are low relative to history, a history that got them to this place, and low relative to their peers - peers who collectively may be underfunded by \$2 trillion or more, is not much consolation.⁵⁷

We believe that the selection of a discount rate has relevance as to the feasibility of the Detroit POA, in that, in the future without the benefit to change pension obligations, pension funding requirements become a de facto first priority on cash flows. This results in crowding out other cash flow priorities. The City must be continually be mindful that a root cause of the financial troubles it now experiences is the failure to properly address future pension obligations. Below we address two main concerns regarding the selection of the discount rate for valuing future liabilities in the Plan.

The investment return at 6.75% appears to be based on future investment returns. This rate clearly reflects a rate above the current risk free rate of return and therefore indicates a level of assumed volatility and risk. The argument for using a discount rate that is related to investment returns typically states that using a rate

⁵⁷ Blinken Executive Summary pg. vii.

that is higher than the risk free rate is acceptable due to the long "runway" of a municipal pension. The argument goes: a municipal entity differs from an individual in that, as an individual ages, they typically must moderate their investment behavior towards lower risk investments due to shortening time horizons and, therefore, often lock in losses in down markets. The argument continues: the long time horizon of a municipal pension plan allows it to avoid this phenomenon. Of course, pension plans are not able to defer plan payments during down markets, and therefore, in significant down markets, the loss of principal as a result of making payments to pensioners, without offsetting investment returns, can result in a plan that "locks in" losses. These "locked in" losses create underfunding.

Further, the current POA contemplates Pension Restoration provisions. These provisions essentially allow pension plan beneficiaries to have some opportunity for restoration of lost pension benefits. Post confirmation, until June 2023 for PFRS and June 2028 for GRS, if the pension plans exceed 78% for PFRS or 73% for GRS, despite still being underfunded nearly 22% and 27%, respectively, additional funds can be set aside into a pension restoration fund. The funding levels and the ability of beneficiaries to receive restoration benefits are limited to actuarial and investment return adjustments and not to additional city contributions. However, under this plan, the City can be underfunded in FY2043 and still be in the mode of restoring pension benefits to then existing retirees. Based on the settlement terms and the

assumptions made, there does not appear to be recognition that a pension plan, someday, will need to be 100% funded. The City appears to adopt an institutional philosophy of underfunding.

On top of the conceptual argument that funding targets should be set at no less than 100%, before additional commitments are made to increase benefits, a larger concern exists. The City's assumption of a 6.75% rate of return implicitly requires the City to accept risk and volatility. Volatility is, of course, a positive and a negative force. At times, the City should be expected to achieve returns above 6.75% and, at times, the City should expect returns below this level. Over the past 10 years, the Retirement Systems have seen significant variations in their investment returns both above and below the average return. Again, this is the argument for municipal pensions to use investment returns because over the long term, there should be smoothing. Because the City's defined benefit plans are essentially in runoff, they will inevitably experience declining asset levels. In this environment of declining assets and volatility, returns over time are not equally weighted.

Thus, order matters when returns are volatile. It is much better to receive high returns early and low returns later, even though both streams provide the same simple average growth rate. Examples of the impact of timing on returns in a given 10-year period are detailed in the Sensitivity section below. This is not a trivial issue, even though it is quite technical. As pension funds mature and net outflows increase, asset values will be more volatile and more susceptible to the order in which returns occur. In an environment in which expected returns are low in the short term — as the current low-interest-rate, low-inflation environment may be — funds cannot simply balance low returns in the short term with high returns later; they will need much higher returns later because investible assets will be lower than they otherwise would have been.⁵⁸

As example from the Blinken report: Blinken Report Footnote #96

Consider a pension fund that has net outflows equal to 4.5 percent of assets, with benefits and contributions both growing 7 percent annually (roughly consistent with recent experience). If it earns 4 percent on investments for five years, followed by 12 percent for five years, its assets at the end of ten years will be nearly 13 percent lower than if the returns come in the opposite order, even though annual average return is 7.9 percent either way. $[(1.04^{10} \times 1.12^{10})^{-1} = (1.12^{10} \times 1.04^{10})^{-1} = 7.93\%$.] If the fund earns 4 percent for ten years followed by ten years of 12 percent, its assets after twenty years would be 90 percent less than if returns had come in the opposite order. These calculations assume no change in contributions to amortize asset shortfalls in the early years. Amortization would narrow the difference between the two sequences of returns.

⁵⁸ Blinken pg 25.

Further exacerbating this issue, the City is agreeing to give up part, or maybe all, of its upside investment returns by virtue of the pension restoration benefits, but it is retaining all of the downside risk. If the funds' assets participate in a bull market in the first ten years of the POA, and the pension plans move to a funded level of 88%, the City would provide significant restoration benefits. If this bull market was then followed by a five year bear market, all of the restoration benefits paid during the bull market would serve to exacerbate the unfunded level of the pension plans and the City could be responsible for considerable funding risk.

It appears that the combination of a need to continue to invest in assets with risk and volatility in order to achieve investment returns and the restoration benefit to the pensioners, even at a level of low plan funding, acts as a one sided collar. That is, the City gives away much of the upside in investment earnings, while retaining all of the downside investment risk.

Legality of POA's Proposed Pension Cuts

Numerous parties in this bankruptcy, namely employees, retirees, Retirement Systems, and certain labor unions, have argued that the City is not legally able to impair accrued pension benefits as they are protected under Article IX, Section 24 of the Michigan State Constitution of 1963. These same groups were granted permission to appeal the Bankruptcy Court's eligibility ruling to the U.S. Court of Appeals for the Sixth Circuit. To the degree that these parties are successful in their appeal of the Bankruptcy Court's eligibility ruling, the City's chapter 9 could be dismissed or may be unable to effectuate reductions in accrued vested pension benefits.

Sensitivity Analysis

The Society of Actuaries issued a *Report of the Blue Ribbon Panel on Public Pension Funding* in February 2014. The Blue Ribbon Panel recommended stress tests measuring the effect of investment returns over a 20-year period that are three percentage points above and below those used in calculating standardized plan contributions⁵⁹. The panel believes that +/-3% points represents "plausible stresses" based on its review of prior market returns⁶⁰.

⁵⁹ The Society of Actuaries "Report of the Blue Ribbon Panel on Public Pension Plan Funding"; February 2014

⁶⁰ The Society of Actuaries "Report of the Blue Ribbon Panel on Public Pension Plan Funding"; February 2014

In response to my request for a sensitivity analysis for the pension plans assuming various average rates of return for the FY2014-2023 period and the aforementioned scenarios of 1) a bear market 5-year period followed by a bull market 5-year period and 2) a bull market 5-year period followed by a bear market 5-year period, the City's actuary has analyzed the PFRS plan.

As illustrated below, if the PFRS plan averages a 6% rate of return (75 basis points lower than the assumed rate of return) over the nine years ending June 2023, the plan is forecasted to be only 70% funded in June 2023, resulting in an additional \$236 million of unfunded liability versus the POA projections. That unfunded variance expands to \$527 million if the PFRS plan averages a 5% rate of return during this time period. Finally, if PFRS is negatively impacted by a bear market/bull market cycle (as opposed to the inverse) with five years averaging 0% followed by five years averaging 10%, the pension plan would have \$342 million more in unfunded liabilities during the 10-year period in question.

Average Rates of Return July 2014 - June 2023	Estimated Funding Status June 2023	Unf	nated Projected unded Liability June 2023	Estimated Projecto Unfunded Liabilit Variance			
3.00%	43%	\$	1,717	\$	1,036		
5.00%	60%	\$	1,208	\$	527		
6.00%	70%	\$	917	\$	236		
6.75%	78%	\$	681	\$	-		
8.00%	92%	\$	252	\$	(429)		
0% - 1st 5 years; 10% - 2nd five years	53%	\$ ¢	1,439	\$ ¢	758		
10% - 1st 5 years; 0% - 2nd five years	64%	\$	1,097	\$	416		

PFRS Average Rate of Return Scenario Analysis⁶¹

We have requested sensitivity analysis for GRS consistent with the PFRS sensitivity analysis highlighted above. At the time of this Report's release, we have not been provided the GRS sensitivity analysis.

Recommendations on Reporting Requirements

The City of Detroit will be bound by numerous reporting requirements and financial oversight when it emerges from bankruptcy. Going forward, these intended protocols are designed to assist the City in managing its cash flow and liquidity relative to its POA commitments and its future budgets. In addition, it will be important for the City to report its financial condition to various constituencies on a regular basis.

⁶¹ Milliman, Inc. letter; dated July 9, 2014

Timely, accurate financial reporting relating to the City's pension plans will be an essential tool as the retirement systems manage the plans' assets and liabilities and make critical decisions regarding future estimated rates of returns and annual funding requirements. At the end of June 2012, the Governmental Accounting Standards Board ("GASB") issued standards intended to reform how state and local governments report the financial status of their pension funds and how they finance them. GASB 67 defines how government pension funds must report finances related to pension activities. GASB 68 pertains to state and local government reporting of activities associated with pension finances.⁶² Both GASB standards are effective in FY2015 and will enhance the City's financial disclosures relating to its pension plans.

As the asset features and credit quality of the pension plans' investments evolve over time, so, too, will the reporting corresponding to those investments. The City's pension plans should establish a baseline level of financial reporting that will be accurate and illustrative of the condition of the pension plans at any point in time. The Society of Actuaries' report recommended that actuarial funding reports should contain, for at least the previous ten years, information presenting the relationship of benefit payments, funding liabilities, and assets to payroll; the relationship

⁶² Governmental Accounting Standards Board

between the recommended contribution to payroll and to the sponsor's budget or revenue source; and the ratio of contributions made to the total recommended contribution.⁶³

Additionally, to understand current risk levels, three benchmarks should be disclosed:

- The expected standard deviation of investment returns of the asset portfolio on the report date;
- 2) The plan liability and normal cost calculated at the risk-free rate, which estimates the investment risk being taken in the investment earnings assumption; and
- 3) A standardized plan contribution for assessing the aggregate risks to the adequacy of the recommended contribution.⁶⁴

Further, we recommend that the City disclose the gross liability and the UAAL by year on an undiscounted basis. This will allow third parties a better understanding of the changes in the liabilities from year to year.

Section K - Human Capital and Leadership

Detroit's fifty year decline was caused by changing demographics, economics and the failure of elected officials to respond effectively. The downward spiral finally resulted in the City filing for Bankruptcy. Beyond the financial crises, the City has suffered from a deterioration of the efficiency and effectiveness of its City's workforce, as measured by the cost of service delivery versus the benefit the citizens received from those services.⁶⁵ Inadequate investment in human capital and poor leadership during the decline served to exacerbate the situation.

At its core, this chapter 9 is a fundamental change project. The City, through the guidance of its bankruptcy advisors, has fundamentally changed the City's balance sheet and reduced its long term obligations. The Emergency Manager has begun the even harder task of reshaping the operations of the City for the benefit of the taxpayers. The Mayor, and other elected and appointed officials, will need to continue this part of the change project. Human capital and leadership are two of

⁶⁵ Docket # 14, page 29 of 106, Memorandum in Support of Statement of Qualifications Pursuant to Section 109 (c) of the Bankruptcy Code

the most important components to any successful restructuring⁶⁶. I believe the success, or failure, of Detroit's revitalization will hinge on the people employed by the City and the officials elected by the residents in the coming years. The skill level, on average, of City workers is low and outdated. Civil service requirements and historical collective bargaining agreements work against a merit or performance based employment culture in most municipalities and Detroit is no exception. Lack of even modest technology and up-to-date systems, as is the case with the City, ensure that employees will not perform at competitive levels to their peers in the private sector or even in municipalities that are efficient.

Impact on Feasibility

As I noted in my definition of feasibility, the second assessment prong of feasibility is "will and skill". Leadership, political and intestinal fortitude define "will" and talent and training equate to "skill".

For example, in order to arrest the downward trend of revenue, City employees must do a better job of collecting the taxes and fees that are currently due – that is skill. Better systems and more experienced management will be required

⁶⁶ I have written on this topic previously. See American Bankruptcy Journal, March 2014, "The Missing Link to Successful Company Turnarounds – Balance Sheet Management is Only Part of the Story"

to accomplish that goal. It was evident to me and my team that there are City employees who are knowledgeable, have good ideas about improving the operations and want to learn and advance. There are also employees who don't grasp that their job is to provide a service to the taxpayers versus the taxpayers owing them a job. This is a cultural malady that will have to change if Detroit is to be successful. Leadership that is focused on outcomes of service delivery and operating efficiency will be required, as will standards for personal and departmental performance.

Current Workforce Issues

The City employs more than 9,000 people and as a result of the RRIs expects add to almost 700 net new positions. After accounting for attrition, this is a significant mobilization. Further, my discussions with the leaders in the City indicate a universal understanding that increasing the average talent base of the employees is a cornerstone for success of the Plan and the City. This topic was acknowledged at the outset of the case and continues to present challenges to the City's management team. Throughout my team's discussions with City leaders and department managers, the issue of human resources has been a regular topic of discussion.

Throughout our discussion in the finance and accounting functions it has been noted:

"Many qualified and experienced employees have left their jobs over concerns about the long term prospects of their positions; Difficulty in replacing employees with qualified personnel because salary structure is no longer reasonable and competitive. This weakness has been partially mitigated by hiring employees outside the official system using Professional Service Contracts (PSC's), consultants and contractors."

Exacerbating the problem of historic skill level are the changes made to compensation prior to, and as a result of, the bankruptcy. Prior to the Bankruptcy,

"the City has also implemented a 10% reduction in the wages to majority of the workforce in the addition to furlough days of 10% to a majority of the non-uniform employees. Medical and prescription drug plan designs have been changed to reduce the costs associated with healthcare and increase the percentage of contributions from active employees."⁶⁷

The POA eliminates future accrual of the defined benefit retirement plan and replaces with what is arguably a less generous hybrid pension plan. The Plan eliminates certain OPEB benefits, specifically, post-retirement healthcare and replaces with what is arguably a less generous VEBA plan.

Beth Niblock, the City's CIO, noted this concern in her Expert Report,

"(a)ttracting and maintaining a highly skilled workforce is a challenging task,

⁶⁷ Declaration of Gaurav Malhotra in Support of the City of Detroit, Michigan's Statement of Qualifications Pursuant to Section 109 (c) of the Bankruptcy Code

particularly given the current and proposed compensation rates set forth in the Projections."68

There is little doubt that total compensation includes not only direct pay, but the benefits conferred to employees in the current time frame plus those that are expected to be conferred to the employee in the future. Individuals may possess differing views as to relative value of each category of pay; however, they do place some value on the deferred benefits.⁶⁹ With all of these changes to compensation, it is unclear what the impact will be on retention and recruitment. While there are studies to suggest, and perhaps some experience in Detroit to confirm, that the elimination of post-retirement healthcare may offset the impact of the pension changes as a retention tool. Current employees, when they retire, will not have the benefit of receiving healthcare benefits prior to Medicare eligibility. Therefore, employees may be more likely to stay in their positions with the City.

While the specific impact of the compensation changes on retention is unknown at this time, the impact on current employees and future employees may be different. For current City employees, the City has necessarily lowered the

⁶⁸ Report of Beth Niblock, Chief Information Officer for the City of Detroit-Expert report submitted in support of the City's POA – page 15.

⁶⁹<u>Are Public Pensions Keeping up with the Times?</u> Richard W. Johnson, Mathew Chingos and Grover Whitehurst page 47."

overall economic value of City employment and changed the perception of the long term value in having worked for the City, once an employee leaves or retires. For future employees the economic and long term value analysis will be based on the individual's perception of alternative employment opportunities. The City is currently working with the consulting firm of Fox Lawson to complete a compensation review so that the City may have more than anecdotal evidence as it proceeds with the recruitment and staffing. We understand that the results of this study are not available and therefore were not considered when the City developed the POA projections.

In addition, the City has acknowledged the issue of skill development by including in the RRIs significant funding for employee training. The City has included an annual employee training budget of \$2,000 for each non-uniformed employee through 2017 and \$1,500 per year thereafter. The total RRI allocation to training over a 10 year period is \$54.4 million. While no actual allocation of training dollars has been made, I believe that this is a strong indicator of the City's commitment to helping its current employees develop the skills they need to contribute to the success of the City and to maintain competitive skills within its employee base.

Throughout our meetings with City leaders and the advisors to the City, it has been noted that if compensation is a barrier to hiring the skilled talent required, the City will likely adapt to this by hiring fewer but more skilled employees. I believe this approach can partially mitigate feasibility concerns regarding the City's ability to implement the Plan. Presently, the City is squeezed from both sides of the labor market: in order to do even the simplest routine task, the City has hired consultants yet maintains full time employees who should be able to manage those tasks but are not sufficiently trained to do so.

A significant challenge to acquiring the talent the City so desperately needs is the state of the Human Resources department. The Human Resources department is in need of an overhaul – recently, it has taken over six months to hire a new employee for an approved opening. As a result, department heads "work around" the department and find ways to recruit and hire employees more efficiently. The Mayor is well aware of the need for leadership in this key area.

Given the large number of recruits envisioned in the POA, a new approach to talent acquisition is needed. Consultants are in place to assess the skills needed to revamp key departments such as accounting and IT and the current leadership of those departments is experienced and capable. In fact, many of the Mayor's direct reports are experienced operational managers with successful employment histories. Overhauling the human resource function will be critical to a successful restructuring.

Leadership and Cultural Change

If the City is to counteract the vortex of underachievement that has defined Detroit, City leadership must make a long term, concerted effort to maintain the momentum needed to ensure effective City services. The Emergency Manager has made progress on the macro changes required and I believe the Mayor is developing a culture based on performance metrics and accountability and some of the *status quo* is going by the wayside.

I have confidence in Mayor Duggan. My opinion of feasibility is favorably influenced by my view of Mayor Duggan as a leader and an operational executive. I am encouraged by the manner in which he leads many of the City's departments given the real power is still held by the Emergency Manager. The Mayor has created simple metrics around which he can measure the performance of his department heads daily and/or weekly. This is a commendable workaround as the accounting and information systems, as noted elsewhere, are abysmal. While ultimately the City will need to address the core reporting system, the use of this simplistic metrics based approached is effective and understandable. When one is at the vortex of underachievement, having a few very simple and actionable goals can make a huge difference in the overall performance of the organizations. Having periodically attended the Mayor's Cabinet meetings, I know that if ambulance response times do not decrease more rapidly, it will be evident to all and managers will be held accountable; this level of accountability can change the City for the better.

In the long term, the City's leadership is subject to the democratic process. There is clearly risk that future elected leaders stray from principals in the POA, but I am choosing to rely upon the combination of the electoral process and the oversight function implemented as part of the Grand Bargain legislation to keep future City leaders focused on strong stewardship.

Collective Bargaining Agreements

My team has not been privy to the negotiations between the City and its unions, or the resulting term sheets. The City's financial advisors have indicated that the economic issues addressed in the collective bargaining agreements ("CBAs") negotiated during the bankruptcy have been appropriately included in the POA projections. Based on discussions with long standing and former City officials and employees, I believe the more significant workforce issues are centered on the restrictive work rule provisions that have caused labor inefficiency, higher costs and inability to change outdated processes. I do not know if, or to what extent, any of these issues have been addressed in the recently negotiated CBAs. While I believe that the Emergency Manager's desire to negotiate 5 year contracts has been beneficial in mitigating the risk associated with adverse arbitration awards in the future, I remain concerned that the City has missed an opportunity to make long term changes in its business processes and ability to manage through unforeseen events.

Section L - Blight

Detroit's Blight History

The City of Detroit, due to its shrinking population⁷⁰, depressed economy, and sagging property values, has experienced a metastasizing urban blight condition over the past several decades. Depending on which statistics are referenced, this City of approximately 139 square miles contains roughly 380,000 land parcels, of which 84,000 parcels (or 22%) have been identified as currently exhibiting blight characteristics or having indicators of future blight.⁷¹ These blighted parcels are geographically disbursed throughout the City, resulting in a ripple effect throughout most neighborhoods which further stretch the City's limited resources. An expanding blight crisis within Detroit is not just a land and property issue; rather, this epidemic has an exponential impact on the City's efforts with regards to public

⁷⁰From roughly 1.8 million residents in the 1950's to the current estimate of under 700,000

 ⁷¹ Every Neighborhood Has A Future... And it Doesn't Include Blight, Detroit
 Blight Removal Task Force Plan May 2014. Page 15

safety, education, job growth, property tax revenue, and the City's efforts to attract new residents and businesses.

As recently as 2010, under Mayor Bing's administration, the City of Detroit began a coordinated effort to tackle the City's growing urban blight, with an initial goal of razing 10,000 vacant structures, roughly 13% of the vacant structures within the City, at that time. The City reached approximately 50% of its stated blight removal goal by 2013, but lacked the necessary funding to continue its targeted efforts. Demolition expense estimates for blighted residential structures have ranged between \$8,500 - \$12,000 per structure, depending on the size of the building and the degree of blight and neglect. In addition to the incremental costs, the City's protracted payments to the demolition contractors have resulted in reducing the number of contractors willing to provide demolition services.

Current Blight Initiatives

Mayor Duggan has made blight eradication a top priority and has attempted to coordinate Detroit's multiple public and private organizations in an effort to streamline funding and execute a strategy toward this critical effort. To that end, the Duggan administration has created the Department of Neighborhoods and empowered the Detroit Land Bank Authority ("DLBA") to aggressively move forward with multiple blight initiatives, including:

- Nuisance Abatement
 - Legal process of the City taking proactive legal remedies to seize abandoned properties within Detroit via the transfer of title to the DLBA (after the owner has been given the opportunity to bring the property "up to code")
- Enhanced Intake Process
 - DLBA performs a cost-benefit analysis to assess the estimated costs to restore a property as compared the assumed demolition expense
- Disposition
 - DLBA has been initially successful in selling viable houses via open houses and online auctions

In addition to the City's blight efforts, the Detroit Blight Removal Task Force ("Task Force") recently released its Blight Removal Task Force Plan that articulated the Task Force's efforts since it was founded in September 2013 and its view on the City's blight efforts. The Task Force, in partnership with Data Driven Detroit and Michigan Nonprofit Association, created the Motor City Mapping ("MCM") project that created a database cataloging the physical condition, tax status, and other pertinent information of all 380,000 parcels of land in Detroit. Also, these partners developed the Maximizing Community Impact ("MCI") software tool designed to identify neighborhoods where targeted funding could stem blight expansion. Going forward, the Task Force's mission – as it pertains to the City's blight – is to focus on removing blighted structures and cleaning vacant parcels. The Task Force

estimates it will cost the City approximately \$850 million to execute the Task Force's demolition strategy⁷².

While the City's blight action plan and the Task Force's recommendation appear to be directionally aligned, the City's overall mission to stabilize neighborhoods may result in the DLBA pursuing deconstruction efforts in lieu of demolition, where it makes more sense. If the DLBA is able to resell or recycle some of the building components of the blighted structures and create valuable job opportunities in the process, that approach may make better fiscal sense than an across-the-board demolition strategy.

Plan of Adjustment - Blight Proposals

The City's POA includes a Blight Reinvestment Initiative that proposes to allocate \$420 million of funding towards blight removal over the course of the next nine years. The projected funds dedicated for blight removal have changed in each iteration of the City's POA projections and funding has been allocated to other POA obligations. The forecasted annual blight RRI is as follows:

⁷² <u>Every Neighborhood Has A Future... And it Doesn't Include Blight</u>, Detroit Blight Removal Task Force Plan May 2014.

(\$ millions)	City of Detroit's POA Proposed Blight Expenditures																					
Fiscal Year	2014		2	015	2	016	2	017	2018		2	019	2020		2	021	2022		2	2023	Т	otal
Blight Expenditures	\$	2	\$	100	\$	46	\$	40	\$	43	\$	48	\$	52	\$	45	\$	25	\$	19	\$	420

Funding for the intended blight removal efforts is forecasted to come from a variety of public and private sources, namely \$52 million from the federal government's allocation of its Hardest Hit fund, \$20 million from the Fire Escrow fund⁷³, various private sector contributions, with the balance coming from the City's annual cash flow. I have been told that the funding source for blight is flexible and is currently not necessarily dedicated only for this purpose. The Exit Financing contemplated appears to be the primary source for this funding.

Assuming the City can generate, or raise, the entire \$420 million dedicated for Blight removal over the next nine years, at an average demolition expense of \$11,000 per structure⁷⁴, the POA only allocates enough funding to remove about 50% of the structures designated by the Task Force blight removal.

⁷³It is not clear how the City intends to access these funds for its general blight initiative, as we understand the funds in escrow are designated for the demolition of particular properties destroyed by fire.

⁷⁴Phoenix assumed an average demolition expense of \$11,000 per structure, within the \$8,500-\$12,000 range proffered in the Disclosure Statement and in Phoenix's conversations with the DLBA.

I am not troubled by this apparent discrepancy between what the Task Force believes is required to eradicate blight and what the City is proposing. At some point during the next ten year period, assuming the City can dedicate sufficient funding to the blight initiative in the next few years, I believe that blight removal can become more self-sustaining by incorporating private capital or cost neutral solutions. If the City is initially successful in its blight remediation efforts, private owners and investors will see an economic opportunity to allocate private capital to take advantage of the revitalization efforts. It should be noted that, of the 79,000 structures (excluding lots) that are included as blighted or indicating blight, almost half have the lesser designation of 'structures with indicators of future blight'.⁷⁵ It is likely that some portion of these structures might create realistic opportunity for private investors.⁷⁶

⁷⁵Every Neighborhood Has A Future... And it Doesn't Include Blight, Detroit Blight Removal Task Force Plan May 2014. Page 15

⁷⁶Every Neighborhood Has A Future... And it Doesn't Include Blight, Detroit Blight Removal Task Force Plan May 2014. Page 224- the Blight task force estimates that 80-90% of the properties with blight indicators marked for 'further analysis' will eventually require demolition.

Blight Summary

Quantifying the near- and long-term economic impact of a successful City of Detroit blight removal initiative is difficult due to the absence of a calculable immediate return on the City's investment. The City's POA forecast, embedding the positive cash flow impact of the proposed RRIs, assumes increased income tax revenues of \$204 million and property tax revenues of \$110 million in the ten year period ending June 2023. While other RRIs impact the reasonableness of these incremental revenue assumptions, the relative impact of the blight removal initiative cannot be overstated.

In order to maximize the benefits of the blight removal program, the City must ensure that the funding is committed and supported in the longer term. For better or worse, blight has an emotional impact on the perception of what Detroit is and can be. I believe that the blight initiatives are immensely important to creating and sustaining a positive trajectory for the City's revitalization efforts. With substantive, long term commitments to address blight, I believe that many of the external factors, including home ownership and job creation required to abate the City's decline, can be addressed. Conversely, a start and stop approach, will likely result in ineffective investment and do little to reverse the spread of blight throughout Detroit. This trend would ultimately constrict the City's liquidity and make Detroit a less desirous location for new residents and employers. To effectively address blight, the City needs to achieve economies of scale. The Task Force estimates that through economies of scale, the average cost per structure may be reduced by 17%. Put differently, with proper planning and investment, the City's blight investment can produce 17% greater impact for the same money.⁷⁷

Finally, continued coordination between the City, the State of Michigan, the Federal government, DLBA, and various private constituencies will be critical to the long-term success of the blight initiative. Perpetual updating of MCM, and effective utilization of the MCI software tool to identify the neighborhoods that will benefit the most from allocation of the limited blight funding, will be important to the success of this most critical City initiative.

⁷⁷ <u>Every Neighborhood Has A Future... And it Doesn't Include Blight</u>, Detroit Blight Removal Task Force Plan May 2014. Page 224

Section M – Post Confirmation Oversight

As noted in my definition of feasibility, I believe that the determination of feasibility stretches far into the future, although to impact feasibility, issues that extend further into time must be more significant. Beyond the strictly financial issues, one of the most significant issues impacting feasibility involves post confirmation oversight and governance. Ultimately, the City of Detroit will be largely run by an elected mayor and an elected city council. There are obvious inherent limitations to understanding how the City will be run without knowing who will occupy these critical positions. In the end, the success of the POA will largely rest on the will of these elected officials and whether the will to make the fundamental change is inherited by future leaders.

While the democratic process necessarily creates this limitation, the State of Michigan has created a framework that will provide a level of consistent oversight for the City. If implemented correctly, this oversight will institute financial accountability in the City's operations and greatly improve the ability to address small problems before they become significant factors to long term viability. Public Act 181 of 2014 establishes a 9 member commission, the Financial

Review Commission (FRC), with fairly broad oversight power over the City.

Powers to be granted to the FRC include:

- Ensure the City is complying with the POA
- Review and approve the City's consensus revenue
- Require the City to submit 4 year financial plans
- Review, approve and modify proposed and amended operational budgets of the City
- Require relevant information from the City
- Review and approve requests by the City to issue debt
- Approve the appointment and termination of the City's CFO
- Approve collective bargaining agreements
- Approve all contracts that exceed \$750,000

I strongly believe that the appointment of the FRC improves the prospect of the

City continuing to improve its fiscal health and therefore, provides some level of assurance to me regarding feasibility. I do note, that the FRC is populated by 9 noncompensated members. What we have learned about the City's finances, reporting and operations compels me to caution that the task the FRC is undertaking is not only challenging, but will require substantial time. Therefore, I believe that the positive prospects associated with the implementation of the FRC would be improved if the FRC hires permanent staff. My belief is that an executive director level professional with qualifications similar to a CFO would significantly improve the oversight functions associated with the FRC. I understand that the State has appropriated funds for the operation of the FRC and these funds may in fact already be allocated to the above noted purpose.

As noted elsewhere in this Report, the pension plans are very complex. The accounting and actuarial assumptions are difficult to understand; it is even harder to understand how changes in assumptions may changes the City's future financial prospects. Therefore, I believe that it is important for the FRC to require annualized reporting from the City regarding each of the GRS and PFRS systems:

- The undiscounted liability of each of its pension plans.
- A sensitivity analysis consistent with those recommended by the Society of Actuaries Blue Ribbon Panel that provide a discount of the liability based on +/- 3% from the investment return discount rate used in the plan.

This reporting will allow outside observers to truly understand the nature of the City's continuing legacy pension obligations and insure that the City has foresight to deal with and significant deterioration of the pension UAAL during the time in which the City will not be making any direct cash payments to the pension funds, but the liability could nonetheless grow.

Public Act 182 of 2014 provides for the appointment of the City CFO, the identification of reporting requirements to the FRC and others, among other provisions. We do note that Public Act 181 and 182 requires the following:

That the City's financial plan include a general reserve fund for each fiscal year to cover potential reductions in revenues or increases in projected expenditures equal to not less than 5% of the project expenditures for the fiscal year.

I do not believe that the City's POA, as currently presented, complies with this requirement. The City has not identified how it intends to come into compliance with this provision.

As noted elsewhere in my Report, the City is unable to produce any reliable reporting in a timely manner. This will impact the FRC in their duties. At present, the City does not conduct monthly financial closes. That is, the City does not produce financial statements during the year. Further, it does not have a system to properly account for encumbrances. At present, the City relies on cash based information for what little information it does use to manage its operations. This cash based system is woefully inadequate for the purpose of running a major city long term. This will be compounded as the City begins to make large scale investments, such as blight remediation, which require the allocation of funding well in advance of the actual cash expenditure. The City has targeted an ERP system as one of its highest priorities in the RRIs. We fully support this initiative. However, it typically requires between 2-3 years, and sometimes even longer, for a full ERP implementation. During this time, the City will be required to continue to rely on ad hoc reporting. It is my observation that Mayor Duggan is using ad hoc operational

metrics to gain visibility. Given the lack of alternative options, I applaud this and believe that this can be a reasonable proxy for the immediate term, but it cannot replace the need for quick, integrated, systematic reporting over a longer period.

I have a significant concern regarding the City's intention with regard to the ad hoc reporting currently performed. It is my belief, the City is relying heavily on the cash team on site from E&Y. I understand that 3 full time E&Y personnel are allocated exclusively to cash management and reporting. I further understand that the POA does not have any direct funding allocated to retaining E&Y for this function. Further, I do not believe the City has recruited and trained personnel for this fairly complex and critical role. Failure to address this issue prior to confirmation could have a significant impact on the City's ability to manage cash and provide any level of reporting.

Section N - City of Detroit Unresolved Issues

In the event that the Plan of Adjustment is confirmed, the City of Detroit will continue to be challenged with operational, legal and financial issues critical to the City's long-term viability and its ability to execute the proposed restructuring initiatives, including:

- Bankruptcy Eligibility
- 2005-2006 Certificates of Participation
- Potential Swap litigation
- Impact of Collective Bargaining Agreements negotiations
- Potential City of Detroit Asset Sales
- Exit Financing
- Professional Fees post-bankruptcy

The immediate and long-term impacts to the City if it ultimately receives negative outcomes from any of these key issues cannot be quantified at this time. It is likely, though, that these (and possibly other) issues, both individually and collectively, will consume significant City resources, with regards to both human capital and financial reserves, in the period immediately following the conclusion of these chapter 9 proceedings.

Chapter 9 Eligibility

The central issue before the Court since the beginning of this municipal bankruptcy has been the ultimate determination as to whether the City of Detroit was eligible to be a debtor under chapter 9 of the Bankruptcy Code. At the petition date, the City filed its Statement of Qualifications and supporting memorandum demonstrating its compliance with the chapter 9 debtor requirements. Approximately 110 objections to the City's eligibility were filed, along with the Attorney General for the State of Michigan's argument that the Pension Clause of the Michigan Constitution prohibited the City from impairing its obligations to the City's pensioners.

After three months of multiple hearings and bench trial, on December 5, 2013, the Court entered the Eligibility Order stipulating that the City was eligible to be a debtor under chapter 9 and that its bankruptcy petition was filed in good faith. The objecting parties immediately requested an Order of Relief to the Sixth Circuit Court of Appeals. The Bankruptcy Court subsequently issued a memorandum recommending that the Sixth Circuit deny the appeal request entirely, and, if the Sixth Circuit did grant the appeal, that the appeal should not be expedited and therefore ruled upon prior to the City's Confirmation hearing. On February 21,

2014, the Sixth Circuit Court of Appeals granted the appeal petitions, but stated that the appeals would not be expedited.

At this juncture, the City's bankruptcy confirmation hearing and ultimate resolution is scheduled to occur prior to the Sixth Circuit's appellate hearing and decision. The potential impact of a reversal or modification of the Court's Eligibility Order is unknown at this time. It is conceivable that a reversal of the Bankruptcy Court's Eligibility ruling would completely negate the negotiated advances the City has made to date, specifically relating to employee compensation and pension/benefits reform.

Certificates of Participation

In 2005 and 2006, the City of Detroit, via its Retirement Systems and their related service corporations, issued multiple debt instruments known as certificates of participation ("COPs") totaling \$1.47 billion in an effort to reduce the pension plans' combined unfunded liability. At the petition date, three series of COPs were outstanding totaling \$1.473 billion:

(\$ million) COP Series	Amount Outstanding		Interest Rate
2005-A	\$	517.6	4.5-4.95%
2006-A	\$	153.7	5.989%
2006-В	\$	801.6	Floating
	\$	1,472.9	

Material legal debate currently exists as to whether the City of Detroit was legally able to issue the COP debt instruments. The City is bound by both the Home Rule City Act, which details the level of indebtedness a city may incur, and the Municipal Finance Act, which prohibits a city from issuing a municipal security except in accordance with provisions of the Municipal Finance Act. The 2005-2006 COP debt instruments may have been in violation of either or both of these legal statutes.

On January 31, 2014, the City filed a complaint against the Service Corporations and the Funding Trusts – the non-profit entities established to effect the COP debt issuances – stating the 2005-2006 debt issuances were in violation of state law and that the related COP claims should be disallowed in the chapter 9 proceedings. Contradictory complaints were subsequently filed by the Funding Trusts, COP holders, and the COP insurers citing multiple affirmative defenses to the City's complaint. At this time, hearings on the respective motions have been adjourned indefinitely. To the degree that such legal proceedings result in the COP claims being fully or partially allowed, the City's POA could be materially weakened, and may result in incremental liquidity being required from future tax revenue to satisfy future obligations.

Potential Swap Litigation

As highlighted above, the City previously issued multiple COP debt issuances, the 2006-B series of which contained variable interest rates, thereby exposing the City to a rising interest rate environment. To hedge against this risk, the City entered into variable interest rate swap transactions in a notional amount of \$800 million, equivalent to the 2006-B COPs series. The swap contracts were insured by FGIC and Syncora to guarantee the quarterly payments defined in the swap agreements.

In 2009, due to the downgrade of the 2006-B series credit rating, the swap counterparties had the right to declare an early swap termination event which, at the time, would have required the City to make a lump sum payment of \$300-400 million to the swap counterparties. In an effort to avoid making such payment, the City pledged certain casino revenues and developer payments as collateral to the swap

counterparties. Approximately \$0.5 million per day is held in a lockbox until the City makes its \$4 million monthly swap payment.

The City's UTGO bond ratings were downgraded in 2012, exposing the City to a subsequent termination event and additional, costly termination payments due to the swap counterparties. In efforts to protect its interest in the collateralized Casino revenues, the City of Detroit entered into multiple mediations and litigation with both the swap counterparties and the swap insurers. The mediation with the swap counterparties resulted in reaching the Forbearance and Optional Termination Agreement that, after significant prodding from the Court, resulted in an agreement for a reduced Optional Termination Payment of \$85 million, payable when the City raises the required Exit Financing or in installments within 180 days of the case's Effective Date.

The Court entered a Swap Settlement order on April 15, 2014, which was subsequently appealed by multiple swap insurers contesting the swap counterparties ability to exercise any optional right of termination of the swap contracts without the insurers' written consent (<u>Syncora Guarantee Inc. v. UBS AG, et al.</u>, Adv. Proc. No. 13-05395)⁷⁸. The litigation appears to essentially hinge on two primary issues: 1)

⁷⁸ Quarterly Report with Respect to the Financial Condition of the City of Detroit; Office of the Emergency Manager; dated April 15, 2014.

whether the swap insurers have the right to prevent the City from gaining access to its wagering tax revenues (City of Detroit, Michigan v. Syncora Guarantee Inc. et <u>al.</u>, Adv. Proc. No. 13-04942)⁷⁹, and 2) whether the swap counterparties had the "standing" to enter into the FOTA without the swap insurers' consent. On the first issue, the District Court – in a July 14, 2014 decision - ruled the swap insurers did not have the right to trap the City's wagering tax revenues. That decision, as well as the ruling on the swap counterparties authority to execute the FOTA without the swap insurers' consent, will thus be decided by the Sixth Circuit Court of Appeals. To the degree the insurers' appeal is successful, any clarity of the City's financial exposure to a potential swap termination payment would be lost and would possibly result in the future restricted access to some portion of the vital Casino revenues.

Collective Bargaining Agreements

The City of Detroit, throughout this bankruptcy process, has been negotiating to reach CBAs with its various labor unions representing the City employees. A total of 47 labor unions represent the City's employees, all of which had their CBAs

⁷⁹ Quarterly Report with Respect to the Financial Condition of the City of Detroit; Office of the Emergency Manager; dated April 15, 2014.

expire as of June 30, 2013. The City's employees have been subject to City Employment Terms ("CETs") since the expiration of the respective CBAs. The City estimates that the CETs have resulted in more than \$200 million of annualized labor savings.

The City has negotiated many new CBAs with the goal of having them mirror the effective terms of the CETs. Phoenix has recently received the majority of negotiated CBAs, some of which have been fully approved by the State of Michigan, and some of which have been ratified but await the State's approval. Due to the timing of when Phoenix received these CBAs relative to our Report deadline, we have not fully reviewed each of these CBAs. To the degree that the final, agreedupon terms of the respective CBAs contain aspects that are costlier to the City than the current CETs or contemplated in the projections, the City's liquidity could be negatively impacted. I am further concerned that the newly negotiated CBAs may not have sufficiently addressed the City's historic work rule issues.⁸⁰

⁸⁰ I have received assurance from City advisors that all agreed-upon CBAs are included in the projections.

Potential Asset Sales

Concurrent with the City's bankruptcy process, the City and its representatives have been in discussions with multiple constituencies in efforts to ascertain the optimal utilization of certain assets of the City of Detroit, whether that may be the outright sale of certain assets or the proposed leasing and/or partnership of non-core City assets.

The City has been engaged in longstanding discussions pertaining to the Detroit Water and Sewerage Department ("DWSD") with the surrounding counties with regards to the potential formation of a regional water authority. It is conceivable that a new authority could assume operating control of the majority of DWSD assets. To date, the City has not able to reach an agreement on any disposition of the DWSD assets and, as such, the discussions have migrated to bankruptcy-ordered mediation.

In addition to a possible disposition of the DWSD assets, the City has also inquired with interested parties about the possibility of a public-private partnership. Such partnership would entail the operation and management of the DWSD by qualified candidates who have demonstrated the financial and operational capabilities required to execute the DWSD's operations. The City, via its Auto Parking System ("APS"), owns and manages seven parking garages containing 6,793 spaces and controls roughly 3,400 on-street metered parking spaces. At the request of the City, Miller Buckfire & Co. has been tasked with exploring the potential monetization of the City's parking assets. At this time, no definitive decisions have been made by the City regarding these assets.

Lastly, options related to the City's Coleman A. Young Airport are currently being considered, specifically a possible sale or lease transaction. As the airport is currently a cash drain on the City's budget, the transfer of this asset could be beneficial to the City's overall liquidity.

Exit Financing

The City of Detroit is seeking to enter into a \$300 million financing facility ("Exit Facility"), commensurate with the City's anticipated emergence from bankruptcy. Per the POA, an estimated \$120 million of the Exit Facility will be used to refinance the City's existing, previously-funded Quality of Life loan. The balance of the Exit Facility is intended to provide the City with liquidity and begin to fund the POA's restructuring initiatives.

Miller Buckfire & Co. has been engaged to solicit respective parties' interest in the proposed \$300 million financing. To date, an Exit Financing introductory letter and an Exit Financing Indicative Term Sheet have been released to prospective lenders. Phoenix has no visibility into the receptiveness of the financing sources to the proposed debt offering. To the degree the City is not able to procure the anticipated Exit Financing in the amount or at a reasonable interest rate will materially impact the City's cash flow liquidity at its emergence from bankruptcy. As of the date of this Report, it appears that the assumed interest rate of 6% could be low for a high yield instrument like the proposed Exit Financing.

Professional Fees

According to the Plan, the City intends to establish and fund the Professional Fee Reserve, effectively allocating funds for the accrued expenses of professionals during the Chapter 9 bankruptcy. Those funds have been identified in the City's financial forecast.

The services provided by these professional advisors – both legal and financial – are likely to be required by the City after the bankruptcy is confirmed, whenever that occurs. In addition to various litigation matters referenced above, the City's

treasury function, as well as multiple, other financial and departmental functions, are largely performed by outside professionals at this time. This results in two primary concerns: first, many of the everyday functions performed by these outside professionals need to be transitioned to City employees, some of whom may not be hired yet; and, second, the interim, post-bankruptcy costs associated with these outside professionals is not in the City's budget at this time. While the City may be able to transition the Finance-related roles to its employees in the short or mid term, the various ongoing litigations will require a significant near-term financial commitment by the City to its retained legal counsel. The estimated, postbankruptcy professional fees should be included in the City's near-term financial forecasts as they have the potential to be an immediate use of funds.

Section O - Other Risks and Opportunities

The POA and the projections that support the POA have been developed by the City to provide a reasonable forecast and represent a realistic picture of the City's General Fund.⁸¹ Based upon my team's analysis and numerous discussions with the City's advisors, I understand these projections were not developed either to: 1) account for every opportunity the City may have to generate cash flow in the future, or 2) account for every possible downside risk associated with a loss of revenue or an increase to expenses. While I do not disagree with the City's exclusion of certain items, I believe it appropriate to briefly summarize certain risks and opportunities not fully explored elsewhere in this Report.

⁸¹ Report of Gaurav Malhotra in re City of Detroit, Michigan 13-53846, page 3, "These projected revenues and expenditures are reasonable forecasts and represent a realistic picture of the City's General Fund's ability to afford its expenditures and satisfy its obligations under the plan while maintaining an adequate level of municipal services."

Macro-Economic Issues

I believe the City's economic forecasts that informed the projections considered normalized economic conditions. I do not believe the City's projections accounted for any significant economic disruptions similar to those experienced recently during the Great Recession. Depending on the severity, longevity and the direct impact on urban centers, a long term and negative economic condition could cause serious concerns with meeting the Plan requirements.

State and Federal Funding

The POA relies on a number of external funding sources including the State of Michigan and to a lesser extent the Federal government. The State contributes through annual revenue sharing totaling almost \$2 billion over the first 10 years of the Plan as well as \$194 million as part of the Grand Bargain. Any additional support for Detroit at the State level is not committed and, in fact, revenue sharing could decrease over the life of the Plan.

There is obvious interest by the Mayor in identifying new and recurring support from the Federal government and other grant making bodies. The Plan projections have tended to apply conservative assumptions to the current grants and the availability of additional grants in the future, although it is clear that not all grants assumed in the projections are committed at this time. Any increase in direct Federal support or grants will help to make the projections more achievable.

Impact of Private Parties

Third party funders have made significant commitments to the City. In fact, the Grand Bargain represents a huge commitment by these City benefactors and is already accounted for in the projections. However, there are a lot of small ways that third party benefactors may directly and indirectly impact the future of the City. The work of the Blight Task Force and the Future Cities Initiative are an example of this and cannot be measured in dollars. There would also be an improvement in the feasibility of the POA if a surge in private investment favorably impacts real estate values, employment and other factors that could contribute favorably to the initiatives in the Plan.

There is a downside to third party involvement as well. It can be fickle; a change in priorities or fortune could reduce the level of funding or delay it. The POA calls for \$366 million from charities and foundations plus an additional \$100 million to be raised by the DIA Corporation as part of the Grand Bargain which will be paid over a 20 year period. Failure of these foundations or benefactors to execute

on their commitments will result in further funding requirements from the City of Detroit.

Exit Financing and Access to Capital Markets

The POA contemplates the closing of an Exit Financing that will support the City's investment and liquidity needs. The projections assume Exit Financing will be a \$300 million facility with an 11 year term, funded on October 31, 2014, with interest only payments in the first 4 years and equal principal payments made in years 5-11. The interest rate is assumed to by 6%.⁸² We understand the City, through its advisors Miller Buckfire & Co., have commenced a process to solicit bids for this financing package. As of the date of this Report, the process is still underway. Mr. Buckfire believes that the Exit Financing process is likely to be successful on the terms outlined.⁸³ In the event that this financing is unavailable to the City on reasonable terms, is significantly lower in terms of facility amount, or is otherwise different than the assumptions in the POA, it is unlikely the City will have sufficient liquidity to operate and satisfy its obligations.

⁸² Report of Gaurav Malhotra in re City of Detroit, Michigan 13-53846, page 14.

⁸³ Expert Report of Kenneth Buckfire in Support of the City of Detroit's Plan of Adjustment in re City of Detroit, Michigan 13-53846 page 3 Section 2.

In addition, I believe it is likely that the City will desire or require access to the capital markets in the future for potentially many different reasons. Mr. Buckfire believes the significant changes as a result of the POA and the State of Michigan's steps to remedy governance will allow the City to again access the capital markets. ⁸⁴ The City's inability to access the capital markets beyond the Exit Financing may limit the City's working capital flexibility and its ability to respond to future, necessary changes in delivery of essential services or capital investments.

DWSD

Detroit Water and Sewerage Department is a significant portion of the City's operations, however, it has very little impact on the General Fund. DWSD largely operates independently from other City business units. While DSWD's debt is impacted by the POA, the DWSD operations are not included in the Plan. DWSD does play a significant role in funding the City's pension obligations during the forecast period⁸⁵. In the event of a significant disruption to the DWSD operations, significant loss of customers impairing its financial prospects, or in the event that

⁸⁴ Expert Report of Kenneth Buckfire in Support of the City of Detroit's Plan of Adjustment in re City of Detroit, Michigan 13-53846 pages 3-5 Sections 3-6.

⁸⁵ DWSD is expected to contribute a total of \$428 million from FY2015-FY2023.

the DWSD contributions are not made according the POA, this could negatively impact on the outcome of the POA.

Sale of Assets

The POA largely excludes the sale of assets. While the sale of certain assets will have established treatment in the POA, there are significant asset sales that are not contemplated in the POA that could positively impact the projections. These assets might include parking related assets and other real estate. I have no visibility into the value of potential asset sales, but I believe they could produce cash which could improve the City's liquidity or revitalization prospects.

Tipping Point

The concept of the Tipping Point was made popular by author Malcolm Gladwell. He characterizes the tipping point as a moment of critical mass or boiling point where a group of small actions hit a threshold point and create an outsized impact. ⁸⁶ A tipping point can be either positive or negative. Presently, the City has

⁸⁶ <u>The Tipping Point</u> by Malcolm Gladwell, 2000 published by Little Brown.

momentum and emotional optimism that it can build upon to energize its revitalization. There is no way to stochastically identify this impact and I do not believe the City has included this optimism in its projections. But there is no doubt that it is real.

I believe the City may be experiencing a tipping point that could be either positive or negative. There is a lot of press about support for the City from external parties making significant investment in Detroit. Press accounts suggest percolating interest in real estate and low availability of market rate apartments in small sections of the City. The City is addressing in small ways the quality of life issues, including street lights and blight.

It is beginning to feel like it could be an exciting time to be in Detroit. Tipping points also work in the opposite direction. If the momentum starts to slow in lots of small ways, or if the headlines change from investors buying, to investors selling, or if blight remediation reverses direction, the City could tip backwards. It is a critical point in time for the City of Detroit. My opinion is that it is more likely to tip forward than to tip backwards.

Section P - Conclusions

As noted in the Feasibility Section of this Report, I, along with the Phoenix team, have proffered the following Feasibility Standard for use in determining whether the City of Detroit's Plan of Adjustment is feasible:

> 'Is it likely that the City of Detroit, after the confirmation of the Plan of Adjustment, will be able to sustainably provide basic municipal services to the citizens of Detroit and to meet the obligations contemplated in the Plan without the significant probability of a default?'

We have further qualified the Standard into two components:

Quantitative

- Are the projections contained in the POA mathematically correct and materially reasonable?
- Are the assumptions that the City has used to develop its projections individually, and when taken as a group, reasonable?
- Is there an adequate contingency included in the projections?

Qualitative

• Does the City have the human resources, or can it likely recruit the human resources, required to meet its obligations under the POA?

- Does the City have the appropriate systems and procedures to monitor its financial performance and to provide early warning signs of variances in performance that might cause the City to fall short of the projections and be unable to meet its obligations under the POA?
- Are there appropriate structures to ensure the City's compliance with the POA and with reasonable government standards of operation?
- Will the City be able to reasonably deliver a minimum level of municipal services?
- Is the City's trajectory sustainable?

The Quantitative Issues

It is my opinion that, except where otherwise noted in my Report, the projections are generally mathematically correct and materially reasonably and therefore fall within the Feasibility Standard I have defined.

It is my opinion that, except where otherwise noted in my Report, the individual assumptions used to build the projections fall into a reasonable range and, that when taken as a group, these assumptions are also reasonable and fall within the Feasibility Standard.

While I have noted issues with the level of contingency in the projections, and feel this must be addressed both as a practical matter and in response to Public Acts 181 and 182 of 2014 controlling law, I believe that there are enough conservative assumptions in the projections to offset what I view as an aggressive assumption concerning the level of contingencies, particularly in the early years. While I do not believe a 1% contingency is adequate, I believe that the POA projections, taken as a whole, fall within the range of reasonableness and within my definition of the Feasibility Standard.

The Qualitative Issues

As noted in this Report, I believe that human capital and the City's leadership ability are immensely important for the success of this Plan. Current human resources are lacking and senior leadership, while generally capable is not plentiful. To meet the projections in the POA, the City will need to recruit a significant number of employees with improved skill level and continue to change the culture of performance and accountability, I believe that the City has identified human capital as an issue and is addressing this both formally and informally. I am relying on Mayor Duggan, CFO John Hill, and the other capable executives I have met at the City to execute effectively on the human capital strategy.

As noted in this Report, the City's IT systems and procedures are broken and insufficient. I believe that the City's Mayor, CFO and CIO recognize the critical importance of effective technology and systems to the City's revitalization. Each

of these executives has convinced me that correcting the City's IT systems issues is a very high priority. I believe the City has recognized these issues, has identified the magnitude of funding required, and has begun to address both the process and technology issues necessary to bring the systems up to a reasonable standard over the next few years. I do not believe that there is a reasonable alternative that would produce a better, or quicker, result for the City.

I have noted my concern and my personal preference that the CFO report to the Financial Review Commission. I believe this would have provided a greater level of confidence in the City's performance by outsiders, including the capital markets. However, I believe that the existence of the Financial Review Commission provides a reasonable level of oversight to the City and that the CFO is eminently capable and appropriately professional and independent.

The POA and the projections that support the POA are designed to allow the City to continue to improve its level of service to the citizens of Detroit. I believe that the RRIs are reasonable and well considered. If executed, they will allow the City to deliver essential services. It is my opinion that the City is beginning to emerge from the "service delivery insolvency" referenced in Judge Rhodes' opinion concerning eligibility. By most accounts, there is forward progress being made in the City. I believe the combined efforts of the Emergency Manager and Mayor are addressing service shortfalls. Further, I believe that the expanding efforts of the private sector are also indicative of a City with a positive trajectory. The POA lays out a plan to continue to improve the City services and I believe some of the work done by the Blight Task Force and the Future Cities Initiative will continue to add additional support to the City's positive trajectory.

After extensive interviews with parties knowledgeable about the City and the POA, the review of hundreds of relevant documents and models, and significant independent research and analysis by my team and me, it is my opinion that:

It is likely that the City of Detroit, after the confirmation of the Plan of Adjustment, will be able to sustainably provide basic municipal services to the citizens of Detroit and to meet the obligations contemplated in the Plan without the significant probability of a default.

As noted in Section C of this Report, I believe that the Feasibility Standard exist on a reasonable continuum, therefore, there are actions that can make the POA "more feasible." Throughout my Report I have noted issues that caused me some level of concern. These are issues that, if addressed, would make the POA 'more feasible.' Without any expectation that my concerns will influence the City or the Court, I will briefly summarize my larger concerns. It should be noted that this opinion is rendered in an environment where there are many factors that will have influence on the City's conditions post confirmation that are unknown and unknowable. Throughout this Report, I have noted some of these factors, while other factors may not even be recognized today as potentially having an impact. My opinion is necessarily limited by these unknown factors. It should be recognized, that these factors, when known, could have a material impact on my view of feasibility.

Integrated Plan

As noted throughout this Report, there is not one controlling set of projections that will provide a financial road map to the City, its constituents and the Financial Review Commission. I recommend that the City immediately produce an integrated plan, which includes the expected initiatives, deferrals and other items, by department and fund. This will provide a longer term roadmap and assist the Mayor, the Financial Review Commission and other interested parties in understanding how the City is making progress towards the forecast detailed in the Plan. This business plan would also meet the requirements established in Public Acts 181 and 182 of 2014.

Oversight

As noted, I would have preferred an oversight model that included a CFO that did not report directly to the Mayor. This is not a statement about the quality of the current Mayor or CFO but rather my view that an oversight structure should be independent of who is the elected official. Given that the structure included in the Grand Bargain legislation does not include this independent CFO, I believe it is imperative that the Financial Review Commission have some permanent staff. My experience in other similar situations allows me to understand the complexity and sheer volume of information that must be analyzed and evaluated to properly execute the oversight function. The legislation provides for the Commission to hire professionals, which it will no doubt need to do, but it will be less costly and better for the long term effectiveness of the Commission, if it has a least a small permanent staff to support the part time, unpaid oversight board.

Pension Plan

One of the driving forces of the City financial problems was the City's, and the pension plans' trustees, failure to appropriately address the growing, unfunded pension liability. With finite resources, competing needs for dollars and the

willingness to push the problem to tomorrow, the pension UAAL continued to grow. This is not only a Detroit problem, but a general municipal finance problem throughout the United States. However, just because it is not *just* a Detroit problem does not mean that Detroit should not make some progress in addressing the macro problems. While the Plan makes progress in addressing this liability, the liability is not fixed. As noted in the Pension section of the Report, there is still risk that the liability could grow significantly. I recognize the difficulty and pain associated with the pension negotiations; and further, I understand the practical nature of the resulting settlements and the City's desire to manage its cash requirements related to pension contributions over the next 10 years. However, this does not fix the liability. The City cannot look away for 10 years and return in FY2023 to find the liability has again become an unmanageable burden. Therefore, I believe it is appropriate that the City be required to annually release the undiscounted liability of each of its pension plans. This will allow outside interested parties to independently evaluate the strength of the plans. Further, I believe that the City should provide a sensitivity analysis consistent with those recommended by the Society of Actuaries Blue Ribbon Panel on an annual basis and provide a discount of the liability based on +/- 3% from the investment return discount rate used in the plan. This level of reporting is not overly burdensome and will provide some level of sunshine into what is otherwise a very opaque process.

<u>RRIs</u>

The RRIs are one of the positive outcomes of the bankruptcy process. The RRIs provide the backbone of improved services to the citizens of Detroit. I believe that the development of a scorecard to track the implementation of the RRIs is an important tracking mechanism that will enable the City and the Financial Review Commission to understand the RRIs' implementation progress.

Respectfully submitted,

Dated: July 18, 2014

/s/_Martha E. M. Kopacz

Martha E.M. Kopacz

<u>Exhibit 1</u>

Martha (Marti) E. M. Kopacz Senior Managing Director Phoenix Management Services LLC Ten Post Office Square, Suite 605N Boston, MA 02110 Mobile - (617) 840-9155 mkopacz@phoenixmanagement.com

Ms. Kopacz has over 25 years' experience assisting stakeholders in analyzing business operations and reorganization possibilities. She has led or participated in over 100 consulting and restructuring engagements representing companies, debtors, investors, creditor committees, banks and Chapter 11 Trustees. Ms. Kopacz has advised in a broad range of industries including not for profit and public sector, retail, leisure and entertainment, technology and professional services. She was one of the first financial advisors to apply turnaround principles to public sector and not for profit organizations. She has served as an Interim President, Chief Restructuring Officer, Chapter 11 Trustee, Collateral Trustee, and Examiner.

General Experience

Ms. Kopacz has prepared dozens of financial projections for clients and reviewed and critiqued dozens more, prepared by others. She has previously testified as to the appropriateness of forecasting methodology, the assumptions upon which forecasts are based and the likelihood of an organization to meet its forecast. She has a deep understanding of the importance of developing assumptions based upon a thorough analysis of relevant data, including historical and prospective information as well as third party, independent data. Ms. Kopacz understands the nuanced area of municipal budgeting. Because municipal entities lack a "standard" in budgeting, forecasting and accounting, great variations occur in the manner in which public entities report financial results and develop forecasts. As such, preparing and evaluating projections for municipalities requires strong business acumen and deep appreciation for the challenges inherent in the forecasting methodology and approach available to the entities.

Relevant Engagements

Ms. Kopacz advised the **Nassau County Interim Finance Authority (NIFA)**, a New York state control board, in their oversight role. In early 2011, NIFA imposed a control period for Nassau County based on a substantial budget deficit. Nassau County has experienced financial difficulties for over a decade despite an annual budget that approaches \$3 billion. The structural deficit for 2012 was estimated at \$300 million. Ms. Kopacz advised NIFA on the financial requirements underpinning the control period, the nature and size of the likely budget deficit and the reasonableness of the County's forecasts. In addition, Ms. Kopacz and her team conducted and in depth review of the business operations of the County and developed over \$300 million of cost reductions and operational improvements, which if implemented would restore Nassau County to a balanced budget in the next few years.

Serving in the capacity of the Chief Restructuring Officer and Interim President, Ms. Kopacz designed, led and executed the out-of-court restructuring of the **Legal Aid Society**, a 135 year old charity with approximately \$150 million in revenue serving the legal needs of the needy in New York City.

Accomplishments included: reducing a \$20 million operating deficit to better than break even; negotiating workforce reductions, compensation and benefit modifications with the UAW (lawyers' union) and the SEIU 1199 (social workers and paralegals' union) representing approximately threefourths of the Society's 1400 employees; restructuring pension obligations; consolidating real estate, third party suppliers and infrastructure; and restructuring over \$65 million of balance sheet and long term obligations with dozens of creditors and stakeholders, all of which returned the organization to solvency. In addition, Ms. Kopacz led the Society's first ever Strategic Business Planning effort, managed day-to-day operations in conjunction with the Attorney-in-Chief, and received the Society's Pro Bono service awards for 2004 and 2005.

Ms. Kopacz represented **The Educational Resources Institute, Inc. (TERI)**, a large not for profit organization providing college access to underprivileged and underserved populations. TERI's for profit subsidiary was the largest guarantor of private student loans in the country when the securitization market for student loans evaporated. The extensively negotiated plan of reorganization preserved the not for profit mission and return collateral to the original lenders.

Ms. Kopacz worked extensively with the **Archdiocese of Boston** during some of its darkest days. In addition to preparing this socially significant non-profit institution for a contingent bankruptcy filing, she worked with stakeholders to develop a crisis communication plan, arranged interim financing and designed a claims facility to adjudicate tort claims.

Prior Experience

Prior to joining Phoenix Management, Ms. Kopacz founded Brant Point Advisors, a boutique advisory firm. Previously, Ms. Kopacz co-founded and co-lead the U.S. Corporate Advisory and Restructuring Services practice at Grant Thornton LLP and lead the group's public sector initiatives. Earlier in her career she was a Managing Director with Alvarez & Marsal, focused on public sector and not for profit clients, and a Principal with PricewaterhouseCoopers LLP until the practice was sold to FTI Consulting, as which time she was a Senior Managing Director.

Phoenix Management Services, Inc. In re: City of Detroit, Michigan, Debtor Case No. 13-53846 Open Information Requests as of July 18, 2014

REQUESTED PARTY	DATE REQUESTED	DATA REQUESTED	STATUS
OUTSTANDING REQU	UESTS		
Jones Day	6/10/14	Any stochastic or sensitivity analyses undertaken by City advisors or advisors to the Retirement Systems relevant to use of a 6.75% investment return assumption for GRS.	
Ernst & Young	5/21/14	Comparison of the Revenue and Expenditures as reported on E&Y's Actual Cash Flow reports for the fiscal years 2012 and 2013 against the completed CAFR	
Ernst & Young	5/29/14	Pension: All pension plan sensitivity analyses; including, those that look at how changes in investment returns impact unfunded level	Received for PFRS; not received for GRS
Ernst & Young	5/29/14	Pension: Sensitivities on how different pension return rates impact the pension restoration provisions in the plan	Received for PFRS; not received for GRS
		If none exist, please run Pensions UAAL calculation at 3%, 5%, 6%, and 8% assumed rate of return	
Ernst & Young	5/30/14	Actuary reports/analysis that provide detailed support behind yearly contributions to pensions for active employees in the 40 Year Plan	
Ernst & Young	5/29/14	Modified version of 10 Year Plan that fully integrates CM's Restructuring Initiatives within the departmental budgets – including the department-level detail of Restructuring deferrals	

REQUESTED PARTY	<u>DATE</u> REQUESTED	DATA REQUESTED
Ernst & Young	6/6/14	Detail of estimated post-BK professional fees (Jones Day, E&Y, AND CM) in POA forecasts
Conway MacKenzie	5/22/14	Reconciliation of 10 Year Plan and City's Triennial Budget
Conway MacKenzie	5/27/14	Status of Fox Lawson review of White Book; anticipated changes to pay grades and classification post- petition; estimated Plan impact of said changes
Conway MacKenzie	5/27/14	Total budget - by line item - for each department in Finance, Accounting and IT if Centralized Governance was approved. How much City wide the ten year plan envisions spending on IT, Accounting and Finance?
Conway MacKenzie	6/6/14	Detail of estimated post-BK professional fees (Jones Day, E&Y, AND CM) in POA forecasts
Ernst & Young/CM	7/9/14	City employee headcount by department– as of 6/30/14; gross payroll cost (excluding OT) for FYE 6/30/14; annualized gross payroll run rate (excl. OT) as of 6/30/14

UNITED STATES BANKRUPTCY COURT EASTERN DISTRICT OF MICHIGAN

In re

CITY OF DETROIT, MICHIGAN

Chapter 9

Case No.: 13-53846

Debtor.

Hon. Steven W. Rhodes

CERTIFICATE OF SERVICE

I hereby certify that on August 27, 2014, I electronically filed the City's Opposition to Motion to Exclude Certain Of The Expert Opinions Of Martha Kopacz with the Clerk of the Court, which sends notice by operation of the Court's electronic filing service to all ECF participants registered to receive notice in this case.

Dated: August 27, 2014

/s/ Heather Lennox Heather Lennox
